Section I – Enrollee Information

The New York State Department of Health (Department, DOH) exercises overall supervision of the Medicaid Program. Enrollee eligibility, however, is handled by the fifty-eight local departments of social services (LDSS) and the New York City Human Resources Administration (HRA).

Generally, the following groups are eligible for Medicaid in New York State:

- Citizens and certain qualified persons who are:
 - eligible for Low Income Families (families with children under age 21; persons under age 21 living alone; and pregnant women); or
 - in receipt of or eligible for Supplemental Security Income (individuals who are aged, certified blind or disabled); or
 - children on whose behalf foster care maintenance payments are being made or for whom an adoption assistance agreement is in effect under Title IV-E of the Social Security Act; or
 - individuals between the ages of 21 and 65 not living with a child under the age of 21, not certified blind or disabled, and not pregnant, whose income and resources are below the Public Assistance Standard of Need.
- Citizens and certain qualified persons who meet the financial and other eligibility requirements for the State’s Medically Needy Program.

These persons have income and resources above the cash assistance levels, but their income and resources are insufficient to meet medical needs.

These groups generally include:

- infants up to age one and pregnant women whose family income is at or below 185% of the federal poverty level;
- children age one through five whose family income is at or below 133% of the federal poverty level;
- other children with family income at or below 100% of the federal poverty level, including all children under age 19;
- families with children under age 21 who do not have two parents in the household capable of working and providing support;

- persons related to the Supplemental Security Program (i.e., aged, certified blind or disabled);
- adults in two-parent households who are capable of working and providing support to their children under age 21;
- a special limited category of Medicaid eligibility is available for individuals who are entitled to the payment of Medicare deductibles and coinsurance, as appropriate, for Medicare-approved services. An individual eligible for this coverage is called a Qualified Medicare Beneficiary (QMB).

Any individual who is fully Medicaid-eligible and has Medicare coverage, even if not a QMB, is also entitled to have Medicare coinsurance and deductibles paid for by Medicaid. An individual may also have these benefits as a supplement to other Medicaid eligibility. QMB status is identified through the Medicaid Eligibility Verification System (MEVS).

Identification of Medicaid Eligibility

It is important to determine Medicaid eligibility for each medical visit since Medicaid eligibility is date specific. Each enrollee should have only one Common Benefit Identification Card (CBIC) or Temporary Medicaid Authorization paper document. If the enrollee presents a Temporary Medicaid Authorization paper document, there should be no obstacle to payment of the claim because of the enrollee's ineligibility for Medicaid, for medical services provided within the dates of coverage listed on the form.

The Temporary Medicaid Authorization is completed by the LDSS worker and includes the enrollee's:

- Name;
- Date of Birth;
- Social Security Number;
- Case Number;
- Caseworker's name and telephone number;
- Issuing County; and
- Type of Medicaid coverage authorized;
- Any restrictions that exist;
- Authorized dates of coverage.

It is recommended that the provider make a copy of the Temporary Medicaid Authorization and return the original to the enrollee, as he or she may have further medical needs during the authorization period.

The CBIC has the capability of being activated and authorized for several assistance programs at the same time. It is important for the provider to check the actual card through the MEVS system to assure there is current, active Medicaid coverage. This

card may or may not have a photograph on it, as this is not a requirement for some enrollees because of their category or circumstances.

Sometimes, an enrollee may present the provider with more than one card for the same individual. This may occur when the enrollee has reported to the district that their card is lost and is then found after the LDSS issues a replacement card. In these cases, the card with the most current date and time is the most recently issued card.

The permanent, plastic CBIC does not contain eligibility dates or other eligibility information. **Therefore, presentation of a CBIC alone is not sufficient proof that an enrollee is eligible for services. Each of the Benefit Cards must be used in conjunction with the MEVS process.** Through this process, the provider must be sure to verify if the enrollee has any special limitations or restrictions.

If the provider does not verify the eligibility and extent of coverage of each enrollee each time services are requested, then the provider will risk the possibility of non-reimbursement for services provided as **the State cannot compensate a provider for a service rendered to an ineligible person.** Eligibility information for the enrollee must be determined via the MEVS.

Eligible enrollees in voluntary child care agencies and residential health care facilities are issued Medicaid ID numbers which are maintained on a roster. A CBIC is usually not issued for these enrollees. If a card is required, a non-photo CBIC will be issued by the LDSS. It is the responsibility of the voluntary child care agency or the residential health care facility to give the enrollee's Medicaid ID number to other service providers; those providers must complete the verification process via MEVS to determine the enrollee's eligibility for Medicaid services and supplies.

The MEVS Provider Manual is available online at:

<http://www.emedny.org/ProviderManuals/AllProviders/index.html>.

Eligible Enrollees

Swiping the Medicaid card and/or reviewing the paper authorization and making no further comment to the Medicaid enrollee concerning payment for services, leads the enrollee to assume that you, as the provider, will accept Medicaid payment for the service about to be provided.

The Department supports this assumption and expects the provider to bill Medicaid, not the enrollee, for that service.

Ineligible Patients

If you swipe the plastic card and find that the individual is not eligible for Medicaid, then you must inform the patient.

A provider may charge a Medicaid enrollee for services **only** when both parties have agreed **prior** to the rendering of the service that the enrollee is being seen as a private pay patient; this must be a mutual and voluntary decision. It is suggested that the provider maintain the patient's signed consent to be treated as private pay in the patient's medical record.

Emergency Situations

In emergency situations where questions regarding health insurance are not normally asked, the Department expects you to accept the patient as a Medicaid enrollee; however, the enrollee is responsible for providing both the ambulance company and the hospital emergency room billing staff with a Medicaid number when it is requested at a later time.

If the enrollee is not cooperative in providing his or her Medicaid information after the transport or emergency room visit has occurred, then the patient may be billed as private pay. The Department does, however, expect that diligent efforts will be made to obtain the Medicaid information from the patient.

Services Available Under the Medicaid Program

Under the Medicaid Program, eligible individuals can obtain a wide variety of medical care and services. To acquaint providers with the scope of services available under this Program, the following list has been developed as a general reference.

Payment may be made for necessary:

- medical care provided by qualified physicians, nurses, optometrists, and other practitioners within the scope of their practice as defined by State Law;
- preventive, prophylactic and other routine dental care services and supplies provided by dentists and others professional dental personnel;
- inpatient care in hospitals, skilled nursing facilities, infirmaries, other eligible medical institutions (except that inpatient care is not covered for individuals from age 21 to 65 in institutions primarily or exclusively for the treatment of mental illness or tuberculosis), and health related care in intermediate care facilities;
- outpatient hospital and clinic services;
- home health care by approved home health agencies;
- personal care services prior authorized by the LDSS;

- physical therapy, speech pathology and occupational therapy;
- laboratory and X-ray services;
- family planning services;
- prescription drugs per the Commissioner's List, supplies and equipment, eyeglasses, and prosthetic or orthotic devices;
- early and periodic screening, diagnosis and treatment for individuals under 21;
- transportation when essential to obtain medical care;
- care and services furnished by qualified health care organizations or plans using the prepayment capitation principle;
- services of podiatrists in private practice only for persons in receipt of Medicare or under age 21 with written referral from a physician, physician's assistant, nurse practitioner or nurse midwife.

Providers must offer the same quality of service to Medicaid enrollee that they commonly extend to the general public and may not bill Medicaid for services that are available free-of-charge to the general public.

Qualified Medicare Beneficiary

The Medicaid Program permits payment toward Medicare deductibles and coinsurance, as appropriate, for certain Medicare Part B services provided to a select group of elderly and disabled Medicare enrollees with low income and very limited assets. These individuals are known as Qualified Medicare Beneficiaries ([QMBs](#)).

Not all Medicaid enrollees who have Medicare Part B coverage are QMBs.

Entitlement to QMB benefits must be confirmed by accessing the MEVS. It is crucial to note that the mere presentation of the enrollee's CBIC or other appropriate documentation is not sufficient to confirm an individual's entitlement to QMB services. A provider must confirm an individual's current QMB eligibility by accessing the MEVS prior to the provision of each service.

Free Choice

A person covered under Medicaid is free to choose from among qualified facilities, practitioners and other providers of services who participate in the Medicaid Program.

Enrollment in Medicaid does not mandate practitioners to render services to all Medicaid enrollees who request care. If a private payment arrangement is made with a Medicaid enrollee, the enrollee should be notified in advance of the practitioner's choice not to accept Medicaid reimbursement. The Medicaid Program cannot be billed for services rendered under these circumstances.

Guidelines that govern reasonable application of "free choice" are:

- Appropriate resources of the local medical market area should first be utilized in order to avoid unnecessary transportation costs;
- Medical "shopping around" habits should be discouraged so that continuity of care may be maintained.

Right to Refuse Medical Care

Federal and State Laws and Regulations provide for Medicaid enrollees to reject any recommended medical procedure of health care or services and prohibit any coercion to accept such recommended health care. This includes the right to reject care on the grounds of religious beliefs.

Civil Rights

In structuring their practice, practitioners must ensure that any limitations are based on criteria which are not discriminatory and continue to comply with a person's civil rights.

Public Law 88-352, the Civil Rights Act of 1964 as amended in 1972, Section 601, and Rehabilitation Act of 1973 reads as follows:

"No person in the United States shall, on the ground of race, color, national origin, age, sex, religion or handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."

Confidentiality

Information, including the identity and medical records of Medicaid enrollees, is considered confidential and cannot be released without the expressed consent of the enrollee. Medical records and information which are transmitted for the purpose of securing medical care and health services are received and held under the same confidentiality.

All providers **must** comply with these confidentiality requirements.

The DOH, its various political subdivisions, LDSS and fiscal agent, must also observe the confidentiality requirements and must provide safeguards against unauthorized disclosure. This policy should in no way be construed to preclude authorized access to records by the DOH which is under a very strict obligation to monitor medical practices under the Medicaid Program. Authorized representatives of the Department, its subdivisions, LDSS and Fiscal Agent have the right to clear access to the medical and financial Medicaid records.

This general policy does not preclude the release of information to the Fiscal Agent, and to Federal, State and local program officials for purposes directly connected with the administration of the Medicaid Program.

When Medicaid Enrollees Cannot be Billed

This is the policy of the Medicaid Program concerning the enrollee, including those Medicaid enrollees who are enrolled in a Managed Care Plan and in Family Health Plus.

Acceptance and Agreement

When a provider accepts a Medicaid enrollee as a patient, the provider agrees to bill Medicaid for services provided or, in the case of a Medicaid Managed Care enrollee, agrees to bill the enrollee's Managed Care Plan for services covered by the contract. The provider is prohibited from requesting any monetary compensation from the enrollee, or his/her responsible relative, except for any applicable Medicaid co-payments.

