1.0 INTRODUCTION (Rev. 05/11)

The New York State Department of Health (DOH) has implemented a program that allows the pharmacy community to submit transactions in an online real-time environment that performs a Prospective Drug Utilization Review (Pro-DUR). In order to receive payment for services rendered, all pharmacies must submit their transactions through the online ProDUR system. An optional feature of the ProDUR program is the Electronic Claim Capture and Adjudication (ECCA) of claims. This program will check all prescription drugs paid by Medicaid for the member over the past 90 days and alert the pharmacists to possible medical problems associated with dispensing the new drug.

The telecommunication standards for the Pro-DUR/ECCA system are those named under the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The NCPDP 5.1 and D.0 Telecommunications standard and the 1.1 and 1.2 Batch formats are supported until 01/01/2012. The NCPDP Official Release is available to NCPDP members from the following address:

National Council for Prescription Drug Programs Inc.
9240 East Raintree Drive
Scottsdale, AZ 85260
(480) 477-1000

2.0 GENERAL INFORMATION (Rev. 05/11)

In order to receive payment for services rendered, all pharmacies must submit their transactions through the online Pro-DUR program using the NCPDP transaction format. Each pharmacy must choose an access method for these transactions.

Access methods are further outlined in the Trading Partner Information Companion Guide www.eMedNY.org

An accepted transaction gives you all the necessary Utilization Threshold (UT), DUR, and member eligibility information. **There is no need to do an eligibility inquiry.**

The online system is designed to allow for capture and adjudication of the electronic submission. It is each pharmacy's option as to whether the claim data should be immediately captured online by the eMedNY contractor for payment or if the actual claim will be sent by the provider using paper or electronic batch.

2.1 Card Swipe (Rev. 02/19)

Effective February 1, 2019 - eMedNY no longer supports the Verifone Vx570 Point of Sale (POS) terminal or any other devices, as they are no longer in compliance with the data privacy and security requirements and cannot be remediated.

2.2 Response Formats (Rev. 05/11)

The response for each claim will either be accepted or rejected. If the claim is rejected, reject codes will be provided to identify the nature of the problem.

Reject codes may appear in one or more of the following fields: **NCPDP Reject Codes** will be returned in the **Reject Code** (511-FB) field. **MEVS Accepted and Denial Codes** listed in [Table 1](#) (page 9.0.1) and [Table 2](#) (page 10.0.1), **Rx Denial codes** listed in [Table 7](#) (page 12.0.1), **DVS** codes listed in [Table 9](#) (page 14.0.1), and **Pend Reason** Codes listed in [Table 10](#) (page 15.0.1) will be returned in the **Additional Message Info** (526-FQ) field. If a claim is rejected, an **NCPDP Reject Code** will always be returned in the **Reject Code** (511-FB) field and may have a corresponding **MEVS Code** placed in the **Additional Message Info** (526-FQ) field to further clarify the error. Both fields should always be reviewed. The valid **NCPDP** and **MEVS Codes** can be found in the tables at the end of this manual.

2.3 Electronic Claims Capture and Adjudication (ECCA) (Rev. 10/19)

Captured claims will be fully edited for completeness and validity. There is a possibility that claims captured for final adjudication may be pended and subsequently denied. When a captured claim is pended, final adjudication results will appear on the remittance statement.

To submit ECCA transactions, a **Personal Identification Number (PIN)** is required. Additionally, the pharmacy must have an **Electronic Transmitter Identification Number (ETIN)** on file with eMedNY. Both of these forms may be accessed from the eMedNY website:

<http://www.emedny.org/info/ProviderEnrollment/allforms.html>

The Authorization Number field (503-F3) is not returned on the response for claims that are submitted for Capture. It is only returned for non-capture claims. If spaces are sent in the Processor Control Number field (104-A4) and a "C" is returned in the response, then the message **NO CLAIM TO FA** is returned in the Authorization Number field (503-F3).

The following types of claims cannot be submitted for ECCA:

Durable Medical Equipment (DME) claims

Please Note: DME does NOT include the product supply codes (1 alpha, 4 numeric) found in the MMIS Pharmacy Provider Manual in sections 4.2 and 4.3. Pharmacy DME Claims must be submitted using 837 Professional ASC X12N.

