

## Backup Power Wheelchair Repairs

Effective January 1, 2026 for Fee-for-Service (FFS) and March 1, 2026 for Managed Care, in limited instances, [Group 2, Group 3, Group 4, Group 5, and Group 6](#) power wheelchairs (PWC) with or without power options, will be eligible for use as a backup power wheelchair when the user has been provided with a new, primary PWC. This backup PWC will allow the member to maintain independent mobility when the primary PWC is being repaired or when a backup manual wheelchair or suitable loaner wheelchair that would meet the member's medical needs cannot be provided.

### Overview:

<u>Eligible wheelchairs</u>	Group 2 and up power wheelchairs that had been previously used as the member's primary source of mobility	
<u>HCPCS Code for Repair</u>	K0899	Repair of any backup power wheelchair regardless of group or code at purchase
<u>Modifier/Description</u>	TW – "Back-up equipment"	Indication that a PWC is a backup device is signified by using code K0899 and adding the TW modifier
<u>Method of Authorization</u>	Direct Bill	Limited to \$5000 over a period of 5 years (PA required for total amounts exceeding \$5000 or wheelchairs greater than 10 years old.)

### Details:

Please note: During repairs of Group 1 primary power wheelchairs, users should obtain a backup manual wheelchair, a temporary rental, or a loaner PWC from the DME provider.

Any repairs to a backup PWC:

- Should be indicated by using code K0899 and the modifier, **TW**.
- Repairs can be directly billed up to a limit of \$5000 over a period of five years.
- Additional repairs, or repairs to a PWC that has been used as a backup for more than 5 years would be reviewed on a case-by-case basis via prior approval. Only one backup PWC will be covered.
- Preventative maintenance is not applicable to backup PWCs.
- Labor costs would also fall under code K0899 with modifier. K0739 should not be billed for backup PWC repairs.

**Requirements:**

- The backup PWC should accommodate the seating and positioning components from the primary PWC to be used interchangeably. See page 37 and 38 of the [DME Procedure Code & Coverage Guidelines](#) manual.
- New PWCs should not be requested if the intended use is as a backup PWC.
- Lack of a backup PWC would cause undue hardship when the member's primary PWC is being repaired.
- The member must have adequate storage space for both power wheelchairs to be kept inside and away from the elements.
- Backup PWCs should not be used as a primary chair unless there is documented failure of the primary chair.
- The backup PWC must be used by only one person and cannot be transferred to someone else

Repairs to features that were not approved at initial issue and/or not included in the original configuration of the PWC will not be considered medically necessary. New features on the primary PWC will not be retro-fit to the backup

**Documentation:**

The authorized power wheelchair supplier must document and maintain all records of repairs to the current primary and backup power wheelchair. All documentation must be maintained for a minimum of 6 years and should be available when requested by the NYS Department of Health. (See 18 NYCRR § 504.3(a)) or upon audit.

- Documentation should confirm that, given the requested repair, the retired primary PWC would be a safe and suitable backup PWC when the new primary PWC is being serviced.
- Documentation for all repairs must include the serial number of the wheelchair, funding source, and date of purchase.
- The provider must document that the repairs are necessary for the backup PWC to be safe and effectively used.