A provider who participates in Medicaid fee-for-service but does not participate in the enrollee's Medicaid Managed Care Plan may not bill Medicaid fee-for-service for any services that are included in the Managed Care Plan, with the exception of family planning services. Neither may such a provider bill the enrollee for services that are covered by the enrollee's Medicaid Managed Care contract unless there is a prior agreement with the enrollee that he/she is being seen as a private patient as described above. The provider must inform the enrollee that the services may be obtained at no cost to the enrollee from a provider that participates in the enrollee's Managed Care Plan.

Private Pay Agreement

A provider may charge a Medicaid enrollee, including a Medicaid enrollee enrolled in a Managed Care Plan, **ONLY** when both parties have agreed **PRIOR** to the rendering of the service that the enrollee is being seen as a private-pay patient. This must be a mutual and voluntary agreement. It is suggested that the provider maintain the patient's signed consent to be treated as private pay in the patient record.

Claim Submission

The prohibition on charging a Medicaid enrollee applies when a participating Medicaid provider fails to submit a claim to the the Department's eMedNY fiscal agent, or the enrollee's Managed Care Plan within the required timeframe. It also applies when a claim is submitted to eMedNY or the enrollee's Managed Care Plan and the claim is denied for reasons other than that the patient was not Medicaid-eligible on the date of service.

Collections

A Medicaid enrollee, including a Medicaid Managed Care Enrollee, must not be referred to a collection agency for collection of unpaid medical bills or otherwise billed, except for applicable Medicaid co-payments, when the provider has accepted the enrollee as a Medicaid patient. Providers may use any legal means to collect applicable unpaid Medicaid co-payments.

Emergency Medical Care

A hospital that accepts a Medicaid enrollee as a patient, including a Medicaid enrollee enrolled in a Managed Care Plan, accepts the responsibility of making sure that the patient receives all medically necessary care and services.

Other than for legally established co-payments, a Medicaid enrollee should never be required to bear any out-of-pocket expenses for medically-necessary inpatient services or medically-necessary services provided in a hospital-based emergency room (ER). This policy applies regardless of whether the individual practitioner treating the enrollee in the facility is enrolled in the Medicaid Program.

When reimbursing for ER services provided to Medicaid enrollees in Managed Care, health plans must apply the *Prudent Layperson Standard*, provisions of the Medicaid Managed Care Model Contract and Department directives.

Claiming Problems

If a problem arises with a claim submission, the provider must first contact eMedNY or, if the claim is for a service included in the Medicaid Managed Care benefit package, the enrollee's Medicaid Managed Care plan.

If eMedNY or the Managed Care Plan is unable to resolve an issue because some action must be taken by the enrollee's LDSS (i.e., investigation of enrollee eligibility issues), then the provider must contact the LDSS for resolution.

Prior Approval

Prior Approval is the process of evaluating the aspects of a plan of care which may be for a single service or an ongoing series of services in order to determine the medical necessity and appropriateness of the care requested.

Prior Approval determinations are made by the Local Professional Director for the district having financial responsibility for the enrollee (which is identified via MEVS). It is the providers' responsibility to verify whether the services and care rendered in their professional areas require prior approval.

Prior Approval contacts can be contacted at the telephone numbers listed in the [Information for All Providers, Inquiry Manual](#), online at:

<http://www.emedny.org/ProviderManuals/AllProviders/index.html>.

When a provider determined that a service requires prior approval, he/she must obtain a prior approval number by following procedures outlined in the [Billing Guidelines](#) and [Policy Guidelines](#) sections of each provider manual. Requests for prior approval must be submitted before a service is rendered, except in cases of emergency.

Prior Approval and Payment

No payment will be made when the request for prior approval is submitted after the service is rendered, except in cases of emergency.

Prior approval does not ensure payment. Even when a service has been prior approved, the provider must verify an enrollee's eligibility via the MEVS before the service is provided and comply with all other service delivery and claims submission requirements described in each related section of the provider manual.

Services for which the provider has received prior approval are not subject to Utilization Thresholds.

On the appropriate claim form, the provider must include the prior approval number assigned to his/her request. Information on the claim form must be consistent with the information given and received during the prior approval process.

When a treatment plan has been prior approved for an enrollee, and that enrollee becomes ineligible before the plan is completed, payment for services provided outside the enrollee's eligibility period shall not be made except where:

- the enrollee is enrolled in the Physically Handicapped Children's Program and has an approved treatment plan; or
- failure to pay for services would result in undue hardship to the patient.

When a provider's treatment plan for an enrollee has been prior approved, but the provider becomes ineligible to participate in the Medicaid Program before that plan is completed, payment for services remaining to be provided will not be made unless undue hardship is placed on the enrollee.

When the reason for ineligibility is due to the provider's suspension or disqualification due to improper practices, under no circumstances will services by that provider be paid after the termination date. All efforts will be made by the LDSS to secure a new provider for the enrollee so the plan can be re-evaluated and, where indicated, completed.

Approval will not be given for providers to render services they are not ordinarily qualified to render. In the event such services are provided by a practitioner in the case of an emergency, the provider must attach to the claim form a justification of the services rendered and complete the "SA EXCP CODE" and "EMERGENCY" fields on the claim. Please refer to the [Billing Guidelines](#) section of your specific provider manual.

When a fee, rate or price change takes place on a prior approved service, the fee, rate or price in effect at the time the service is rendered must be submitted by the provider on the claim for that service.

When prior approval is granted for services to be rendered by a specific date, any extension of such services beyond the time granted must be submitted on a new prior approval request outlining a new or modified treatment plan. Additionally, should a change be necessary in an approved course of treatment, a new Prior Approval Request must be submitted.

Prior Authorization

Prior authorization is the acceptance by the Local Commissioner of Social Services, or his/her designated representative, of conditional financial liability for a service or a series of services to be rendered by the provider.

Prior authorization does not ensure payment. Even if a service has been prior authorized, the provider still must verify an enrollee's eligibility via the MEVS before rendering service and the claim must be otherwise payable in accordance with the requirements as found in each related section of the provider manual.

In instances when a prior authorized item or service has been ordered, the vendor must confirm that the orderer has not been excluded from the Medicaid Program.

There are certain services which always require prior authorization, i.e., personal care services and non-emergency transportation. Each specific provider manual indicates

which services, if any, require prior authorization. Services requiring prior authorization are not subject to Utilization Thresholds.

Utilization of Insurance Benefits

The Medicaid Program is designed to provide payment for medical care and services only after all other resources available for payments have been exhausted; Medicaid is the payer of last resort.

The Medicaid Program does not require all providers to enroll as Medicare providers. However, the following providers **must** be enrolled in Medicare **prior** to applying for enrollment as a New York State Medicaid Provider:

- Durable Medical Equipment;
- Pharmacy;
- Hospital;
- Ambulance;
- Skilled Nursing Facility;
- Clinic; and
- Laboratory.

Additionally, certain providers may be required to enter into a contract with other payers. If providers do not enter into an agreement with other payers (excluding Medicare), then they must follow the instructions and requirements contained in Title 18 NYCRR § 542. These guidelines are available online at:

<http://www.health.ny.gov/nysdoh/phforum/nycrr18.htm>.

Medicaid requires providers to exhaust all existing benefits prior to the billing of the Medicaid Program. If an enrollee has third-party insurance coverage, he/she **must** inform the LDSS of that coverage and to use its benefits to the fullest extent before using Medicaid. Supplementary payments may be made by Medicaid when appropriate.

Upon verification of an enrollee's eligibility via MEVS, information specific to an enrollee's eligibility is reported. Eligibility verification responses are detailed in the **MEVS Manual** and Third Party Insurance codes are available in the [Third Party Information Manual](#) online at:

<http://www.emedny.org/ProviderManuals/AllProviders/index.html>.

Fair Hearing

If either the provider or enrollee feels that a service which has been recommended by the provider has been unjustifiably denied, the enrollee may request a Fair Hearing via any one of the following methods:

- Call (800) 342-3334, or
- Fax a copy of the denial notice to (518) 473-6735, or
- Online at <http://www.otda.state.ny.us/oah/forms.asp>; or
- In writing to:

Disability Assistance
P.O. Box 1930
Albany, New York, 12201.

Billing

Providers must bill all applicable insurance sources before submitting claims to Medicaid. Payment from those sources must be received before submitting a Medicaid claim.

Medicaid providers may not refuse to furnish services to an individual eligible to receive such services because of a third party's liability for payment for the service.

Third party insurers and corresponding coverage codes for a Medicaid-eligible enrollee can be found online in the **Information for All Providers, Third Party Information Manual** at:

<http://www.emedny.org/ProviderManuals/AllProviders/index.html>.

Record Keeping

Providers must maintain appropriate financial records supporting their determination of available resources, collection efforts, receipt of funds and application of monies received. Such records must be readily accessible to authorized officials for audit purposes.

Section II – Provider Information

The State of New York requires that all providers who participate in the Medicaid Program meet certain basic criteria. For most, this involves the possession of a license or operating certificate and current registration. Compliance with these basic standards is essential not only for medical institutions and facilities, but for professional practitioners as well.

In order to participate in the Medicaid Program, providers are required to enroll with the DOH. For provider enrollment contact information, please refer to the **Information for All Providers, Inquiry Manual**, available online at:

<http://www.emedny.org/ProviderManuals/AllProviders/index.html>.

Providers must inform DOH of any changes in their status as an enrolled provider in the Medicaid Program, i.e., change of address, change in specialty, change of ownership or control. Provider maintenance forms are available online at:

<http://www.emedny.org/info/ProviderEnrollment/index.html>.

Enrollment of Providers

Every person who furnishes care, services or supplies and who wishes to receive payment under the Medicaid Program must enroll as a provider of services prior to being eligible to receive such payments.

Continued participation in the Medicaid Program by providers is subject to re-enrollment upon notice by the Department.

Applications for Enrollment/Re-enrollment

Upon receipt of an application for enrollment or re-enrollment, the Department will conduct an investigation to verify or supplement information contained in the application. The Department may request further information from an applicant and may review the background and qualifications of an applicant.

The Department will complete its investigation within ninety days of receipt of the application. If the applicant cannot be fully evaluated within ninety days, the Department may extend the time for acting on the application for up to 120 days from receipt of the application.

Denial of an Application

In determining whether to contract with an applicant, the Department will consider a variety of factors as they pertain to the applicant or anyone affiliated with the applicant. These factors include, but are not limited to, the following:

- Any false representation or omission of a material fact in making the application;
- Any previous or current exclusion or involuntary withdrawal from participation in the Medicaid Program of any other state of the United States or other governmental or private medical insurance program;
- Any failure to make restitution for a Medicaid or Medicare overpayment;
- Any failure to supply further information after receiving written request;
- Any previous indictment for, or conviction of, any crime relating to the furnishing of, or billing for medical care, services or supplies;
- Any prior finding of having engaged in unacceptable practices;
- Any other factor having a direct bearing on the applicant's ability to provide high-quality medical care, services or supplies or to be fiscally responsible to the Program.

Review of Denial

If any application is denied, the applicant will be given a written notice which may be effective on the date mailed.

After denial of an application, the applicant may reapply only upon correction of the factors leading to the denial or after two years if the factors relate to the prior conduct of the applicant or an affiliate.

