Executive Deputy Commissioner

# Update to Coverage and Billing of Continuous Glucose Monitors and Related Supplies in the Preferred Diabetic Supply Program

Effective June 3, 2024, Continuous Glucose Monitors (CGM) and related supplies listed in the [Preferred Diabetic Supply Program](#) (PDSP) will only be available from a Medicaid enrolled pharmacy provider. Durable Medical Equipment, Prosthetics, Orthotics and Supply (DMEPOS) providers will no longer be able to dispense CGMs and related supplies listed in the PDSP.

Medtronic CGMs and related supplies that are not listed on the PDSP, may be covered if specific criteria are met and authorization is obtained. Authorization for these CGMs and supplies will continue to be issued through the Dispensing Validation System (DVS) and can be billed by DMEPOS and pharmacy providers using HCPCS codes E2102 and A4238.

NYS Medicaid will continue to honor approved prior authorizations for CGM and supplies, HCPCS E2103 and A4239, through their expiration dates. On June 3, 2024, Medicaid will no longer accept prior approval requests for CGMs and supplies from DMEPOS providers found in the PDSP. These requests will be inactivated and referred to the PDSP.

Crossover claims for dual eligible Medicare/Medicaid members will continue to pay using correct HCPCS coding.