2.4 Medicare and Third Party Claims (Rev. 05/14)

Third Party and Medicare Managed Care Organizations (MCO)

A member's other insurance information (if any) is returned to you in the online response via the **Additional Message** field. If the member's other insurance covers drugs, either K, M, O or the word ALL will be returned in the Insurance Coverage Code position of the **Additional Message** Field.

For a third party or Medicare Managed Care Organization (MCO) claim to be successfully captured, the **Other Coverage Code** field and **Other Payer Amount Paid** field must be entered. Refer to the Standard Companion Guide Transaction Information for exact formatting of the COB segment. It is extremely important that the value entered in the **Other Coverage Code** field corresponds to the entry in the **Other Payer Amount Paid** field. The entry in each field must correlate to the other field and be logically correct for your claim to be accepted.

To report Patient Responsibility Amounts for Deductible, Coinsurance and Co-Pay and valid Other Patient Responsibility Amounts, refer to the COB Segment in the Standard Companion Guide, fields 351-NP (Other Payer Patient Responsibility Amount Qualifier) and field 352-NQ (Other Payer Patient Responsibility Amount). Example:

- 351-NP- Enter "01" Qualifies Deductible reported in field 352-NQ.
- 352-NQ- Enter Deductible Amount.
- 351-NP- Enter "05" Qualifies Co-Payment Amount reported in field 352-NQ.
- 352-NQ- Enter Co-Payment Amount.
- 351-NP- Enter "07" Qualifies Coinsurance Amount reported in field 352-NQ.
- 352-NQ- Enter Coinsurance Amount.

Note: The Other Payer Amount Paid Field is an optional field and should not be submitted unless the member has other drug coverage and you have received reimbursement or been notified that the service is not covered by the other insurance company.

When submitting claims with value "3" in the (Other Coverage Code) field 308-C8, the NCPDP reject code or code(s) from the Other Payer(s) must also be entered in field 472-6E (Other Payer Reject Code).

The values for Other Coverage Code are:

- | | | |
|---|---|--|
| 0 | = | Not Specified |
| 1 | = | No Other Coverage Identified |
| 2 | = | Other Coverage Exists - Payment Collected |
| 3 | = | Other Coverage Exists - This Claim Not Covered |
| 4 | = | Other Coverage Exists - Payment Not Collected |

Medicare Part B

A member's Medicare information (if known) is returned to you in the online response via the Additional Message field. If Medicare Part B covers the NDC/HCPCS code being dispensed, a claim must be submitted to Medicare first.

For a Medicare Part B primary claim to be successfully captured, the appropriate Medicare fields must be entered. Refer to the D.0 Standard Companion Guide for the formatting of the COB Segment.

Note: The Medicare fields must be submitted if Medicare has adjudicated the claim.

Medicare Part D

Prescription drugs for Medicare/Medicaid dual eligible's who have Part D coverage must be submitted to the member's Part D Prescription Drug Plan. When submitting claims for Drugs/OTCs that are excluded from Part D coverage but are covered by NYS, do not send the COB Segment.

2.5 Rebills/Adjustment Information (Rev. 05/11)

Rebills will be processed as adjustments to a previously submitted claim that was approved for payment. Rebills cannot be submitted for claims that are pending or were rejected.

Although you will need to submit all fields required for the original claim transaction, your claims will be matched to the original claim using: Medicaid Provider Identification Number, Cardholder ID, Prescription Number, and Date Filled. If more than one active claim meets the criteria, the most recently submitted claim will be selected for adjustment. To adjust an older submission, submit the rebill via paper and supply the Claim Reference Number of the specific claim to adjust.

Rebill transactions can be submitted for service dates up to two years old. While a non-ECCA claim can be adjusted, it cannot be converted to an ECCA claim.

Rebills are not allowed for original claims that generated a DVS prior approval. If a change is needed to a paid DVS claim, then the adjustment must be submitted on paper or electronic batch. To reverse the original claim, submit another original transaction with the corrected information.