All persons whose applications are denied shall have an opportunity to request reconsideration of such denial. A person who wishes to appeal must submit documentation to the Department which will establish that an error of fact was made in reviewing his or her application.

Termination of Enrollment

A provider's participation in the Medicaid Program may be terminated by either the provider or the Department upon thirty (30) days written notice to the other without cause. Additionally, the provider's participation in the Medicaid Program may be terminated under the following circumstances:

- When a provider is suspended or excluded from the Medicaid Program;
- When a provider's license to practice his or her profession, or any registration or certification required to provide medical care services or supplies has been terminated, revoked or suspended, or is found to be otherwise out of compliance with local or State requirements;
- When a provider fails to maintain an up-to-date disclosure form;
- When a provider's ownership or control has substantially changed since acceptance of his/her enrollment application;
- When at any time, the Department discovers that the provider submitted incorrect, inaccurate or incomplete information on his/her application where provision of correct, accurate or complete information would have resulted in a denial of the application.

For a more extensive and precise definition of his/her rights and obligations, persons are referred to part 504, 515, 517, 518 and 519 of Title 18 of the New York Code of Rules and Regulations which are found online at:

<http://www.health.ny.gov/nysdoh/phforum/nycrr18.htm>.

Duties of the Provider

By enrolling in the Medicaid Program, a provider agrees to:

- prepare and maintain contemporaneous records as required by Department regulations and law;
- notify the Department, *in writing*, of any change in Correspondence, Pay-To or Service Addresses;
- comply with the disclosure requirements of the Department with respect to ownership and controlling interests, significant business transactions and involvement with convicted persons;
- report any change in the ownership or control or a change of managing employees to the Department within fifteen (15) days of the change;
- accept payment under the Medicaid Program as payment in full for the services rendered;
- submit claims for payment for services actually furnished, medically necessary and provided to eligible persons;

- permit audits of all books and records or a sample thereof relating to services furnished and payments received under the Medicaid Program;
- comply with the rules, regulations and official directives of the Department.

Keeping Current with Policy Information

Policy information is relayed through the monthly *Medicaid Update* newsletter, which is available in hard copy and electronically; and is sent automatically to each enrolled Medicaid provider. The *Medicaid Update* is available online at:

www.nyhealth.gov/health_care/medicaid/program/update/main.htm.

Note: In an effort to distribute the *Medicaid Update* in a timelier manner, reduce costs, and be more environmentally friendly, the Office of Health Insurance Programs will no longer produce a printed version of the newsletter beginning January 2009. To ensure you continue to receive the *Update*, please register your provider number and email address no later than **October 31, 2008** to:

medicaidupdate@health.ny.gov

Please refer to the [August 2008 Medicaid Update](#) for more information.

Providers are responsible to check their Provider Manual on a *monthly basis* to ensure they are current with the latest policy information. This includes the [Information for All Providers](#) sections, which contain general Medicaid policy, general billing, inquiry and third party insurance information.

Hard copies of Provider Manuals are available for those providers who do not have access to the Internet. In these cases, the provider must call eMedNY at:

(800) 343-9000.

Change of Address

It is the responsibility of the provider to notify the Medicaid Program of any change in address. Keeping the provider file current will ensure the provider receives all updates and announcements. “Change of Address” forms for Rate-Based or Fee-for-Service providers are available online at:

<http://www.emedny.org/info/ProviderEnrollment/index.html>.

Mandatory Compliance Requirements

New York State Social Services Law (SOS) § 363-d (effective 2020) and the corresponding regulations at 18 NYCRR SubPart 521-1 (SubPart 521-1) (effective December 28, 2022) require that Medicaid providers adopt, implement, and maintain effective compliance programs aimed at detecting fraud, waste, and abuse in the Medicaid program.

All New York State Medicaid providers subject to the provisions of Articles 28 or 36 of the Public Health Law, providers subject to the provisions of Articles 16 or 31 of the Mental Hygiene Law, managed care providers or managed long term care plans (collectively, MMCO), and those providers for which the Medicaid program “constitutes a substantial portion of business operations,” are required to have an effective compliance program.

The Office of the Medicaid Inspector General (OMIG) defines “substantial portion of business operations” as claiming or receiving \$1,000,000 or more in the aggregate in a consecutive 12-month period, directly or indirectly, from the Medicaid program.

OMIG has the responsibility under SOS § 363-d and SubPart 521-1 to determine if compliance programs meet the requirements of the law and regulation. An “effective” compliance program is defined in SubPart 521-1 as a compliance program adopted and implemented by the required provider that, at a minimum, satisfies the requirements of SubPart 521-1 and that is designed to be compatible with the provider’s characteristics.

A compliance program should include, at a minimum, the following seven elements: (1) written policies and procedures, (2) the designation of a compliance officer and compliance committee, (3) compliance training and education, (4) lines of communication to the provider’s compliance officer or compliance function, (5) disciplinary policies to encourage good faith participation in the compliance program, (6) auditing and monitoring compliance risk areas, and (7) responding to compliance issues.

Effective compliance programs, in meeting the above seven elements, are expected to establish systemic checks and balances to detect and prevent inaccurate billing and inappropriate practices in the Medicaid program; address the requirement to self-disclose, explain, and repay identified overpayments; address the provider’s responsibility to check for excluded persons who may be involved in the provision of Medicaid services; and other obligations that may be specific to a provider’s size, complexity, resources, and culture.

The OMIG’s Bureau of Compliance regularly conducts reviews of providers to ensure they have a compliance program (if required), and that the compliance program is effective.

Required providers who fall under the requirements of the regulation are required to certify upon enrollment and annually using the NYS Department of Health (DOH) “Certification Statement for Provider Billing Medicaid” (ETIN) form. Each year, approximately 45-60 days before the anniversary of a provider’s enrollment, DOH mails a package of information and materials to the provider, which includes the ETIN form. This form must

be completed and returned by the enrollment anniversary date.

Failure to adopt, implement, and maintain an effective compliance program may result in sanctions or penalties, including, but not limited to, the revocation of the provider's agreement to participate in the Medicaid program.

Additional guidance and information on compliance requirements is available on OMIG's website at: <https://omig.ny.gov>. You may also subscribe to OMIG's [listserv](#) to receive agency updates and announcements.

Out-of-State Medical Care and Services

Medicaid beneficiaries should obtain medical care and services from qualified providers located in New York State. Provision of medical care and services provided out of state are subject to the New York State Medicaid rules, regulations, policies, procedures and rates applicable to in-state providers.

For beneficiaries obtaining services through the NYS Office of Mental Health, the NYS Office for People With Developmental Disabilities, the NYS Office of Alcohol and Substance Abuse Services, the NYS Office of Long Term Care and/or the NYS Office of Children and Family Services, concurrence from those agencies may be required for care, services and placement out of state and provider enrollment.

Prior Approval

Prior approval is required when referring a Medicaid beneficiary to an out-of-state provider for the following medical care and services:

- High Level Care (HLC) or Special Level of Care (SPC) long term care services. See the Residential Health Manual- Prior Approval Guidelines at: [http://www.emedny.org/ProviderManuals/ResidentialHealth/PDFS/PA%20Form%20Instructions\(HLC-SPC%20o-o-s\).pdf](http://www.emedny.org/ProviderManuals/ResidentialHealth/PDFS/PA%20Form%20Instructions(HLC-SPC%20o-o-s).pdf).
- Certain inpatient and clinic services not available in New York State. See the Inpatient Manual and Clinic Manual Policy Guidelines for instructions on prior approval for services not available in New York State: http://www.emedny.org/ProviderManuals/Inpatient/PDFS/Inpatient_Policy_Guidelines.pdf
http://www.emedny.org/ProviderManuals/Clinic/PDFS/Clinic_Policy_Guidelines.pdf

Providers must follow Medicare rules for care and services provided to Medicare primary beneficiaries. Medicare approved care and services provided to Medicare primary beneficiaries do not require prior approval from New York State Medicaid.

Providers

Out-of-State providers must enroll in the New York State Medicaid Program in order to be reimbursed by the Program. Only providers in the United States, Canada, Puerto Rico, Guam, the United States Virgin Islands and American Samoa are eligible for enrollment in the New York State Medicaid Program.

Enrollment contact information is available in the **Information for All Providers – Inquiry Manual** at:

<http://www.emedny.org/ProviderManuals/AllProviders/index.html>.

Record-Keeping Requirements

Federal Law and State Regulations require providers to maintain financial and health records necessary to fully disclose the extent of services, care, and supplies provided to Medicaid enrollees. Providers must furnish information regarding any payment claim to authorized officials upon request of the DOH or the LDSS.

For medical facilities subject to inspection and licensing requirements provided in Article 28 of the Public Health Law, the State Hospital Code contains specific details concerning content and maintenance of medical records. Practitioners providing diagnostic and treatment services must keep medical records on each enrollee to whom care is rendered. At a minimum, the contents of the enrollee's hospital record should include:

- enrollee information (name, sex, age, etc.);
- conditions or reasons for which care is provided;
- nature and extent of services provided;
- type of services ordered or recommended for the enrollee to be provided by another practitioner or facility;
- the dates of service provided and ordered.

The maintenance and furnishing of information relative to care included on a Medicaid claim is a basic condition for participation in the Program.

For auditing purposes, records on enrollees must be maintained and be available to authorized Medicaid officials for six years following the date of payment. Failure to conform to these requirements may affect payment and may jeopardize a provider's eligibility to continue as a Medicaid participant.

General Exclusions from Coverage Under Medicaid

In an effort to assure quality care and to contain costs under the Medicaid Program, certain restrictions have been placed on Medicaid payments to providers. As a general reference, the following list of medical care and services which do not qualify for payment is presented.

Payment will **not** be made for medical care and services:

- Which are medically unnecessary;
- Whose necessity is not evident from documentation in the enrollee's medical record;
- Which fail to meet existing standards of professional practice, are currently professionally unacceptable, or are investigational or experimental in nature;
- Which are rendered outside of the enrollee's period of eligibility;
- Which were not rendered, ordered, or referred by a restricted enrollee's primary care provider unless the service was provided in an emergency, was a methadone maintenance claim or a service provided in an inpatient setting;
- When the claim was initially received by the Department more than ninety days after the original date of service (refer to the [Information for All Providers, General Billing Manual](#) for exceptions);
- Which require prior approval or authorization, but for which such approval/authorization was not obtained or was denied;
- For which third parties (i.e., Medicare, Blue Cross/Blue Shield) are liable;
- Which are rendered out-of-state but which do not meet the qualifications outlined in the section [Out-of-State Medical Care and Services](#);
- Which are fraudulently claimed;
- Which represent abuse or overuse;

- Which are for cosmetic purposes and are provided only because of the enrollee's personal preference;
- Which are rendered in the absence of authorization from the MEVS in accordance with Utilization Threshold requirements. Exceptions to this policy include instances when a provider uses one of the Service Authorization Exception codes on the claim. Details are found in the **Billing Guidelines** section of each specific provider manual.
- Which have already been rejected or disallowed by Medicare when the rejection was based upon findings that the services or supplies provided:
 - Were not medically necessary;
 - Were fraudulently claimed;
 - Represented abuse or overuse;
 - Were inappropriate;
 - Were for cosmetic purposes; or
 - Were provided for personal comfort.
- Which are rendered after an enrollee has reached the Utilization Threshold established for a specific provider service type unless one of the following conditions is satisfied:
 - The enrollee has been exempted from the Utilization Threshold;
 - The enrollee has been granted an increase in the Utilization Threshold;
 - The provider certifies that the care, services or supplies were furnished pursuant to a medical emergency or when urgent medical care was necessary.

Unacceptable Practices

Examples of unacceptable practices include, but are not limited to, the following:

- Knowingly making a claim for an improper amount or for unfurnished, inappropriate or unnecessary care, services or supplies;
- Ordering or furnishing inappropriate, improper, unnecessary or excessive care, services or supplies;

- Billing for an item/service prior to being furnished;
- Practicing a profession fraudulently beyond its authorized scope, including the rendering of care, services or supplies while one's license to practice is suspended or revoked;
- Failing to maintain or make available for purposes of audit or investigation records necessary to fully disclose the extent of the care, services or supplies furnished;
- Submitting bills or accepting payment for care, services or supplies rendered by a person suspended or disqualified from practicing in the Medicaid Program;
- Soliciting, receiving, offering or agreeing to make any payment for the purpose of influencing a Medicaid enrollee to either utilize or refrain from utilizing any particular source of care, services or supplies;
- Knowingly demanding or collecting any compensation in addition to claims made under the Medicaid Program, except where permitted by law;
- Denying services to an enrollee based upon the enrollee's inability to pay a co-payment; and
- Failure to use the POS Terminal for verification, post and/or clear procedures when designated to do so.

Process for Resolving Unacceptable Practices

If the Department proposes to sanction a person, the DOH will advise that person, in writing, of the following:

- The unacceptable practice with which the person has been charged;
- The administrative action which is proposed (i.e., exclusion, or censure, and its statutory, regulatory or legal basis);
- The person's right to submit documentation or written arguments against the proposed agency action within 30 days from the date of the notice of proposed action.

Affiliated Persons

Whenever the Department sanctions a person, it may also sanction any affiliate of that person. Affiliated persons will be sanctioned on a case-by-case basis with due regard to all the relevant facts and circumstances leading to the original sanction.

Affiliated persons are those individuals having an overt, covert or conspiratorial relationship with another such that either of them may directly or indirectly control the other or such that they are under a common control.

Some examples of affiliated persons are the following:

- persons with an ownership or controlling interest in a provider;
- agents and managing employees of a provider;
- providers who share common managing employees;
- subcontractors with whom the provider has more than \$25,000 in annual business transactions.

Agency Action

If the Department determines to sanction a person, it will send a written notice of agency action advising the person of the final determination at least 20 days before the action becomes effective.

Suspension or Withholding of Payments

Upon notification to the person that he/she has engaged in an unacceptable practice, payment to that person may be withheld for current and subsequently received claims, or all payments may be suspended pending a resolution of the charges.

Hearings

A person has the right to a hearing to review a determination that he/she has engaged in an unacceptable practice. All requests for hearings must be in writing and must be made within sixty days of the date of the notice of agency action notifying the person of the unacceptable practice.

In the event that a person withdraws or abandons his/her request for a hearing, the hearing will be cancelled.

A request for a hearing will not defer any administrative action. All hearings will be conducted in accordance with the procedures contained in Part 519 of Title 18 of the Official Codes, Rules and Regulations of the State of New York which can be found by conducting a search online at:

<http://www.health.ny.gov/nysdoh/phforum/nycrr18.htm>.

Administrative Sanctions

When it is determined that a person has been engaged in unacceptable practices, the DOH may take one or more of the following sanctions:

- The person may be excluded from participation in the Medicaid Program. No payments will be made to a person who is excluded from the Medicaid Program for care, services or supplies rendered to enrollees as of the date of his/her exclusion;
- No payments will be made for any medical care, services or supplies ordered by a person who is excluded or suspended from the Medicaid Program;
- The person may be censured in writing with notification to the appropriate governmental licensing and/or regulatory agencies.

A sanction designed to monitor the Program activities of a person may be imposed against anyone who has been previously suspended from the Medicaid Program or as a precondition to a person's continued participation of the Program. Such sanctions include:

- Requiring, prior to payment, a review of any care, services or supplies rendered by the person; or
- Requiring prior approval for all care, services or supplies to be rendered by the person.

The DOH may also choose to impose fiscal sanctions against persons who engage in unacceptable practices. Examples of fiscal sanctions include:

- Restitution plus interest may be collected from a person who has received payment for care, services or supplies associated with an unacceptable practice; or
- Reduction in payment may be utilized when it is determined that the person has rendered care, services or supplies not included in the scope of the Program, or that the person has billed for more costly care, services or supplies that were actually provided; or
- Payment may be denied to a person who has engaged in an unacceptable practice.

Guidelines for Sanctions

In determining the sanction to be imposed, the following factors will be considered:

- The number and nature of the Program violations or other related offenses;
- The nature and extent of any adverse impact the violations have had on enrollees;
- The amount of damages to the Program;
- Mitigating circumstances;
- Other facts related to the nature and seriousness of the violations; and
- The previous record of the person under the Medicare Program, the Medicaid Program and other Social Services Programs.

Immediate Sanctions

In the following cases, a person may be immediately sanctioned on five (5) days notice:

- When a person or an affiliate is suspended from the Medicare Program the person will be suspended from the Medicaid Program for a period of time at least equal to the period of suspension from the Medicare Program;
- When a person has been convicted of any crime relating to the rendering of, or billing for medical care, services or supplies;
- When a person has been charged with a felony offense relating to the rendering of, or billing for medical care, services or supplies;
- When a person has been the subject of administrative, judicial proceeding finding the person to have committed unprofessional misconduct or an act which would constitute an unacceptable practice under the Medicaid Program; or
- When a person's further participation in the Medicaid Program will endanger the public health, or the health, safety or welfare of any enrollee.

A person sanctioned in these cases will not be entitled to an administrative hearing under the Department's regulations. However, within 30 days of being notified of any immediate sanction, a person may submit written material to challenge any mistake of fact or the appropriateness of a sanction.

Reinstatement

A person who is sanctioned may request reinstatement, or removal of any condition or limitation on participation in the Medicaid Program, at any time after the date or time period specified in the notice of agency action, or upon the occurrence of an event specified in the notice.

A request for reinstatement or removal of any condition on participation in the Program is made as an application for enrollment under Part 504 of the Department's regulations and must be denominated as a request for reinstatement to distinguish it from an original application.

The request for reinstatement must be sent to the Enrollment Processing Unit of the Department, and must:

- Include a complete ownership and control disclosure statement;
- State whether the person has been convicted of other offenses related to participation in the Medicare Program, the Medicaid Program or other Social Services Programs which were not considered during the development of the sanction; and
- State whether any State or local licensing authorities have taken any adverse action against the person for offenses related to participation in the Medicare Program, the Medicaid Program or other Social Services Programs which were not considered during the development of the sanction.

For a more extensive and precise definition of his/her rights and obligations, persons are referred to part 504, 515, 517, 518 and 519 of Title 18 of the New York Code of Rules and Regulations which are found by doing a search at:

<http://www.health.ny.gov/nysdoh/phforum/nycrr18.htm>.

Audits

The DOH is responsible for monitoring the Medicaid Program in New York State. This includes evaluating whether providers of medical care, services and supplies are in compliance with applicable State and Federal law and regulations.

The Department conducts audits of persons who submit claims for payment under the Medicaid Program, and the Department may seek recovery or restitution if payments were improperly claimed, regardless of whether unacceptable practices have occurred. The Department may either conduct an on-site field audit of a person's records or it may conduct an in-house review utilizing data processing procedures.

If overpayments are found, the Department will issue a draft audit report which will set forth any items to be disallowed and advise the person of the Department's proposed action. The person will then have 30 days to submit documents in response to the draft and/or object to any proposed action.

After considering the person's submittal, if any, the Department will issue a final audit report advising the person of the Department's final determination. The person may then request an administrative hearing to contest any adverse determination.

Recovery of Overpayments

When any person has submitted or caused to be submitted claims for medical care, services or supplies for which payment should not have been made, the Department may require repayment of the amount overpaid.

An overpayment includes any amount not authorized to be paid under the Medicaid Program, whether paid as the result of inaccurate or improper cost reporting, improper claiming, unacceptable practices, fraud, abuse or mistake.

Recoupment

Overpayments may be recovered by withholding all or part of a person's and an affiliate's payments otherwise payable, at the option of the Department.

Withholding of Payments

The Department may withhold payments in the absence of a final audit report when it has reliable information that a person is involved in fraud or willful misrepresentation involving claims submitted to the Program, has abused the Program or committed an unacceptable practice. Reliable information may consist of:

- Preliminary findings of unacceptable practices or significant overpayments;
- Information from a State professional licensing or certifying agency of an ongoing investigation of a person involving fraud, abuse, professional misconduct or unprofessional conduct; or
- Information from a State investigating or prosecutorial agency or other law enforcement agency of an ongoing investigation of a person for fraud or criminal conduct involving the Program.

Notice of the withholding will usually be given within five days of the withholding of payments. The notice will describe the reasons for the action, but need not include specific information concerning an ongoing investigation.

The withholding may continue as follows:

- If payments are withheld prior to issuance of a draft audit report or notice of proposed agency action, the withholding will not continue for more than 90 days unless a written draft report or notice of proposed agency action is sent to the provider.
 - Issuance of the draft report or notice of proposed agency action may extend the duration of the withholding until an amount reasonably calculated to satisfy the overpayment is withheld, pending a final determination on the matter.
- If payments are withheld after issuance of a draft report or notice of proposed agency action, the withholding will not continue for more than 90 days unless a written final audit report or notice of agency action is sent to the provider.
 - Issuance of the report or notice of agency action may extend the duration of the withholding until an amount reasonably calculated to satisfy the overpayment is withheld, pending a final determination on the matter.
- When initiated by another State agency or law enforcement organization, the withholding may continue until the agency or prosecuting authority determines that there is insufficient evidence to support an action against the person, or until the agency action or criminal proceedings are completed.

Fraud

Examples of fraud include when a person knowingly:

- makes a false statement or representation which enables any person to obtain medical assistance to which he/she is not entitled;
- presents for allowance of payment any false claim for furnishing services or merchandise;
- submits false information for the purpose of obtaining greater compensation than that to which he/she is legally entitled; or
- submits false information for the purpose of obtaining authorization for the provision of services or merchandise.

