

ePACES – Replicating a Claim for a New Client

Submitters now have the ability to replicate a claim and change the Client ID if they are billing for the same services on the same date of service. This is very helpful when it comes time to bill for the Flu shot. If a claim is in a Sent or Complete status, the user can replicate the claim and change the Client ID. The provider clicks on FIND CLAIMS from their left-hand menu and finds the claim that they want to replicate.

Enter the new Client ID Number (CIN) and click “GO” next to the CIN. Change the patient control number if applicable. The user then has the ability to click on the rest of tabs to make any other changes needed on their claim. After the submitter is satisfied with the changes in the claim, they may submit the claim just as they did with the original claim.
