DVS – General Information

The Dispensing Validation System (DVS) is an automated approval process for selected items

A DVS authorization is an 11 digit number

Dental sealants require DVS authorization

DVS – General Information

When a procedure code's description shows (*DVS REQUIRED*):
The item/service requires an authorization via the Dispensing Validation System

Example from Dental Provider Manual – Procedure Code Section

D1351	Sealant – per tooth (TOOTH) (DVS REQUIRED)	\$35.35
-------	---	---------

Mechanically and/or chemically prepared enamel surface sealed to prevent decay. Refer to the “Prior Approval/Prior Authorization Requirements” section for use of DVS. Application of sealant is restricted to previously unrestored permanent first and second molars that exhibit no signs of occlusal or proximal caries for members **between 5 and 15 years of age** (inclusive). **Buccal and lingual grooves are included in the fee**. The use of opaque or tinted sealant is recommended for ease of checking bond efficacy. Reapplication, if necessary, is permitted **once every five (5) years**.

Note: Tooth number required for sealants.

DVS – General Information

When a PA / DVS Code of DVS is indicated in the Fee Schedule:
The item/service requires an authorization via the Dispensing Validation System

Example from Dental Provider Manual – Fee Schedule

Code	Description	By Report	PA / DVS
D1351	SEALANT - PER TOOTH		DVS

DVS – General Information

Valid for 365 days (1 year)

If needed, a provider may cancel a Dental DVS within 90 days of original issue date

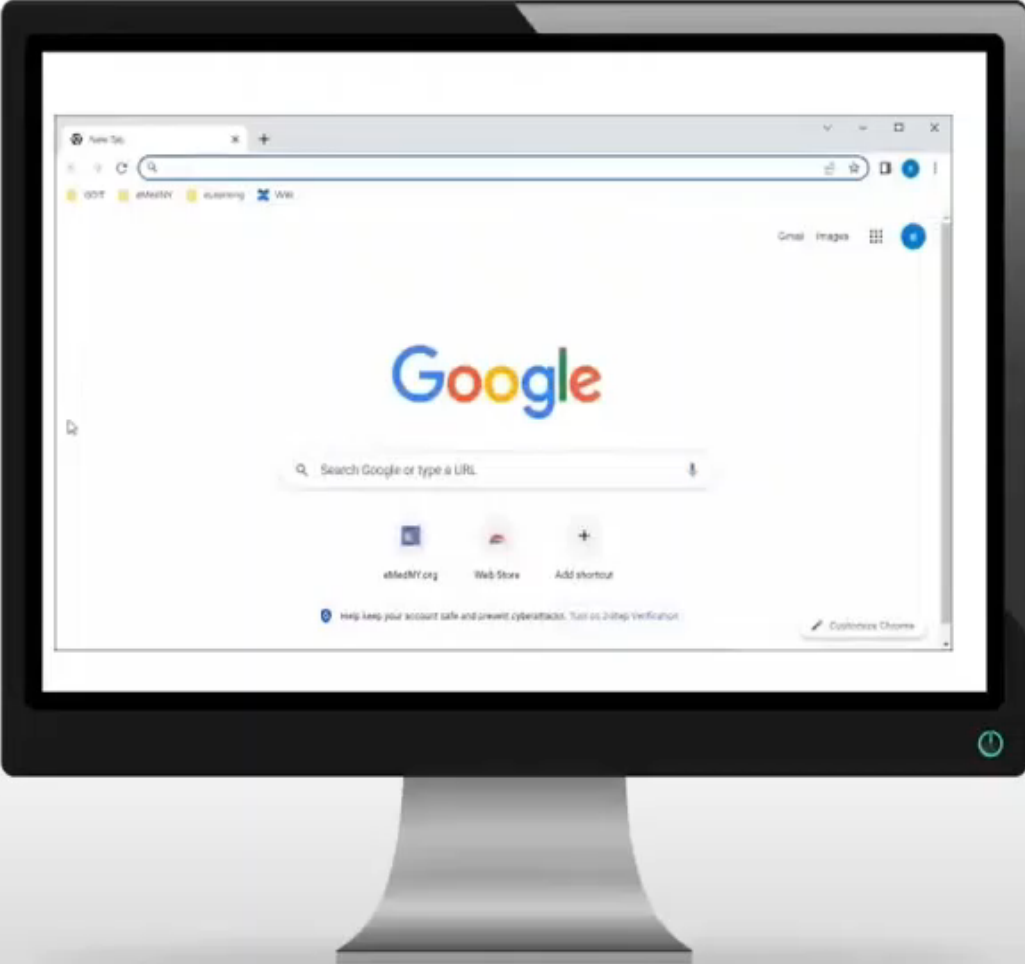

The tooth number on a DVS request must match the tooth number on the claim

DVS – General Information

A DVS request requires the current date and not a past or future date

DVS authorization does not guarantee payment

Prior to submitting a DVS request, providers must verify member's eligibility