Office of the Medicaid Inspector General

The Office of the Medicaid Inspector General (OMIG) is an independent fraud-fighting entity within the Department of Health whose functions include:

- conducting and supervising activities to prevent, detect and investigate Medicaid fraud, waste and abuse and, to the greatest extent possible, coordinating such activities amongst:
 - the Offices of Mental Health, People With Developmental Disabilities, Alcoholism and Substance Abuse Services, Temporary Disability Assistance, and Children and Family Services;
 - the Department of Education;
 - the emedny fiscal agent employed to operate the Medicaid Management Information System;
 - the State Attorney General for Medicaid Fraud Control; and,
 - the State Comptroller;
- pursuing civil and administrative enforcement actions against those who engage in fraud, waste or abuse or other illegal or inappropriate acts perpetrated against the Medicaid Program;
- keeping the Governor and the heads of agencies with responsibility for the administration of the Medicaid Program apprised of efforts to prevent, detect, investigate, and prosecute fraud, waste and abuse within the Medicaid system;
- making information and evidence relating to potential criminal acts which we may obtain in carrying out our duties available to appropriate law enforcement and consulting with:
 - the New York State Deputy Attorney General for Medicaid Fraud Control;
 - federal prosecutors; and
 - local district attorneys to coordinate criminal investigations and prosecutions;
- receiving and investigating complaints of alleged failures of state and local officials to prevent, detect and prosecute fraud, waste and abuse; and
- performing any other functions that are necessary or appropriate to fulfill the duties and responsibilities of the office.

The OMIG also has broad subpoena powers:

- *ad testificandum* (a subpoena *ad testificandum* is a command to a named individual or corporation to appear at a specified time and place to give oral testimony under oath); and

- *duces tecum* (i.e., a writ or process of the same kind as the *subpoena ad testificandum*, including a clause requiring the witness to bring with him and produce to the court, books, papers, etc.).

The Medicaid Inspector General is headquartered in Albany with regional field offices in New York City, White Plains, Hauppauge, Syracuse, Rochester, and Buffalo.

For more information, please refer to the OMIG website:

www.omig.state.ny.us.

The OMIG website contains:

- An online complaint reporting mechanism;
- Current comprehensive listing of banned Medicaid providers;
- Significant news of OMIG initiatives and actions; and
- Useful links to State and federal resources in the Medicaid field.

Prohibition Against Reassignment of Claims: Factoring

The practice of [factoring](#) is prohibited by Federal Medicaid Regulations, which specify that no payment for any care or service provided to a Medicaid enrollee can be made to anyone other than the provider of the service.

Payment shall not be made to or through a factor either directly or by use of a power of attorney given by the provider to the factor.

Exceptions

Exceptions to the prohibition against the reassignment of Medicaid claims are allowed under the following circumstances:

- Direct payment for care or services provided to a Medicaid enrollee by physicians, dentists or other individual practitioners may be made to:
 - The employer (Article 28 facility, or other medical providers certified by State agencies) of the practitioner, if the practitioner is required to turn over fees to his/her employer as a condition of employment;
 - The facility in which the care or service was provided, if there is an arrangement whereby the facility submits the claim for other affiliated persons in its claim for reimbursement;

- A foundation, plan, or similar organization, including a health maintenance organization which furnishes health care through an organized health care delivery system, if there is a contractual arrangement between the organization and the practitioner furnishing the service under which the organization bills or receives payments on a basis other than a percentage of the Medicaid payments for such practitioner's services.
- Payments are allowed which result from an assignment made pursuant to a court order;
- Payments may be made to a government agency in accordance with an assignment against a provider;
- Payment may be made to a business agent, such as a billing service or accounting firm, that prepares statements and receives payments in the name of a provider, if the business agent's compensation for the service is:
 - Reasonably related to the cost of services;
 - Unrelated, directly or indirectly, to the dollar amounts billed and collected; and
 - Not dependent upon the actual collection of payment.

Services Subject to Co-Payments

The following services are subject to a co-payment:

- Clinic Visits (Hospital-Based and Free-Standing Article 28 Health Department-certified facilities) - \$3.00;
- Laboratory Tests performed by an independent clinical laboratory or any hospital-based/free-standing clinic laboratory - \$0.50 per procedure;
- X-rays performed in hospital clinics, free-standing clinics -\$1.00 per procedure;
- Medical Supplies including syringes, bandages, gloves, sterile irrigation solutions, incontinence pads, ostomy bags, heating pads, hearing aid batteries, nutritional supplements, etc. - \$1.00 per claim;
- Inpatient Hospital Stays (involving at least one overnight stay – is due upon discharge) - \$25.00;
- Emergency Room – for non-urgent or non-emergency services - \$3.00 per visit;

- Pharmacy Prescription Drugs - \$3.00 Brand Name, \$1.00 Generic;
- Non-Prescription (over-the-counter) Drugs - \$0.50.

There is no co-payment on private practicing physician services (including laboratory and/or X-ray services, home health services, personal care services or long term home health care services).

Co-payment Maximum

The annual co-payment maximum per enrollee per state fiscal year (April 1 through March 31) is \$200.

Co-payment Exemptions

The following are exempt from all Medicaid co-payments:

- Enrollees younger than 21 years old.
- Enrollees who are pregnant.
 - Pregnant women are exempt during pregnancy and for the two months after the month in which the pregnancy ends.
- Family planning (birth control) services.
 - This includes family planning drugs or supplies like birth control pills and condoms.
- Residents of an Adult Care Facility licensed by the New York State Department of Health (**for pharmacy services only**).
- Residents of a Nursing Home.
 - Residents of an Intermediate Care Facility for the Developmentally Disabled (ICF/DD).
- Residents of an Office of Mental Health (OMH) or Office for People With Developmental Disabilities (OPWDD) certified Community Residence.
- Enrollees in a Comprehensive Medicaid Case Management (CMCM) or Service Coordination Program.
 - Enrollees in an OMH or OPWDD Home and Community Based Services (HCBS) Waiver Program.

- Enrollees in a Department of Health HCBS Waiver Program for Persons with Traumatic Brain Injury (TBI).
- Enrollees in a Care plan.

Enrollees who are eligible for both Medicare and Medicaid and/or receive Supplemental Security Income (SSI) payments *are not exempt* from Medicaid co-payments, unless they also fall into one of the groups listed above. Enrollees cannot be denied care and services because of their inability to pay the co-payment amount.

The potential provider of a service will be required to access the MEVS to enter the applicable co-payment amount, if any is due for the service being provided. When accessing the MEVS, the provider will be given information as to the enrollee's exemption status for co-payments. Specific instructions on the MEVS information obtained by the provider may be found in the MEVS manual.

Section III – Ordering Non-Emergency Medical Transportation

A request for prior authorization of non-emergency medical transportation must be supported by the order of a practitioner who is the Medicaid enrollee's:

- Attending physician;
- Physician's assistant;
- Nurse practitioner;
- Dentist;
- Optometrist;
- Podiatrist; or
- Other type of medical practitioner designated by the district and approved by the Department.

Any ordering practitioner who requests transportation which is deemed to not meet the rules of this section, may be sanctioned according to the regulations established by the Department of Health at Title 18 §515.3, available online at:

<http://www.health.ny.gov/nysdoh/phforum/nycrr18.htm>.

Responsibilities of the Ordering Practitioner

Ordering practitioners are responsible for ordering only necessary transportation at the most **medically appropriate** level. A basic consideration for this should be the enrollee's current level of mobility and functional independence.

The transportation ordered should be the least specialized mode required based upon the enrollee's *current* medical condition. For example, if the orderer feels the enrollee does not require personal assistance, but cannot walk to public transportation, then livery service should be requested.

Enrollees who have reasonable access to a mode of transportation used for the normal activities of daily living; such as shopping and recreational events; are expected to use this mode to travel to and from medical appointments when that mode is available to them. For most residents of New York City, this mode is usually mass transit.

Medicaid may restrict payment for transportation if it is determined that:

- the enrollee chose to go to a medical provider outside the CMMA when services were available within the CMMA;
- the enrollee could have taken a less expensive form of transportation but opted to take the more costly transportation.

In either case above, if the enrollee can demonstrate circumstances justifying payment, then reimbursement can be *considered*.

Non-emergency Ambulance

Generally, ambulance service is requested when a Medicaid enrollee needs to be transported in a recumbent position or is in need of medical supervision while en route to their medical appointments.

A request for prior authorization of non-emergency ambulance services must be supported by the order of a practitioner who is the Medicaid enrollee's:

- Attending physician;
- Physician's assistant; or
- Nurse practitioner.

Ambulette

Ambulette service is door-to-door; from the enrollee's home through the door at the building where the medical appointment is to take place. [Personal assistance](#) by the staff of the ambulette company is required by the Medicaid Program in order to bill the Program for the provision of ambulette service.

If personal assistance is not necessary and/or not provided, then [livery service](#) should be ordered.

Ambulettes may also provide taxi (curb-to-curb) service and will transport livery-eligible enrollees in the same vehicle as ambulette-eligible enrollees. The Medicaid Program does not require the ambulette service to be licensed as a taxi service; but the ambulette must maintain the proper authority and license required to operate as an ambulette.

A request for prior authorization of ambulette transportation must be supported by the order of a practitioner who is the Medicaid enrollee's:

- Attending physician;
- Physician's assistant;
- Nurse practitioner;
- Dentist;
- Optometrist;
- Podiatrist; or
- Other type of medical practitioner designated by the district and approved by the Department.

Ambulette transportation may be ordered if any of the following conditions is present:

- The Medicaid enrollee needs to be transported in a recumbent position, needs no medical treatment en route to his or her appointment, and the ambulette service is able to accommodate a stretcher;
- The Medicaid enrollee is wheelchair-bound and is unable to use a taxi, livery service, public transportation or a private vehicle;
- The Medicaid enrollee has a disabling physical condition which requires the use of a walker or crutches and is unable to use a taxi, livery service, public transportation or a private vehicle;
- An otherwise ambulatory Medicaid enrollee requires radiation therapy, chemotherapy, or dialysis treatments which result in a disabling physical condition after treatment, making the enrollee unable to access transportation without [personal assistance](#) provided by an ambulette service;
- The Medicaid enrollee has a disabling physical condition other than one described above or a disabling mental condition requiring personal assistance provided by an ambulette services; and,
- The ordering practitioner certifies in a manner designated by and submitted to the Department that the Medicaid enrollee cannot be transported by taxi, livery service, bus or private vehicle and there is a need for ambulette service.

The ordering practitioner must note in the patient's record the condition which qualifies the use of ambulette services.

Livery Transportation

A request for prior authorization for transportation by New York City livery services must be supported by the order of a practitioner who is the Medicaid enrollee's:

- Attending physician;
- Physician's assistant;
- Nurse practitioner;
- Dentist;
- Optometrist;
- Podiatrist; or
- Other type of medical practitioner designated by the district and approved by the Department.

Day Treatment Transportation

Day treatment/day program transportation is unique in that this transportation can be provided by an ambulance, ambulette or livery provider. The difference is that a typical transport involves a group of individuals traveling to and from the same site, at the same time, on a daily or regular basis.