2.6 Refills Information (Rev. 06/21)

Prescriptions are limited to a maximum of five refills for controlled drugs and eleven refills for non-controlled drugs. All refills for controlled drugs must be dispensed within 180 days from the date of the prescription. All refills for non-controlled drugs must be dispensed within 365 days from the date the prescription was written.

2.7 Dispensing Validation System (DVS) (Rev. 05/11)

DVS enables suppliers of prescription footwear items, specified drugs, certain medical surgical supplies and durable medical equipment to receive a prior approval number (DVS number). The DVS number will be returned in the Additional Message (526-FQ) field and the claim will be processed for adjudication (if ECCA is requested).

Important Information Regarding DVS Transactions

- Transactions for both NDC's and HCPCS can be submitted if reimbursable under COS 0441, 0161 or 0288.
- Although multiple claim lines per transaction can be submitted, only one DVS claim line item can be submitted per transaction and the DVS line must be the first line item within the transaction.
- The Date of Service for DVS transactions must be today's date.

2.8 Prior Auth Type Code and Prior Auth Number Submitted (Rev. 05/11)

The Prior Auth Type Code (461-EU) field is a two (2) position numeric field. There are two values expected by NYSDOH for this field.

- 01** = Prior Authorization. If this value is used, then Prior Auth Number Submitted (462-EV) field must contain the eleven-digit Prior Approval number.
- 04** = Exemption from co-pay. Use to indicate the member is exempt. If this value is used, 462-EV is not submitted unless a previously obtained Prior Approval is also being reported on the claim.

2.9 Temporary Medicaid Authorizations (Rev. 05/11)

Providers must make a copy of all Temporary Medicaid Authorizations (DSS-2831A) for their records. These claims **cannot** be submitted by pharmacies through the online ProDUR/ECCA program because eligibility is not yet on file. Pharmacy providers must put the Number 4 in the Service Authorization Exception field and submit the claim directly to the eMedNY contractor via paper. If the final adjudication of the claim results in a denial for member ineligibility, please contact the Local District Support Unit. For Upstate members call 518-474-8887; the number for New York City members is 212-417-4500.

2.10 Excess Income/Spenddown Claims (Rev. 05/11)

To properly submit a spend down claim, the **Eligibility Clarification Code** (309-C9) field must contain a value of two (2) and the **Patient Paid Amount** (433-DX) field must contain the amount paid by the member, even if that amount is zero. If the claim passes all other editing and you have elected the ECCA option, your claim will be captured and pended waiting for the eligibility file update from the local district to indicate that the spend down has been met. If the eligibility information is not updated, the claim will be denied.

2.11 Duplicate Claim Transactions (Rev. 05/11)

When an online claim transaction is sent to eMedNY, it will be matched against previously captured (approved) claims. If the transaction is determined to be an exact duplicate of a previously approved claim, eMedNY will return a "C" in the **Transaction Response Status** (112-AN) field. The remaining response fields will contain the data that was returned in the response from the original claim.

If identical data exists only in certain fields, your claim will be rejected for NCPDP Reject Code 83 "Duplicate Paid/Captured Claim" unless prior approval was obtained for one of the two conflicting transactions (meaning Prior Auth Number Submitted (462-EV) field would need to contain a PA Number on one claim, and no PA Number for the other claim.)

If the original transaction was non-ECCA and the duplicate transaction is ECCA, the transaction response will be the original non-ECCA response. No adjudication process will occur.

3.0 Pro-DUR PROCESSING (Rev. 01/15)

A drug history profile is maintained for all members. This file contains a record for each accepted prescription or OTC item entered through the ProDUR system. Each prescription on the drug profile is assigned an expiration date. This date is calculated using the date filled plus the days supply.

All prescription and OTC transactions are compared to the member's drug profile. If the new prescription falls within the active date range (date filled plus days supply) and a conflict exists, a DUR response will be returned. ProDUR editing is not performed on compound drugs or sickroom supplies.

The DUR edits are based on the clinical database compiled by First DataBank. This information is used to administer the New York State Medicaid Pro-DUR program under the direction of the DUR Board.

Up to nine DUR related conflicts can be identified and returned for each drug submitted. Information about these conflicts is returned in the response in order of importance.

