

NYRx Brand Less Than Generic Program Update

What Pharmacy Providers and Prescribers Need to Know

Effective **June 12, 2025**, the following changes will be made to the Dispense Brand Name Drug When Less Expensive Than the Generic Program:

- **Anoro Ellipta®**, **Motegrity®**, and **Promacta® tablets** will be **ADDED** to the program.
- **Glumetza®** and **Xopenex HFA®** will be **REMOVED** from the program. Glumetza® is being removed as it has been discontinued by the manufacturer.

In conformance with State Education Law, a pharmacist shall dispense a less expensive, therapeutically equivalent drug containing the same active ingredients, dosage form, and strength as the drug prescribed/ordered. This includes substituting the brand name drug when NYRx has determined it to be the less expensive alternative for the patient. Brand name drugs included in this program:

- Do not require "Dispense as Written" (DAW) or "Brand Medically Necessary" on the prescription.
- Have a generic copayment.
- Are paid at the Brand Name Drug reimbursement rate or usual and customary price, whichever is lower (SMAC/FUL are not applied).
- Do not require a new prescription if the drug is removed from this program.

Important Billing Information

Pursuant to this program, prescription claims submitted to the Medicaid program **do not require** the submission of a DAW Product Selection Code of "1"; Pharmacies should **submit DAW code 9** (Substitution Allowed by Prescriber but Plan Requests Brand). Pharmacies will receive an NCPDP reject response of "22" which means missing/invalid DAW code if other DAW codes are submitted. The only exception to this is DAW code "1" and "Brand Medically Necessary" on the prescription.

Prior authorization is **only** available for generics of brand medications if one of the following is met:

- Member is allergic to an **inactive** ingredient in the brand medication
- Brand medication in on a confirmed backorder by the manufacturer
- Member has a better therapeutic outcome with the generic product compared to the brand name product.

The pharmacy should dispense the brand name product and NOT submit a prior authorization request to the provider's office for a generic of a BLTG drug unless one of the above conditions is met.

For a complete list, see [NYRx BLTG Program Brand Name Drugs](#) on the next page.

NYRx BLTG Drugs

NYRx BLTG Program Brand Name Drugs*