The economies of this group ride transport are reflected in a different reimbursement amount than that reimbursed for an episodic medical appointment.

Providers of transportation to day treatment/day program must adhere to the same requirements for their specific provider category.

Required Documentation

In cases where an ordering practitioner believes that a Medicaid enrollee should use a particular form of non-emergency transportation, Medicaid guidelines at Title 18 NYCRR Section 505.10 (c)(4) indicate that:

“The ordering practitioner must note in the [enrollee’s] patient record the condition which justifies the practitioner’s ordering of ambulette or non-emergency ambulance services.”

Making the Request for Authorization

Requests for medical transportation require the authorization of the local department of social services (DSS).

New York City practitioners should refer to the [Prior Authorization Guidelines](#) manual titled City of New York Transportation Ordering Guidelines, which is available online at:

<http://www.emedny.org/ProviderManuals/Transportation/index.html>.

Section IV - Family Planning Services

All Medicaid-eligible persons of childbearing age who desire family planning services, without regard to marital status or parenthood, are eligible for such services *with the exception of sterilization*.

Family planning services, including the dispensing of both prescription and non-prescription contraceptives but **excluding sterilization**, may be given to minors who wish them without parental consent.

Medicaid-eligible minors seeking family planning services may not have a Medicaid ID Card in their possession. To verify eligibility, the physician or his/her staff should obtain birth date, sex, social security number, or as much of this information as possible, before contacting the Department at:

(518) 472-1550.

*If sufficient information is provided,
Department staff will verify the eligibility of the individual for Medicaid.*

Medicaid patients enrolled in managed care plans (identified on MEVS as "PCP"), may obtain HIV blood testing and pre- and post-test counseling when performed as a family planning encounter from the managed care plan or from any appropriate Medicaid-enrolled provider without a referral from the managed care plan.

Services provided for HIV treatment may only be obtained from the managed care plan. HIV testing and counseling not performed as a family planning encounter may only be obtained from the managed care plan.

Patient Rights

Patients are to be kept free of coercion or mental pressure to use family planning services and are free to choose their medical provider of services and the method of family planning to be used.

Standards for Providers

Family planning services can be provided by a licensed private physician, nurse practitioner, clinic, or hospital, which complies with all applicable provisions of law.

In addition, services are available through designated Family Planning Service Programs, which meet specific DOH requirements for such Programs.

Sterilizations

Medical family planning services include sterilizations. Sterilization is defined as any medical procedure, treatment or operation for the purpose of rendering an individual permanently incapable of reproducing.

The physician who performs the sterilization must discuss the information below with the patient shortly before the procedure, usually during the pre-operative examination:

Informed Consent

The person who obtains consent for the sterilization procedure must offer to answer any questions the individual may have concerning the procedure, provide a copy of the [Medicaid Sterilization Consent Form \(DSS-3134\)](#) and **provide verbally all of the following information or advice to the individual to be sterilized:**

- Advice that the individual is free to withhold or withdraw consent to the procedure at any time before the sterilization without affecting the right to future care or treatment and without loss or withdrawal of any federally-funded program benefits to which the individual might be otherwise entitled;
- A description of available alternative methods of family planning and birth control;
- Advice that the sterilization procedure is considered to be irreversible;
- A thorough explanation of the specific sterilization procedure to be performed;
- A full description of the discomforts and risks that may accompany or follow the performance of the procedure, including an explanation of the type and possible effects of any anesthetic to be used;
- A full description of the benefits or advantages that may be expected as a result of the sterilization;
- Advice that the sterilization will not be performed for at least 30 days except under the circumstances specified below under "Waiver of the 30-Day Waiting Period."

Waiting Period

The enrollee to be sterilized must have voluntarily given informed consent not less than 30 days nor more than 180 days prior to sterilization.

When computing the number of days in the waiting period, the day the enrollee signs the form is not to be included.

Waiver of the 30-Day Waiting Period

The only exceptions to the 30-day waiting period are in the cases of:

- premature delivery when the sterilization was scheduled for the expected delivery date, or
- emergency abdominal surgery.

In both cases, informed consent must have been given at least 30 days before the intended date of sterilization.

Since premature delivery and emergency abdominal surgery are unexpected but necessary medical procedures, sterilizations may be performed during the same hospitalization, as long as 72 hours have passed between the original signing of the informed consent and the sterilization procedure.

Minimum Age

The enrollee to be sterilized must be at least 21 years old at the time of giving voluntary, informed consent to sterilization.

Mental Competence

The patient must be a mentally competent individual.

Institutionalized Individual

The patient to be sterilized must not be an institutionalized individual.

Restrictions on Circumstances in Which Consent is Obtained

Informed consent may not be obtained while the patient to be sterilized is:

- in labor or childbirth;
- seeking to obtain or obtaining an abortion; or
- under the influence of alcohol or other substances that affect the patient's state of awareness.

Foreign Languages

An interpreter must be provided if the patient to be sterilized does not understand the language used on the consent form or the language used by the person obtaining informed consent.

Handicapped Persons

Suitable arrangements must be made to insure that the sterilization consent information is effectively communicated to deaf, blind or otherwise handicapped individuals.

Presence of Witness

The presence of a witness is optional when informed consent is obtained, except in New York City when the presence of a witness of the patient's choice is mandated by New York City Local Law No. 37 of 1977.

Reaffirmation Statement (NYC Only)

A statement signed by the patient upon admission for sterilization, again acknowledging the consequences of sterilization and his/her desire to be sterilized, is mandatory within the jurisdiction of New York City.

Sterilization Consent Form

A copy of the *NYS Sterilization Consent Form (DSS-3134)* must be given to the patient to be sterilized and completed copies must be submitted with all surgeon, anesthesiologist and facility claims for sterilizations.

Hospitals and Article 28 clinics submitting claims electronically must maintain a copy of the completed *DSS-3134* in their files. This form, in English and in Spanish, is available online at:

[http://www.health.ny.gov/health_care/medicaid/publications/ldssforms.](http://www.health.ny.gov/health_care/medicaid/publications/ldssforms)

New York City

New York City Local Law No. 37 of 1977 establishes guidelines to insure informed consent for sterilizations performed in New York City. Since the Medicaid Program will not pay for services rendered illegally, conformance to the New York City Sterilization Guidelines is a prerequisite for payment of claims associated with sterilization procedures performed in New York City.

Any questions relating to New York City Local Law No. 37 of 1977 should be directed to the following office:

**Maternal, Infant & Reproductive Health Program
New York City Department of Health
125 Worth Street
New York, NY 10013
(212) 442-1740.**

Hysterectomies

Federal regulations prohibit Medicaid reimbursement for hysterectomies which are performed solely for the purpose of rendering the patient incapable of reproducing; or, if there was more than one purpose to the procedure, it would not have been performed but for the purpose of rendering the individual permanently incapable of reproducing.

Any other hysterectomies are covered by Medicaid if the patient is informed verbally and in writing prior to surgery that the hysterectomy will make her permanently incapable of reproducing.

The patient or her representative must sign *Part I of the Acknowledgement of Receipt of Hysterectomy Information Form (DSS-3113)*. The requirement for the patient's signature on Part I of Form DSS-3113 can be waived if:

1. The woman was sterile prior to the hysterectomy;
2. The hysterectomy was performed in a life-threatening emergency in which prior acknowledgement was not possible. For Medicaid payment to be made in these two cases, the surgeon who performs the hysterectomy must certify in writing that one of the conditions existed and state the cause of sterility or nature of the emergency. For example, a surgeon may note that the woman was postmenopausal or that she was admitted to the hospital through the emergency room, needed medical attention immediately and was unable to respond to the information concerning the acknowledgement agreement;
3. The woman was not a Medicaid enrollee at the time the hysterectomy was performed but subsequently applied for Medicaid and was determined to qualify for Medicaid payment of medical bills incurred before her application. For these cases involving retroactive eligibility, payment may be made if the surgeon certifies in writing that the woman was informed before the operation that the hysterectomy would make her permanently incapable of reproducing or that one of the conditions noted above in "1" or "2" was met.

The DSS-3113 documents the receipt of hysterectomy information by the patient or the surgeon's certification of reasons for waiver of that acknowledgement. It also contains

the surgeon's statement that the hysterectomy was not performed for the purpose of sterilization.

All surgeons, hospitals, clinics and anesthesiologists must submit a copy of the fully completed DSS-3113 when billing for a hysterectomy. Hospitals and Article 28 clinics submitting claims electronically, must maintain a copy of the completed DSS-3113 in their files. This form, in English and in Spanish, is available online at:

http://www.health.ny.gov/health_care/medicaid/publications/ldssforms.

Induced Termination of Pregnancy

Performance of induced terminations of pregnancy must conform to all applicable requirements set forth in regulations of the DOH. Except in cases of medical or surgical emergencies, no pregnancy may be terminated in an emergency room.

The NYS Medicaid Program covers abortions which have been determined to be medically necessary by the attending physician. The doctor makes the determination of medical necessity and so indicates on the claim form.

Although Medicaid covers only medically necessary abortions, payment is made for both medically necessary and elective abortions provided to NYC enrollees. Payment for elective abortions is funded with 100% New York City funds.

Obstetrical Services

Obstetrical care includes prenatal care in a physician's office or dispensary, delivery in the home or hospital, postpartum care and, in addition, care for any complications that arise in the course of pregnancy and/or the puerperium. The following standards and guidelines are considered to be part of normal obstetrical care:

Antepartum Care

Under normal circumstances the physician should see the patient every 4 weeks for the first 28 weeks of pregnancy, then every 2 weeks until the 36th week and weekly thereafter, when this is feasible.

As part of complete antepartum care, provision of the following laboratory and other diagnostic procedures is encouraged:

- Papanicolaou smear,
- complete blood count,

- complete urine analysis,
- serologic examination for syphilis and hepatitis,
- chest X-ray with proper shielding of the abdomen, and
- blood grouping and Rh determination with serial antibody titers, where indicated.

Intrapartum Care

Whenever possible, delivery should be performed in a hospital. In addition to these standards, the routine attendance of a qualified anesthesiologist at the time of delivery is recommended as an important preventive measure in promoting optimum medical care for both mother and infant.

Postpartum Care

Upon discharge from the hospital, the patient should be seen for a postpartum physical exam at 3 to 6 weeks and again in 3 to 6 months.

A Papanicolaou smear should be obtained during the postpartum period at one of the visits.

Other Medical Care

Consultation with specialists in other branches of medicine should be freely sought without delay when the condition of the patient requires such care.

Section V – Related Programs

Child/Teen Health Program

New York State's Medicaid Program (Child Health Plus A) implements federal EPSDT requirements via the Child/Teen Health Program (CTHP). The CTHP care standards and periodicity schedule are provided by the Department of Health, and generally follow the recommendations of the Committee on Standards of Child Health, American Academy of Pediatrics.

