

NYRx Brand Less Than Generic Program Update

What Pharmacy Providers and Prescribers Need to Know

Effective **November 21, 2024**, the following changes will be made to the Dispense Brand Name Drug When Less Expensive Than the Generic Program:

- **Forteo®**, **Sandostatin LAR®**, **Sprycel®**, and **Zavesca®** will be **ADDED** to the program.
- **Kombiglyze® XR**, **Nascobal®**, and **Vascepa®** will be **REMOVED** from the program.

In conformance with State Education Law, a pharmacist shall dispense a less expensive, therapeutically equivalent drug containing the same active ingredients, dosage form, and strength as the drug prescribed/ordered. This includes substituting the brand name drug when NYRx has determined it to be the least expensive alternative for the patient. Brand name drugs included in this program:

- Do not require "Dispense as Written" (DAW) or "Brand Medically Necessary" on the prescription.
- Have a generic copayment.
- Are paid at the Brand Name Drug reimbursement rate or usual and customary price, whichever is lower (SMAC/FUL are not applied).
- Do not require a new prescription if the drug is removed from this program.

Important Billing Information

Pursuant to this program, prescription claims submitted to the Medicaid program **do not require** the submission of a DAW Product Selection Code of "1"; Pharmacies should **submit DAW code 9** (Substitution Allowed by Prescriber but Plan Requests Brand). Pharmacies will receive an NCPDP reject response of "22" which means missing/invalid DAW code if other DAW codes are submitted. The only exception to this is DAW code "1" and "Brand Medically Necessary" on the prescription.

For a complete list, see [NYRx Brand Less Than Generic Drugs](#) on the next page.

NYRx Brand Less Than Generic Drugs

List of Brand Name Drugs included in this program**