The following series of edits are performed by the Pro-DUR system:

Therapeutic Duplication (TD)

The Therapeutic Duplication edit checks the therapeutic class of the new drug against the classes of the member's current, active drugs already dispensed.

Drug Overuse Alert (ER) The Drug Overuse edit determines at the time of refill that less than 75% of the previously dispensed amount, based on the previously dispensed supply, has been used. Or the remaining days supply of the drug dispensed for the member's history claims, based on the past 90 days, has accumulated to an additional 10 days or more.

Drug-Drug Interactions (DD)

The Drug-Drug Interaction edit matches the new drug against the member's current, active drugs to identify clinically relevant interactions.

Drug-Disease Contraindications (DC)

The Drug-Disease Contraindications edit determines whether the new drug is potentially harmful to the individual's disease condition. The active drugs on drug history determine the member's disease condition(s).

Drug Pregnancy Alert (PG)

Drug Pregnancy Alert warnings are returned for females between the ages of 13 and 52 on new drugs that may be harmful to pregnant women.

Pediatric Precautions (PA)

Pediatric Precautions are returned for children under the age of eighteen (18) on new drugs that may be harmful to children.

Lactation Precautions (PG)

Lactation Precautions are returned for females between the ages of 13 and 52 on new drugs that may be harmful to nursing women or their babies.

Geriatric Precautions (PA)

Geriatric Precautions are returned for adults over the age of 60 on new drugs that may be harmful to older adults.

High Dose Alert (HD)

A High Dose Alert is returned if the dosage for the new drug exceeds the maximum dosage recommended for the member's age group.

Low Dose Alert (LD)

A Low Dose Alert is returned if the dosage for the new drug is below the minimum dosage recommended for the member's age group.

3.1 DUR Response Fields (Rev. 01/15)

The following information is returned in the response from the Pro-DUR system for each identified DUR conflict:

Drug Conflict Code (439-E4)
Clinical Significance (528-FS)
Other Pharmacy Indicator (529-FT)
Previous Date of Fill (530-FU)
Quantity of Previous Fill (531-FV)
Database Indicator (532-FW)
Other Prescriber Indicator (533-FX)
Free Text (544-FY)

Reason For Service (Conflict Code)

The Drug Conflict Code identifies the type of DUR conflict found when a new prescription is compared against the member's drug history file and demographics. Following are the values that may be returned as Drug Conflict Codes:

TD = Therapeutic Duplication
ER = Drug Overuse Alert
DD = Drug-Drug Interactions
DC = Inferred Drug Disease Precaution
PG = Drug Pregnancy Alert
PA = Drug Age Precaution
LD = Low Dose Alert
HD = High Dose Alert
NP = New Patient Processing
AD = Additional Drug Needed
PN = Prescriber Consultation

Clinical Significance

The Clinical Significance is a code that identifies the severity level and how critical the conflict. The following chart lists each drug conflict code and the clinical significance codes which may be returned for that code as well as whether they are DUR rejects or warnings.

| Conflict Code | Reject/ Warning | Clinical Significance | Description of Clinical Significance |
|--------------------------------------|-----------------|-----------------------|--|
| TD Therapeutic Duplication | R | 1 | An Original Prescription that duplicates a therapy the member is already taking. |
| ER Drug Overuse | R | 1 | Prescription is a Refill and is being filled prior to 75% of the previously dispensed amount having been used. |
| | R | 1 | The remaining Days Supply of the drug dispensed for the member's history claims over the past 90 days, has accumulated to an additional 10 days or more. |

