CG MODIFICATION TRACKING:

- V3.0
- 03/14/2007 Added information in NYS Medicaid Notes in the front matter to refer to the NYSDOH Companion Guides for X12 and NCPDP transactions; and to the Technical Supplementary Companion Guide for technical information. Also made minor document format changes.
- 02/02/2007 Changed title to reflect new name for NYSDOH Office of Health Insurance Programs, removed "Phase II" from all references to eMedNY, removed "draft" from references to this document.
- V 2.0
- Publication Date for eMedNY Phase II 01/31/2005.
- As of this publication there are no differences from eMedNY Phase I.

COMPANION GUIDE DISCLAIMER:

The New York State Department Of Health (NYSDOH) has provided this 270/278 Supplemental Document for Taxonomy Usage to assist Providers, Clearinghouses and all Covered Entities in preparing HIPAA compliant transactions with the correct taxonomy values for the 270 and 278 transactions.

NYSDOH does not offer individual training to assist Providers in the use of the ASC X12N transactions provided on this website. However, training has been offered to meet the individual needs of Providers in preparing their transactions to follow NYSDOH policy.

The information provided herein is believed to be true and correct. Changes to processing are continuing to evolve, therefore NYSDOH makes no guarantee, expressed or implied, as to the accuracy of the information provided herein. Furthermore, this is a living document and the information provided herein is subject to change as NYSDOH policy changes or as HIPAA legislation is updated or revised.

NYS MEDICAID NOTE:

This Companion Guide, which is provided by NYSDOH, outlines the requirements for processing transactions using the appropriate taxonomy values allowed by NYSDOH.

For further assistance, NYSDOH and its fiscal agent, Computer Sciences Corporation (CSC), are urging providers to visit a web community, www.nyhipaadesk.com for other pertinent information.

Please refer to the NYSDOH Companion Guides for information about NYSDOH requirements for the X12 and NCPDP transactions.

Please refer to the Technical Supplementary Companion Guide for information about transaction header structures, transaction size limits, electronic communications methods, and enrollment as a trading partner. This document is available for download at nyhipaadesk.com.

The ASC X12N Implementation Guides and their associated addenda are available in electronic format at: www.wpc-edi.com. Pharmacy Providers can acquire the NCPDP Implementation Guide from www.ncdp.org.

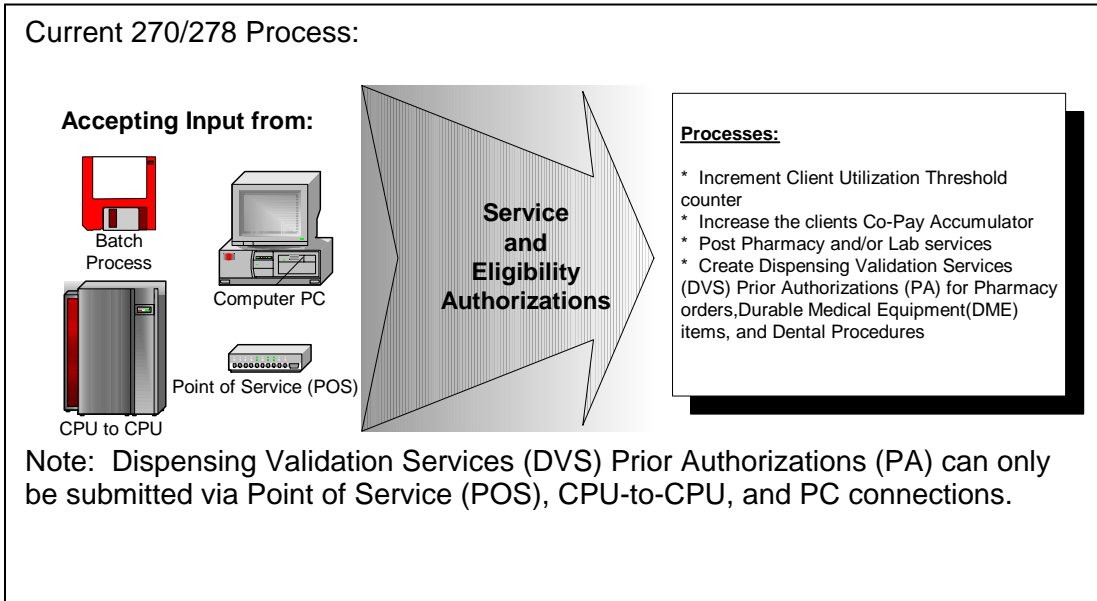

1. 270/278 Background

The Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, Title II, Part C) required the Secretary of Health and Human Services to establish national standards for certain electronic health care transactions, and national identifiers for Providers, health plans, employers, and individuals (the national individual identifier is oh hold). Adopting these standards will improve the efficiency and effectiveness of the nation's health care system by encouraging the widespread use of Electronic Data Interchange (EDI) in health care.

National standards have been established for Service Authorization transactions via the X12N 278 Health Care Services Review - Request for Review and Response and for Eligibility via the X12N 270/271 Health Care Eligibility Benefit Inquiry and Response transaction pair.

Currently, eMedNY accepts and processes Provider requests for Service Authorizations for various medical services and Pharmacy and/or ordered Lab services; and creates Dispensing Validation Services (DVS) Prior Authorizations (PA) for specific drugs, supplies, Durable Medical Equipment (DME) items, and Dental Procedures.

Service Authorization and Eligibility Transactions are accepted via Point of Service (POS), CPU-to-CPU, Personal Computer (PC) and Batch (magnetic media) transmissions. DVS PA transactions can only be submitted via POS, CPU-to-CPU and PC transmissions.

2. HIPAA Issues Statement:

The HIPAA – mandated 270 and 278 transaction sets do not allow for the entry of a proprietary Specialty Code or Category of Service in a transaction. This type of information is encoded using Provider Taxonomy and Service Type Code. The New York State Department of Health determines the Provider's Category of Service for an Authorization or Eligibility transaction based on data on file and returns "at limit" information for Utilization Threshold Categories related to the services they provide.

3. Provider Data Requirements

Service Authorizations (278), Service Authorization Confirmations (278), Cancellations, Dispensing Validation Systems (DVS) (278), Eligibility (270/271), and card swipe Transactions require the following data items:

- Service Type Code
- Taxonomy Code
- Submitting Provider Number
- Date of Service

The Transaction Type from the GS Functional Group Header segment is also used (data element GS01).

These data items allow the receiving system to determine the Category of Service and Specialty Code:

4. Mapping from Service Type, Taxonomy and Provider Type to Specialty Code and/or Category of Service

To navigate the table below, you will need to know your Provider Type Number and the Service Type Code to determine your Taxonomy Code. You should already know your Provider Type Number. In processing your transaction, your Provider Number and the correct Provider Type Number will be determined by what is on file. To determine your correct Taxonomy Code using the table below, find your Provider Type and the Service Type. Next, locate the Specialty Code you are trying to submit in the "Listed Specialty Code" area. You will now have the information to select the correct Taxonomy Code to use in your transaction.

5. Taxonomy Table

Note: The table below contains the necessary combinations of fields to determine the Specialty Code and / or Category of Service. Any combination not present is defaulted with spaces as described above. The table below is sorted by Provider Type.

Service Type	Taxonomy	Provider Type	Listed Specialty Code	Listed Category of Service	eMedNY Transaction	Applicable Category of Service