New York State's CTHP promotes early and periodic screening, diagnosis and treatment aimed at addressing any health or mental health problems identified during exams. The CTHP includes a full range of comprehensive, primary health care services for Medicaid-eligible youth from birth until age 21.

Many categories of providers directly render or contract for primary health care services for Medicaid-eligible youth services by the CTHP. For example:

- Physicians;
- Nurse Practitioners;
- Clinics;
- Hospitals;
- Nursing Homes;
- Office of Mental Health Licensed Residential Treatment Facilities;
- Office for People With Developmental Disabilities, Licensed Intermediate Care Facilities for the Developmentally Disabled;
- Office of Children and Family Services Authorized Child (Foster) Care Agencies;
- Medicaid Managed Care Organizations; and
- Medicaid-enrolled School-Based Health Centers.

New York State's EPSDT/CTHP Provider Manual for Child Health Plus A (Medicaid) also emphasizes recommendations of *Bright Futures* in order to guide provider practice, and improve health and mental health outcomes for Medicaid-eligible youth. The [EPSDT/CTHP Provider Manual for Child Health Plus A \(Medicaid\)](#) is available online at:

<http://www.emedny.org/ProviderManuals/EPsDTCTHP/index.html>.

Preferred Physicians and Children Program

The Preferred Physicians and Children (PPAC) program is an important part of the State's effort to assure children access to quality medical care through the Medicaid Program. The PPAC program:

- Encourages the participation of qualified practitioners;
- Increases children's access to comprehensive primary care and to other specialist physician services; and,
- Promotes the coordination of medical care between the primary care physician and other physician specialists.

Application for the Preferred Physicians and Children Program

PPAC provider enrollment applications may be obtained online at:

<http://www.emedny.org/info/ProviderEnrollment/index.html>.

PPAC Procedure Codes are in the Procedure Code and Fee Schedule Section of this manual, available at:

<http://www.emedny.org/ProviderManuals/Physician/index.html>.

Physician Eligibility and Practice Requirements

The qualified primary care physician will:

- Have an active hospital admitting privilege at an accredited hospital.

This requirement may be waived for the physician who qualifies for hospital admitting privilege but does not have one due to such reason as the unavailability of admitting privilege at area hospitals; or nearest hospital too distant from office to be practical.

Such physician will submit *each of the following* at the time of application:

- ▶ a description of the circumstance that merits consideration of waiver of this requirement,
- ▶ evidence of an agreement between the applicant and a primary care physician who is licensed to practice in New York, has an active hospital

admitting privilege and will monitor and provide continuity of care to the applicant's patients who are hospitalized; and

- ▶ a curriculum vitae; proof of medical malpractice insurance; and two letters of reference, each from a physician who can attest to the applicant's qualifications as a practicing physician.
- Be board certified (or board admissible for a period of no more than five years from completion of a post graduate training program) in family practice, internal medicine, obstetrics and gynecology, or pediatrics.

The physician who participates in the PPAC program and is board admissible must re-qualify when board admissibility reaches five years.

- Provide 24-hour telephone coverage for consultation.

This will be accomplished by having an after-hours phone number with an on-call physician, nurse practitioner or physician's assistant to respond to patients.

This requirement cannot be met by a recording which refers patients to emergency rooms.

- Provide medical care coordination.

Medical care coordination will include at a minimum: the scheduling of elective hospital admissions, assistance with emergency admissions; management of and/or participation in hospital care and discharge planning, scheduling of referral appointments with written referral as necessary and with request for follow-up report, and scheduling for necessary ancillary services.

- Agree to provide periodic health assessment examination in accordance with the Child/Teen Health program (CTHP) standards of Medicaid.
- Be a provider in good standing if enrolled in the Medicaid Program at time of application to PPAC.
- Sign an agreement with the Medicaid Program, such agreement to be subject to cancellation with 30-day notice by either party.

The qualified non-primary care specialist physician will:

- Have an active hospital admitting privilege at an accredited hospital;

This requirement may be waived for the physician who qualifies for hospital admitting privilege but does not have one because the practice of his/her specialty does not support need for admitting privilege.

Such physician will submit at the time of application, (a) a description of the circumstance that merits consideration of waiver of this requirement, and (b) where applicable, **EITHER** a copy of a letter of active hospital appointment other than admitting **OR** evidence of an agreement between the applicant and a primary care physician who is licensed to practice in New York, has an active hospital admitting privilege and will monitor and provide continuity of care to the applicant's patients who are hospitalized; and (c) a curriculum vitae; proof of medical malpractice insurance; and two letters of reference, each from a physician who can attest to the applicant's qualifications as a practicing physician.

- Be board certified (or board admissible for a period of not more than five years from completion of a post graduate training program) in a specialty recognized by the DOH;

The physician who participates in PPAC and is board admissible must requalify when board admissibility reaches five years.

- Provide consultation summary or appropriate periodic progress notes to the primary care physician on a timely basis following a referral or routinely scheduled consultant visit;
- Notify the primary care physician when scheduling hospital admission;
- Be a provider in good standing if enrolled in the Medicaid Program at time of application to PPAC;
- Sign an agreement with the Medicaid Program, such agreement to be subject to cancellation with 30-day notice by either party.

Covered Services

For the PPAC participating provider the visit/examination is the only service claimed and reimbursed through PPAC. Claiming is specific to place of service, such as office.

The PPAC participating provider may NOT bill for:

- physician services provided in Article 28 clinics or
- contractual physician services in emergency rooms.

Claims for physician services other than the visit/examination will continue to be claimed and reimbursed in accordance with the instructions outlined in this Manual.

Physically Handicapped Children's Program

The Physically Handicapped Children's Program (PHCP) is a Federal Grant Program under the Social Security Act established to aid states in the provision of medical services for the treatment and rehabilitation of physically handicapped children. Administration of the Program is supervised by Department of Health.

On the local level, county health commissioners, county directors of PHCP, or the New York City Health Department's Bureau of Handicapped Children have responsibility for the Program. Providers will deal primarily with designated local officials.

Services Available and Conditions Covered

Medical services available under PHCP include diagnostic, therapeutic, and rehabilitative care by medical and paramedical personnel. Necessary hospital and related care, drugs, prosthesis, appliances, and equipment are also available under the Program.

This Program includes care for 125 categories of handicapping conditions. Care is available not only for defects and disabilities of the musculo-skeletal system, but also:

- cardiac defects,
- hearing loss,
- hydrocephalus,
- convulsive disorders,
- dento-facial abnormalities, and
- many other conditions.

Treatment for long-term diseases, i.e., cystic fibrosis, muscular dystrophy, rheumatic heart disease, which are likely to result in a handicap in the absence of treatment, is also available.

For more detailed information on covered services, the provider should contact the county health department or the local PHCP office.

Eligibility

To participate in the PHCP, a child must first be determined medically-eligible, i.e., having one of the defects or disabilities referred to above.

A child under age 21 who, in a physician's professional judgment, may be eligible for the PHCP should be referred to the local medical rehabilitation officer, the county

commissioner of health, the local PHCP medical director, or the Bureau of Handicapped Children (New York City) for a determination of the child's eligibility for the Program.

Financing

A great number of PHCP cases will be financed by Medicaid. If the family of a medically-eligible child is not currently covered by Medicaid, the family will be referred by PHCP officials to the LDSS for a determination of Medicaid eligibility.

If the child is determined eligible for Medicaid, payment for services for the child will be paid with Medicaid funds. If the child is determined ineligible for Medicaid, payment for services will be paid by the PHCP and/or the child's family.

Reimbursement for services rendered to PHCP participants (either from Medicaid or PHCP funds) will not exceed the fees and rates established by the Department of Health.

Prior Approval

Prior approval is required for treatment of medical and dental conditions under the Program. Such approval is to assure that:

- The clinical conditions come under the Program;
- The physician or dentist meets the required program qualifications;
- The institution, if necessary, has been specifically approved for the service required.

Prior approval must be obtained from the county health officer or PHCP medical director. Requests for prior approval should be initiated by the attending physician by submission of an appropriate form which may be obtained from city, county, or district health offices, or the Fiscal Agent.

Prior approval for treatment will be granted only for a specified period of time. Generally, Medicaid reimbursement will only be available for treatment rendered during that approved period of time. Reimbursement, however, will continue to be made should the child's Medicaid coverage be terminated during the treatment period. In such an instance, payment will only be made for the prior-approved treatment and will be discontinued upon completion of that treatment.

In an emergency, care may be provided without prior approval. *However, the county health officer or PHCP medical director must be promptly notified of such care.*

Family Care Program

The Family Care Program of the New York State Office of Mental Health/Office for People With Developmental Disabilities (OMH/OPWDD) provides supervised residence in the community for inpatients of psychiatric or developmental centers who have responded to treatment and other persons who, though unable to function adequately in their own homes, do not require inpatient care. Individuals who have been determined able to live in the community may be placed in certified family care homes.

Each family care home must possess an OMH or an OPWDD operating certificate. Those who operate family care homes provide room and board, some non-emergency transportation, and basic support services to their residence. The OMH/OPWDD facility making the placement exercises administrative control over the family care home.

Since the emphasis of the Family Care Program is on integration into the community, the use of private practitioners is encouraged for medical care. Enrollees who have been placed in an approved family care home are eligible for the full range of services covered by Medicaid, except when OMH family-care residents require acute psychiatric hospitalization. These enrollees must return to their psychiatric centers.

State regulations also require annual medical, dental and psychiatric or psychological examinations for all family-care residents, which may be provided by practitioners in the community.

The same prior approval requirements in addition to any other Program restrictions that apply when services are provided to other Medicaid enrollees, also apply in cases involving family care residents.

Individuals in the Family Care Program must be determined Medicaid-eligible by the Department of Health in conjunction with the OMH/OPWDD. Residents determined eligible for Medicaid are issued a permanent plastic CBIC.

Family Planning Benefit Program

This program provides Medicaid coverage for family planning services to all persons of childbearing age with incomes at or below 200% of the federal poverty level. This population will have access to all enrolled Medicaid family planning providers and family planning services currently available under Medicaid.

Family planning services under this program can be provided by all Medicaid enrolled family planning providers including physicians and nurse practitioners. Covered family planning services include:

- All FDA-approved birth control methods, devices, pharmaceuticals, and supplies;
- Emergency contraceptive services and follow-up;
- Male and female [sterilization](#) in accordance with [18 NYCRR Section 505.13\(e\)](#); and
- Preconception counseling and preventive screening and family planning options.

The following additional services are considered family planning only when provided during a family planning visit and when the service provided is directly related to family planning:

- Pregnancy testing and counseling;
- Counseling services related to pregnancy and informed consent, and STD/HIV risk counseling;
- Comprehensive reproductive health history and physical examination, including clinical breast exam (excluding mammography);
- Screening for STDs, cervical cancer, and genito-urinary infections;
- Screening and related diagnostic testing for conditions impacting contraceptive choice, i.e. glycosuria, proteinuria, hypertension, etc.;
- HIV counseling and testing;
- Laboratory tests to determine eligibility for contraceptive of choice; and
- Referral for primary care services as indicated.