| Conflict Code | Reject/ Warning | Clinical Significance | Description of Clinical Significance |
|---------------------------|-----------------|-----------------------|---|
| DD Drug-Drug | R | 1 | Most significant. Documentation substantiates interaction is at least likely to occur in some patients, even though more clinical data may be needed. Action to reduce risk of adverse interaction usually required. |
| | W | 2 | Significant. Documentation substantiates interaction is at least likely to occur in some patients, even though more clinical data may be needed. Assess risk to patient and take action as needed. |
| | W | 3 | Possibly significant. Little clinical data exists. Conservative measures are recommended because the potential for severe adverse consequences is great. |
| DC Drug Disease | W | 1 | Absolute Contraindication. Drug Therapy for the member should be changed. |
| | W | 2 | Precaution. The risk/benefit of therapy should be considered and the member's response closely monitored. |
| PG Pregnancy | W | D | PREGNANCY There is positive evidence of human fetal risk based on adverse reaction data from investigation or marketing experience or studies in humans, but potential benefits may warrant use of the drug in pregnant women despite potential risks. |
| | W | X | PREGNANCY Studies in animals or humans have demonstrated fetal abnormalities and/or there is positive evidence of human fetal risk based on adverse reaction data from investigation or marketing experience, and the risks involved in use of the drug in pregnant women clearly outweigh potential benefits. |
| | W | 1 | PREGNANCY No FDA rating but is contraindicated or not recommended; may have animal and/or human studies or pre- or post-marketing information. |
| | W | 1 | LACTATION Absolute Contraindication. The Drug should not be dispensed. |
| | W | 2 | LACTATION Precaution. Use of the Drug should be evaluated carefully. |

| Conflict Code | Reject/ Warning | Clinical Significance | Description of Clinical Significance |
|------------------------|-----------------|-----------------------|---|
| PA Drug Age | W | 1 | Absolute Contraindication. Drug Therapy should be changed. |
| LD Low Dose | W | 1 | Prescribed dose is less than the minimum appropriate for the drug. |
| HD High Dose | W | 1 | Prescribed dose is greater than the maximum appropriate for the drug. |

Other Pharmacy Indicator (529-FT)

The following values may be returned in the Other Pharmacy Indicator:

| | | |
|----------|---|----------------|
| 0 | = | Not Specified |
| 1 | = | Your Pharmacy |
| 3 | = | Other Pharmacy |

Note: When the conflict is caused by an "Other Pharmacy", eMedNY is not able to provide the identity of that pharmacy.

Previous Date of Fill (530-FU)

The Previous Date of Fill provides the date the conflicting drug was dispensed.

Quantity of Previous Fill (531-FV)

The Quantity of Previous Fill provides the quantity of the conflicting drug.

Database Indicator (532-FW)

The Database Indicator will always be returned with a value of 1 to indicate that First DataBank is the DUR database provider.

Other Prescriber Indicator (533-FX)

The Other Prescriber Indicator compares the Prescriber of the current prescription to the Prescriber of the conflicting drug from the member's active drug profile, and returns one of the following codes:

| | | |
|----------|---|------------------|
| 0 | = | Not Specified |
| 1 | = | Same Prescriber |
| 2 | = | Other Prescriber |

Conflict Code Free Text Descriptions

A Free Text message is returned for each conflict to provide additional information about the DUR condition. Following is a description of the Free Text:

Note: Bold Text in the examples below represents Free Text.

4.0 OVERRIDE PROCESSING (Rev. 05/11)

4.1 DUR Override (Rev. 05/11)

If your claim transaction was rejected due to a DUR conflict and you intend to dispense the drug, you will need to override the conflict (if appropriate). In order to process a DUR override, the same code that was returned as the denial code (Drug Conflict Code) must be placed in the **Reason for Service Code** (439-E4) field. The **DUR Conflict Code** being sent as the override must match the DUR Conflict Code received in the response of the original transaction. A corresponding entry must also be entered in the **Result of Service Code** (441-E6) field. The only conflict codes that are DUR denials and reject the claim are TD (severity level 1), DD (severity level 1) and ER (severity level 1). All of the other codes being returned are warnings and allow your claim to be accepted.

Result of Service Code (441-E6) for DUR reject overrides:

- 1A = Filled as is, false positive
- 1B = Filled, Prescription as is
- 1C = Filled with Different Dose
- 1D = Filled with Different Directions
- 1E = Filled with Different Drug
- 1F = Filled with Different Quantity
- 1G = Filled with Prescriber Approval
- 1H = Brand-to-Generic Change
- 1J = Rx-to-OTC Change
- 1K = Filled with Different Dosage Form
- 2A = Prescription Not Filled
- 2B = Not Filled, Directions Clarified
- 3A = Recommendation Accepted
- 3B = Recommendation Not Accepted
- 3C = Discontinued Drug
- 3D = Regimen Changed
- 3E = Therapy Changed
- 3F = Therapy Changed – cost increased acknowledged
- 3G = Drug Therapy Unchanged
- 3H = Follow-Up/Report
- 3J = Patient Referral
- 3K = Instructions Understood
- 3M = Compliance Aid Provided
- 3N = Medication Administered
- 4A = Prescribed with acknowledgements

NOTE: The DUR Conflict Code **ER** (Drug Overuse) requires other specific Drug Conflict Codes and Submission Clarification Codes be submitted to override specific **ER** reject situations that occur.

