

What about claims submitted for Enteral Products and Medical/Surgical Supplies?

Fiscal orders for supply and enteral products (procedure codes) are not required to be written using the serialized prescription forms. However, if the supplies are ordered on a serialized prescription form, the actual serial number on the form must be reported in Field 454-EK (Scheduled Prescription ID Number) on the NCPDP pharmacy claim. In cases where the fiscal order was not written on serialized prescription form, you must use the code SSSSSSSS in Field 454-EK on the NCPDP. The serial number is not required on an 837P DME claim for supplies.