For more information on the FPBP, please call the Bureau of Policy Development and Coverage at (518) 473-2160.

Prenatal Care Assistance Program

Prenatal Care Assistance Program (PCAP) is a comprehensive prenatal program administered by the DOH that offers complete pregnancy care and other health services to women and teens who live in New York State and meet certain income guidelines. PCAP offers:

- routine pregnancy check-ups,
- hospital care during pregnancy and delivery,

- full Medicaid coverage for the woman until at least two months after delivery, and
- full Medicaid coverage for the baby up to one year of age.

Providers interested in this Program may go online to:

www.health.ny.gov/nysdoh/perinatal/en/perinatalintro.htm

or

<http://www.emedny.org/ProviderManuals/Prenatal/index.html>.

Medicaid Obstetrical and Maternal Services Program

Obstetricians, family physicians, nurse midwives and nurse practitioners who meet certain criteria may enroll in the Medicaid Obstetrical and Maternal Service (MOMS) program and receive increased fees for obstetrical care.

Practitioners participating in the MOMS program are required to refer Medicaid-eligible pregnant women for non-medical health supportive services such as:

- nutrition and psychosocial assessment and counseling,
- health education, and
- care coordination.

Health supportive services are provided by approved agencies such as county health departments, certified home health agencies and Prenatal Care Assistance Programs (PCAP).

The interested physician, midwife or nurse practitioner may apply to participate in the MOMS program by completing the following two forms, which must be submitted together:

- the “Application for Enrollment as a Medical (or Dental) Specialist” **and**
- the MOMS Addendum.

For additional information regarding the MOMS and Health Supportive Services programs, please call the Department at:

(518) 474-1911.

MOMS Eligibility and Practice Requirements

Physicians who participate must:

- be board certified or an active candidate for board certification by the American College of Obstetrics and Gynecologists (ACOG) or eligible for board certification by the American Academy of Family Practice Physicians for a period of no more than five years from completion of a post-graduate training period in obstetrics and gynecology or family practice;
- have active hospital-admitting privileges in an appropriately accredited hospital which includes maternity services;
- provide medical care in accordance with the practice guidelines established by the ACOG;
- have 24-hour telephone coverage;
- have an agreement with an approved health supportive service provider to provide non-medical health supportive services such as health education, nutrition, and psychosocial assessment and counseling, case management, presumptive eligibility, and acting as an authorized representative for the Medicaid application;
- provide medical care coordination and agree to participate in managed care programs if the managed care programs are operational within the physician's geographic practice area;
- be a provider in good standing;
- sign an agreement with the Medicaid program, such agreement to be subject to cancellation with 30-day notice by either party.

For physician enrollment information, please go online to:

<http://www.emedny.org/info/ProviderEnrollment/index.html>.

For additional information, please go to:

www.health.ny.gov/nysdoh/perinatal/en/perinatalintro.htm.

Utilization Threshold Program

The Utilization Threshold Program (UT) is a post payment review of services and procedures provided to members that evaluates medical necessity while maintaining fiscal responsibility to the Medicaid Program. The UT Program monitors services during the benefit year, evaluating provider patterns and trends that are not supported

by medical documentation. A benefit year is the 12-month period which begins the month the member became Medicaid eligible.

Thresholds are assigned for the following services:

- Physician/Clinic Visits
- Laboratory Procedures
- Pharmacy
- Mental Health Clinic Visits
- Dental Clinic Visits

Service limits are established based on clinical information for the average member. Post payment review takes into consideration individual member's diagnoses, medical services and procedures, prescription drugs, age, and gender in determining if additional medical justification is required from providers to support utilization of care and services delivered to the member.

Documentation is evaluated by Medicaid medical staff for trends and patterns and may be referred to the Department's Provider on Review Unit or the NYS Office of the Medicaid Inspector General for further investigation.

As of July 1, 2022, providers will no longer be required to submit Threshold Override forms for exceeding limits and near limit letters will no longer be sent to members or providers. All claims will be paid and tracked during the post payment review.

Recipient Restriction Program

The Recipient Restriction Program (RRP) is an administrative mechanism whereby selected Medicaid enrollees with a demonstrated pattern of abusive utilization of Medicaid services must receive their medical care from a designated primary provider(s). The goals of the RRP are the elimination of abusive utilization behavior and the promotion of quality care for restricted enrollees through coordination of the delivery of select medical services.

The DOH and LDSS may restrict enrollees to the following provider types:

- Physicians
- Clinics
- Pharmacies
- Inpatient hospitals
- Podiatrists
- Dentists
- Durable Medical Equipment providers
- Dental Clinic
- Physician Group
- Nurse Practitioners

These restrictions may be imposed individually or in conjunction with one another. To promote coordinated medical care, the RRP prohibits restricted enrollees from obtaining certain ancillary services such as laboratory and transportation ordered by non-primary providers.

Billing information relating to the RRP is located in the **Billing Guidelines** of each specific provider manual.

MEVS Implications for the RRP

It is important for all providers to properly access the MEVS to ensure that the enrollee is eligible and to:

- Avoid rendering services to a patient who is restricted to another provider; and/or
- Ensure that ordered services are provided at the request of a restricted enrollee's primary provider or a provider to whom the enrollee was referred by his/her primary provider.

For instructions on MEVS transactions, please refer to the MEVS Provider Manual online at:

<http://www.emedny.org/ProviderManuals/index.html>.

Managed Care

Managed Care is a comprehensive and coordinated system of medical and health care service delivery encompassing ancillary services, as well as acute inpatient care. The Managed Care Organization (MCO) is responsible for assuring that enrollees have access to a comprehensive range of preventative, primary and specialty services. The MCO may provide services directly or through a network of providers. The MCO receives a monthly premium for each enrollee to provide these services.

In a MCO, each Medicaid enrollee is linked to a primary care practitioner. This provider may be a private practicing physician, on staff in a community health center or outpatient department, or may be a nurse practitioner. Regardless of the setting, the primary care provider is the focal point of the Managed Care system. This practitioner is responsible for the delivery of primary care, and also coordinates and case manages most other necessary services. Another feature of managed care is 24-hour, 7-day/week access to care.

A Medicaid enrollee enrolled with a MCO remains eligible for the full range of medical services available in the Medicaid Program. However, an enrolled enrollee is required to access most health care services through his/her MCO. When an enrollee is

determined Medicaid-eligible, he/she has the opportunity to enroll with a MCO, but not all enrollees will be enrolled in a MCO.

Certain individuals are excluded from participating on Medicaid Managed Care:

- Individuals who “spend down” to obtain Medicaid eligibility;
- Foster care children whom the fiscally responsible LDSS has placed under the auspices of a voluntary child (foster) care agency;
- Medicare/Medicaid dual eligibles;
- Residents of State-operated inpatient psychiatric facilities;
- Residents of residential treatment facilities for children and youth;
- Enrollees of Mental Health Family Care services;
- Residents of residential health care facilities at the time of enrollment;
- Participants in a long term care capitation demonstration project;
- Infants of incarcerated mothers;
- Participants in the Long Term Home Health Care Program;
- Certified blind or disabled children who are living apart from their parents over 30 days;
- Individuals expected to be eligible for Medicaid less than 6 months;
- Individuals receiving hospice services;
- Individuals receiving services from a Certified Home Health Agency when it has been determined that they are not suitable for managed care enrollment;
- Individuals enrolled in the Restricted Enrollee Program with a primary physician, clinic, dental, DME, or inpatient provider;
- Enrollees who have other third party insurance so that managed care enrollment is not cost-effective.

MEVS Implications for Managed Care

Provider must check the MEVS prior to rendering services to determine the enrollee’s Medicaid eligibility and the conditions of Medicaid coverage. If the Medicaid enrollee is enrolled with a MCO, the first MEVS coverage message will indicate, “Eligible PCP”.

Note: PCP stands for Prepaid Capitation Plan (or MCO). Please refer to the MEVS manual for instructions on Managed Care transactions.

While MCOs are required to provide a uniform benefit package, there may be some variations between MCOs. To avoid payment problems, providers should contact the MCO whenever possible before providing services.

Providers may bill Medicaid and receive payment for any services not covered by the MCO. However, Medicaid will deny payment for services which are covered by the MCO. If a provider is not a participating provider in the enrollee's MCO, and the provider is certain that the service is covered by the MCO, then the provider must first refer the enrollee to his/her MCO for that service, or call the MCO prior to providing service.

Section VI – Definitions

For the purposes of the Medicaid Program and as used in this Manual, the following terms are defined to mean:

Emergency

An emergency is defined as care for patients with severe, life threatening, or potentially disabling conditions that require immediate intervention.

Emergency Services

Care provided after a sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity that the absence of immediate medical treatment could reasonably result in:

- serious impairment of bodily functions;
- serious dysfunction of a bodily organ or body part; or
- would otherwise place the enrollee's health in serious jeopardy.

Factor

A person or an organization such as a collection agency, service bureau or an individual that advances money to a provider for accounts receivable in return for a fee, deduction, or discount based on the dollar amount billed or collected. The accounts receivable are transferred by the provider to the factor by means of assignment, sale or transfer, including transfer through the use of power of attorney.

Local Professional Director

The Local Professional Director (also known as the Local Medical Director or Reviewing Health Professional) is an individual who, under Section 365-b of the NYS Social Services Law, serves under the general direction of the Commissioner of Social Services and has responsibility for:

- supervising the medical aspects of the Medicaid Program,
- monitoring the professional activities related to the Program, and

- taking all steps required to ensure that such activities are in compliance with Social Services Law and Regulations and Public Health Law and Regulations.

Managed Care

Managed care is a comprehensive and coordinated system of medical and health care service delivery encompassing ancillary services, as well as acute inpatient care.

Prior Approval

Prior Approval is the process of evaluating the aspects of a plan of care which may be for a single service or an ongoing series of services in order to determine the medical necessity and appropriateness of the care requested.

Prior approval does not guarantee payment.

Prior Authorization

Prior authorization is the acceptance by the Local Commissioner of Social Services, or his/her designated representative, of conditional financial liability for a service or a series of services to be rendered by the provider.

Prior authorization does not guarantee payment.

Qualified Medicare Enrollee

Qualified Medicare Enrollees (QMBs) are individuals who have applied to Medicaid through the LDSS and have been determined eligible for Medicaid payment, as appropriate, of Medicare premiums, deductibles and coinsurance for Medicare-approved services.

QMB status is determined via the MEVS.

Unacceptable Practice

An unacceptable practice is conduct by a person which conflicts with any of the policies, standards or procedures of the State of New York as set forth in the Official Codes, Rules and Regulations of the Department of Health or any other State or Federal statute or regulation which relates to the quality of care, services and supplies or the fiscal integrity of the Medicaid Program.

Urgent Medical Care

A situation in which the patient has an acute or active problem which, if left untreated, might result in:

- an increase in the severity of symptoms;
- the development of complications;
- increase in recovery time;
- the development of an emergency situation.
