A new 'Go Live' date has been officially set for the WMS Roster Replacement Project

A new 'Go Live' date has been officially set for the WMS Roster Replacement Project

Dear Plans,

A new 'Go Live' date has been officially set for the **WMS Roster Replacement Project** resulting in the replacement of the monthly rosters **starting February 2021**. In order to meet this schedule, all Plans will receive verification files from eMedNY between January 15, 2021 and January 17, 2021. These files will provide all Plans with a starting enrollment baseline for post-roster processing. On January 18, 2021, the start of daily 834 transactions to all Plans will commence. On January 25, 2021, the first monthly termination process will be executed resulting in 834 termination transactions along with any other daily transactions being sent to Plans on January 26, 2021.

Please plan accordingly to meet these 'Go Live' dates. Proper planning requires that you have the necessary business and IT processes in place to:

1. Ingest and utilize the verification file to establish your baseline enrollment;
2. Ingest and process daily 834 transactions in replacement of the monthly 834 rosters; and
3. Ingest and process 834 termination transactions sent on the 25th of each month.

Additional information will be forthcoming concerning all 'Go Live' preparations, including the validation of all production ETIN configurations for each of the Plan's line of business. This activity is currently planned for mid-December 2020.

Questions related to this 'Go Live' schedule can be directed to eMedNYHIPAASupport@gdit.com.

Regards,

WMS Roster Replacement Project Team
