Managed Care

An updated version of the eMedNY MCE 834 Companion Guide (version 2.9) is available

An updated version of the eMedNY MCE 834 Companion Guide (version 2.9) is available

An updated version of the eMedNY MCE 834 Companion Guide (version 2.9) is published on the eMedNYHIPAASupport page. Changes being planned with this release (May 26, 2022) focus primarily on sharing the Rate Code Begin Date with the Plans.

Currently, eMedNY includes the active Rate Code on member file within Loop 2750 under a Reporting Category MED RATE CODE. With this release, eMedNY will also include the Rate Code Begin Date on the 834 transaction within Loop 2750 DTP Segment.

All sample transactions within the Companion Guide are updated and can be used by the Plans for internal testing. eMedNY will NOT send any test files directly to Plans as part of this update. Text versions of all samples included in this Companion Guide are also available for download from the eMedNYHIPAASupport Transaction Instructions page. Look for these 834 CG Sample Files under Managed Care Enrollment and select appropriate CG Samples.

https://www.emedny.org/HIPAA/5010/transactions/index.aspx

Other updates included in MCE 834 CG version 2.9:

Section 4.2.4

- Added RRE Code into Code List

Section 4.2.7

- Modified Verification (Audit) File paragraph.
