

## **License Number for eMedNY - How to send a License Number as a Provider Identifier?**

*Note: As a courtesy to providers, NYSDOH has previously accepted the old “License Type” as a prefix to the License Number and converted them to Profession Codes, when possible. This has been discontinued with NPI implementation. Only Profession Codes will be accepted. Submitters are urged to change their systems as soon as possible to avoid processing delays.*

This requirement applies to trading partners sending the ASC X12N 270, 278, and 837 transactions, and NCPDP 5.1 Telecommunications and 1.1 Batch requests.

When using a License Number as a provider identifier for eMedNY, NYSDOH requires a three-digit Profession Code as a prefix. The codes are a subset of the two-digit Profession Codes assigned by the New York State Department of Education Office of the Professions (NYSED/OP) when it issues professional licenses. A leading zero is added to the left to create the NYSDOH three-digit Profession Code and, for NYS licensed providers, two more zeros must follow between the Profession Code and the License Number. Exceptions exist for:

- using a license number to identify a NYS licensed Privileged Nurse Practitioner or Privileged Midwife. In these two cases a value of ‘0F’ must be inserted between the Profession Code and License Number instead of the two zeros.
- using a license number to identify a NYS licensed Optometrist or other eye-care practitioner with prescribing privileges. A value of ‘0V’, ‘0T’, or ‘0U’ - depending on the value on the NYS license - must be inserted between the Profession Code and License Number instead of the two zeros. This is not applicable to Ophthalmologists.

All out of state licenses must be formatted with the two-letter State, District of Columbia, or US Territory Code as assigned by the United States Postal Service instead of the ‘00’, ‘0F’, ‘0V’, ‘0T’, or ‘0U’ values.

This formatting specification will allow the association of the provider on a claim with a provider reported on an X12 278 Prior Authorization in the Requester Supplemental Identification and/or Service Provider Supplemental Identification segment(s) using the ‘ZH’ qualifier.

When reporting the Prescriber ID in the NCPDP Prescriber Segment (a Qualifier of ‘08’ is used), NYSDOH expects Provider Profession Code and NYS Provider License Number. If an out of state License Number is used,

**NYS expects the NYS Provider Profession Code for out of state practitioners, a USPS State Code and the Provider License Number.**

**NYSED/OP also issues temporary limited permits for Physician’s Assistants and Physicians who are not yet licensed. The limited permit numbers begin with a ‘P’ followed by five digits. These permit numbers cannot be sent in electronic claims transactions. A supervising physician’s license or Provider ID must be sent instead, if the permit holder would otherwise be identified as the Rendering or Attending Provider.**

### Profession Code Table

The eMedNY system requires a three-digit Profession Code as a prefix to the License Number for processing claims and other electronic healthcare transactions in which the license has been used to identify a provider.

The Profession Code is printed on the NYS license. Both the Profession Code and License Number for all NYS licensed professionals are available from the NYS Department of Education, Office of the Professions at the following URL:

<http://www.op.nysed.gov/opsearches.htm>

The following table shows how to send the Profession Code and License Number for NYS Medicaid electronic healthcare transactions such as healthcare claims. Using dummy values to represent the License Number, compound identifiers are created as examples (for out of state license examples, the District of Columbia abbreviation of “DC” is shown).

NYS Dept. of Education Profession Code	Profession Code Description	Compound Identifier for eMedNY
005	MENTAL HEALTH CREATIVE ARTS THERAPY	00500123456

**License Number as Identifier for Nurse Practitioners**

Licenses for NYS Nurse Practitioners include the Profession Code as the first two digits of the License Number. There are seventeen NYS-licensed areas of Nurse Practitioner specialization. The specification does not change for these providers, other than the requirement to insert a value of '0F' between the Profession Code and License Number for services rendered by a Privileged Nurse Practitioner (those with prescribing privilege).
