

## New Codes Available for Audiologists

Effective for dates of service on and after October 1, 2009, three new codes are available for billing by audiologists. These codes are direct bill and do not require a prior approval.

Audiologic Function Tests	
92579	Visual Reinforcement Audiometry (VRA)
92587	Evoked otoacoustic emissions: limited (single stimulus level, either transient or distortion products)
92588	Comprehensive or diagnostic evaluation (comparison of transient and/or distortion product otoacoustic emissions at multiple levels and frequencies)