When an early fill is needed for new admissions to Nursing Home/Child (foster) Care facilities, submit the Submission Clarification Code (420-DK) of **02** (Other Override) with a non-matching '**NP**' (New Patient Processing) in Reason for Service Code (439-E4) along with a Result of Service Code (441-E6) from the above list to override the **ER** conflict code.

When a Brand medication is needed in place of Generic (or vice versa), submit the Submission Clarification Code (420-DK) of **07** (Medically Necessary) with a non-matching **'AD'** (Additional Drug Needed) in Reason for Service Code (439-E4) along with a Result of Service Code (411-E6) from the above list to override the **ER** conflict code.

DUR Override Documentation

Pharmacies must document the reason for the override. Recommended forms of documentation are:

- a) The pharmacist writes the date, reason for override and his/her signature or initials on the back of the prescription.
- b) If the software permits, comment and electronically store the reason for the override in the patient profile for the specific prescription filled.

4.2 Utilization Threshold (UT) Override (Rev. 05/11)

If you receive a reject because a member is at their Utilization Threshold service limit (refer to message text field, UT codes DN, from [Table 8](#) on page 13.0.1), and you intend to dispense the prescription, you will need to override the UT limit. To submit a UT override, the provider must resubmit the original transaction with an entry in the **Submission Clarification Code** (420-DK) field. If multiple claims are submitted in a single transaction, this field must contain the same value for each claim submitted.

Note: If a UT override is submitted and the member has **not** reached their UT limit, the transaction will be rejected. The following are the only acceptable values to be used in the **Submission Clarification Code** field if requesting a UT override.

- 02** = Other Override - If 02 is indicated a "Threshold Override Application (TOA)" form has been submitted by the physician or other qualified practitioner.
- 07** = Medically Necessary - use to indicate the service is provided as a result of Immediate Urgent Care or Emergency.

7.0 PRO-DUR/ECCA REVERSAL/CANCEL TRANSACTIONS (Rev. 05/11)

This section describes the use of reversal transactions in the Pro-DUR/ECCA system. A reversal transaction is used to cancel or reverse a previously submitted claim that was approved by the Pro-DUR/ECCA system. Reversal transactions can be submitted online up to two years from the service date.

Reversal transactions can only cancel one claim at a time. For example, if four claims were submitted and approved on a single transaction request, four separate reversal transactions would be needed to cancel the entire transaction.

When a reversal transaction is performed on an ECCA transaction that generated a DVS authorization, the DVS authorization is cancelled as well.

The primary matching values used to determine which claim is being canceled are the **Service Provider ID (201-B1)**, **Prescription/Service Reference # (402-D2)**, and **Date of Service (401-D1)**, which were submitted on the original claim. If the reversal is approved, code **021** is returned in the **MEVS Accepted Code**. If no match is found for the reversal, code **045** (No Authorization Found) is returned in the **MEVS Denial Code**.

The following fields are required for a reversal transaction. Please see the Pro-DUR/ECCA Input Information section for a description of these fields.

BIN Number
Version/Release Number
Transaction Code (B2)
Service Provider ID
Service Provider ID Qualifier
Date of Service
Prescription/Service Reference #
Prescription/Service Reference # Qualifier
Processor Control Number (if a paid claim is being reversed)

The following information is returned if the cancel is accepted.

Transaction Response Status (A)
MEVS Response Code (021)

The following information is returned if the cancel was denied.

