4.4 PHARMACISTS AS IMMUNIZERS

The administration of select vaccines by qualified pharmacists employed by, or under contract with, Medicaid enrolled pharmacies is reimbursable under NYS Medicaid. Administration of vaccines is conducted pursuant to NYS Education Law and regulations (8NYCRR63.9) which permits licensed pharmacists who obtain additional certification to administer influenza and pneumococcal vaccinations to adults 18 years of age and older.

Reimbursement is based on a patient specific or non-patient specific order. These orders must be kept on file at the pharmacy. The ordering prescriber's NPI is required on the claim for the claim to be paid.

Pharmacies must bill the administration and cost of the vaccine using the following **procedure codes**. NDCs are not to be used to bill the vaccine product. Reimbursement for the product is made at no more than the actual acquisition cost to the pharmacy. No dispensing fee or enrollee co-payment applies. Pharmacies must bill with a quantity of "1" and a day supply of "1".

See the vaccine codes on the Pharmacists as Immunizers Fact Sheet for current codes found here:
