Third Party Health Resources

Insurance codes are used to identify Third Party Resources (TPR) other than Medicaid and Medicare, under which a client has insurance coverage. Such coverage must be utilized for payment of medical services prior to submitting claims to Medicaid.

Under the Medicaid Eligibility Verification System (MEVS), information specific to TPR will be reported to you when you request eligibility verification for a Medicaid recipient. The MEVS response via the Verifone Omni 3750 terminal or alternate access will be a two-digit insurance code. For Medicaid PCP only, the two-digit plan code *and* up to 20 alphabetic coverage codes or the word 'ALL' indicating what services are covered is displayed.

The telephone response will be insurance and coverage codes and a two-digit insurance code, and up to 20 messages or "ALL" indicating what services are covered.

Please refer to the MEVS Provider Manual for more detailed information on eligibility verifications, which can be found on the eMedNY website at:

<http://www.emedny.org/manuals/mevs.html>

The MEVS response will include information on a maximum of two third party insurance carriers. If a Medicaid recipient is covered by more than two carriers you will receive a response of ZZ as an insurance code which indicates additional insurance.

To obtain coverage information when there are more than two carriers, call Computer Sciences Corporation at:

(800) 343-9000.