MEVS Denial Code (R)
Rx Denial Code
Reject Codes (up to 5)

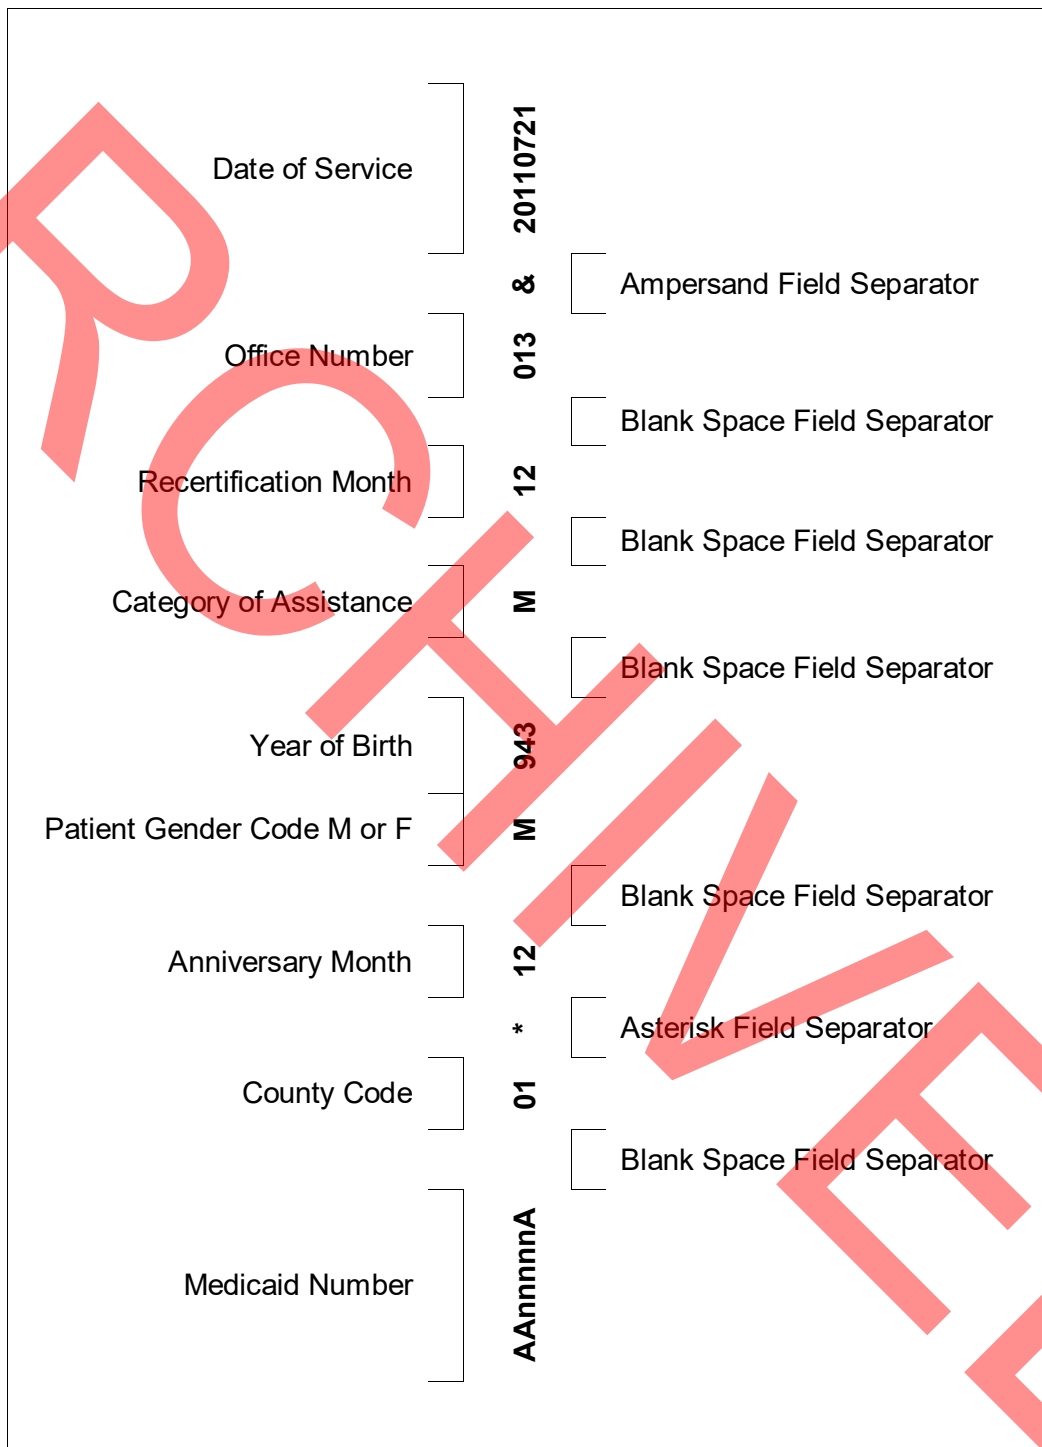

If you need to reverse a previously paid ECCA, paper or electronic batch claim online, you must complete the processor control number field on the reversal transaction. If not completed, the reversal will be rejected with response code 323 (refer to [Table 2](#) codes on page 10.0.1). If you need to reverse a non-ECCA claim, then you may choose to forego entering your processor control number.

8.0 MESSAGE CHARTS (Rev. 09/18)

The following charts are used to illustrate various types of messages you can receive from your transactions. The charts are shown as to content of data. A single chart does not reflect the entire message you will receive in a single response.

9.0 MEVS ACCEPTED CODES - TABLE 1 (Rev. 05/16)

All of the Table 1 codes (except 021) indicate the type of Medicaid eligibility for the member. If the member is Medicaid eligible, a Table 1 code will be returned on each claim transaction even if the transaction is rejected for other reasons. (i.e.: Utilization Threshold, DUR Denial, etc.). An exception to this is if the transaction is rejected for header field errors (Code 999 found in [Table 2](#) on page 10.1) and is not processed through the eligibility modules or an invalid Medicaid ID is entered. Another exception is when a pend reason code from [Table 10](#) is warranted in the response. Table 1 codes are eligibility codes. There are no existing comparable NCPDP codes that are returned with these codes.

Code 021 is not an eligibility status code. It is returned if your transaction to cancel a previously accepted claim has been accepted.

10.0 MEVS DENIAL CODES - TABLE 2 (Rev. 05/16)

