

Medicaid Fee- for- Service Providers Dispense Brand Name Drug when Less Expensive than Generic Program

Effective **January 13, 2022**, the following changes will be made to the Dispense Brand Name Drug when Less Expensive than the Generic Program:

- **Afinitor** will be **ADDED** to the program.
- **Diclegis, Focalin XR, ProAir HFA, Humalog U100 vial, Tracleer tablet** will be **REMOVED** from the program.

In conformance with State Education Law which intends that patients receive the lower cost alternative, brand name drugs included in this program:

- **Do not require ‘Dispense as Written’ (DAW) or ‘Brand Medically Necessary’ on the prescription.**
- Have a generic copayment.
- Are paid at the Brand Name Drug reimbursement rate or usual and customary price, whichever is lower (SMAC/FUL are not applied).
- Do not require a new prescription if the drug is removed from this program.

IMPORTANT BILLING INFORMATION

Pursuant to this program prescription claims submitted to the Medicaid program **do not require** the submission of Dispense as Written/Product Selection Code of ‘1’; **Pharmacies should submit DAW code 9** (Substitution Allowed by Prescriber but Plan Requests Brand). Pharmacies will receive a NCPDP reject response of “22” which means missing/invalid DAW code if other DAW codes are submitted. The only exception to this, is DAW code 1 and “*Brand Medically Necessary*” on the prescription.
