

# **NYRx BLTG Program Update**

### What Pharmacy Providers and Prescribers Need to Know

Effective **December 14, 2023**, the following changes will be made to the Dispense Brand Name Drug When Less Expensive Than the Generic Program:

- Advair HFA®, Dymista®, Pennsaid® pump, Ritalin LA®, Vyvanse® capsule, Vyvanse® chewable tablet, and Xopenex HFA® will be ADDED to the program.
- Concerta®, Ciprodex®, and Viibryd® will be REMOVED from the program.

In conformance with State Education Law, a pharmacist shall dispense a less expensive, therapeutically equivalent drug containing the same active ingredients, dosage form, and strength as the drug prescribed/ordered. This includes substituting the brand name drug when NYRx has determined it to be the less expensive alternative for the patient. Brand name drugs included in this program:

- Do not require "Dispense as Written" (DAW) or "Brand Medically Necessary" on the prescription.
- Have a generic copayment.
- Are paid at the Brand Name Drug reimbursement rate or usual and customary price, whichever is lower (SMAC/FUL are not applied).
- Do not require a new prescription if the drug is removed from this program.

## **Important Billing Information**

Pursuant to this program, prescription claims submitted to the Medicaid program **do not require** the submission of a DAW Product Selection Code of "1"; Pharmacies should **submit DAW code 9** (Substitution Allowed by Prescriber but Plan Requests Brand). Pharmacies will receive an NCPDP reject response of "22" which means missing/invalid DAW code if other DAW codes are submitted. The only exception to this is DAW code "1" and "Brand Medically Necessary" on the prescription.

For a complete list, see <u>NYRx BLTG Program Brand Name Drugs</u> on the next page.

## **NYRx BLTG Drugs**

NYRx BLTG Program Brand Name Drugs*