All of the following codes are MEVS Denial Codes. Their presence in your response area means the entire transaction has been rejected. If a MEVS Denial Code has a comparable NCPDP Reject Code, both codes will be returned. If there is no comparable code, then NCPDP code 85, "Claim Not Processed" is returned along with the MEVS Code. In those cases, the MEVS Denial Code will further qualify the reason for the claim being rejected. The following chart indicates the relationship between the MEVS Denial Code and any comparable NCPDP Reject Code, if one applies.

Code 999 will be returned if any invalid data is entered in the NCPDP required header fields. For example, an entry of 05 in the **Transaction Code** field will result in an MEVS Denial Code 999 being returned since it exceeds the number of claims authorized to be sent in a transaction. Also included is a description and relevant comments about the code.

13.0 PHARMACY UT CODES - TABLE 8 (Rev. 05/11)

The following table defines the UT Code values provided in the Additional Message Info segment (526-FQ).

| CODE | DESCRIPTION | APPROVAL OR DENIAL | PROCESSING RESULTS DESCRIPTION |
|------|-------------------------|--------------------|--------------------------------|
| AN | UT Approved | A | UT Counted |
| DN | UT At Service Limits | D | UT Not Counted |
| LN | UT Approved Near Limits | A | UT Counted |
| NN | UT Not Invoked | A | UT Exempt |
| PN | UT Override Denied | D | UT Not Counted |
| XX | DUR Denial | D | UT Not Counted |

Table 8 codes were formulated to return a code relevant to the Utilization Threshold (UT) program. A code value with a processing result of UT Counted or UT Exempt indicates there are sufficient UT units available for the transaction submitted.

Note: A Table 8 code is returned in every response even if the claim is rejected.

The third column in Table 8 lists the approval (A) or denial (D) status of each code.

The fourth column in Table 8 indicates whether service authorization requirements were satisfied.

Not invoked means that the claim did not have to be processed through the UT program.

If the claim is denied for DUR (Code XX), the UT status code will not be displayed because the UT approval has been negated by the DUR denial.
