

# Incontinence Supply Management Program

## September 1, 2016

As announced in the [June 2016 Medicaid Update](#), beginning September 1, 2016, all adult and youth sized diapers dispensed to all Medicaid enrollees must meet minimum product specifications established by the Department of Health:

- No plastic (non-breathable) backed products;
- Rewet rate of <2.0g;
- Rate of Acquisition (ROA) of <60 seconds;
- Retention capacity of >250 g;
- Presence of breathable zones with a minimum value of >100 cubic feet per minute (cfm);
- Presence of a closure system which allows for multiple fastening and unfastening occurrences.

These minimum standards apply to all adult and youth sized products dispensed to Medicaid enrollees residing in community settings by fee-for-service, managed care and managed long term care Medicaid providers.

The Department has awarded a preferred vendor supply contract to Twin Med, LLC for incontinence products to be purchased by Medicaid providers. Medicaid providers who purchase incontinence supplies from Twin Med will receive competitive pricing and a formulary that has been approved by the Department as meeting the new minimum quality standards. Medicaid providers are not required to verify incontinence product quality standards if the products are purchased from Twin Med, LLC. To set up an account with TwinMed, please visit the preferred vendor's New York website at [www.twinmedny.com](http://www.twinmedny.com) or contact TwinMed by phone at 1-844-886-3369.

The preferred vendor purchase pricing and formulary are as follows:

### NYS Incontinence Supply Contracted Purchase Price by HCPCS Code (HCPCS codes denoted with an asterisk are subject to minimum quality standards)

Providers will continue to be able to purchase incontinence products from alternative suppliers as long as the products provided meet the established minimum quality standards. Medicaid providers who choose to purchase incontinence supplies from an alternative supplier, however, are responsible for ensuring that any product dispensed meets the minimum product specifications established by the Department and will be responsible for obtaining independent testing results for these products (even if they are the same as or similar to products on the approved formulary). Only products purchased from Twin Med, LLC are exempt from the documentation requirement.

The Department will incorporate review of incontinence product minimum quality specifications into routine pre-payment and post-payment reviews and other routine audit processes. Providers must maintain independent testing documentation for a six year period following reimbursement for any product not purchased from Twin Med, LLC and have the ability to produce such documentation upon audit or claims review. The Department will also investigate any complaints received from Medicaid enrollees or other parties concerning Medicaid providers dispensing incontinence products which do not meet the established minimum product specifications.

For questions about the Incontinence Supply Management Program, contact the Bureau of Medical Review at 1-800-342-3005 or by email at [OHIPMEDPA@health.ny.gov](mailto:OHIPMEDPA@health.ny.gov).
