GENERAL INSTRUCTIONS

Fees listed in the Radiology Fee Schedule represent maximum allowances for reimbursement purposes in the Medical Assistance Program and include the administrative, technical and professional components of the service provided. (See below for further reference to the administrative, technical and professional components of a radiology fee item.)

Fees are to be considered as payment for the complete radiological procedure, unless otherwise indicated. In order to be paid for both the professional and the technical and administrative components of the radiology service, qualified practitioners who provide radiology services in their offices must perform the professional component of radiology services and own or directly lease the equipment and must supervise and control the radiology technician who performs the radiology procedures; or be the employees of physicians who own or directly lease the equipment and must supervise and control the radiology technician who performs the radiology procedures. NY Medicaid does not enroll offsite radiologists for the sole purpose of professional component billing.

Each State agency may determine, on an individual basis, fees for services or procedures not included in this fee schedule. Such fee determinations should be reported promptly to the Division of Health Care Financing of the State Department of Health for review by the Interdepartmental Committee on Health Economics for possible incorporation in the Radiology Fee Schedule.

RADIOLOGY PRIOR APPROVAL (underlined procedure codes)

Information for Ordering Providers-

If you are ordering a CT, CTA, MRI, MRA, Cardiac Nuclear, or PET procedure, you or your office staff are required to obtain an approval number through the RadConsult program. Requests will be reviewed against guidelines, and a prior approval number will be issued.

If you also provide in-office radiology imaging, you are asked to confirm that RadConsult has processed and approved the procedure request before scheduling an appointment. This will ensure payment of the claims you submit for services.

Using a secure login, you will have the ability to access RadConsult Online or call the RadConsult contact center to check the status of procedure requests.

Beneficiaries who are eligible for both Medicaid and Medicare (dual eligible) or beneficiaries who are enrolled in a managed care plan are not included.

Information for Radiology Providers-

If you are performing a CT, CTA, MRI, MRA, Cardiac Nuclear, or PET procedure, you must verify that an approval has been obtained before performing these diagnostic imaging services for New York Medicaid FFS. Approvals will be required for claims payment. Failure to obtain an approval number may delay or prevent payment of a claim.

Additional information is available at

http://www.emedny.org/ProviderManuals/Radiology/index.html
TECHNICAL, ADMINISTRATIVE AND PROFESSIONAL RADIOLOGY COMPONENTS

The professional component (see modifier -26) for radiological services is intended to cover professional services, when applicable, as listed below:

1. Determination of the problem, including interviewing the patient, obtaining the history and making appropriate physical examination to determine the method of performing the radiologic procedure.
2. Study and evaluation of results obtained in diagnostic or therapeutic procedures, interpretation of radiographs or radioisotope data estimation resultant from treatment.
4. Consultation with referring physician regarding results of diagnostic or therapeutic procedures.

The technical or administrative component (see modifier -TC) includes items such as: cost or charges for technologists, clerical staff, films, opaques, radioactive materials, chemicals, drugs or other materials, purchase, rental use or maintenance of space, equipment, telephone services or other facilities or supplies.

Certain radiological procedures require the performance of a medical or surgical procedure (eg, studies necessitating an injection of radiopaque media, fluoroscopy, consultation) which must be performed by the radiologist and is not separable into technical and professional components for billing purposes. In these instances, the total fee listed in the Medicine or Surgery Services Fee Schedule is applicable.
GENERAL RULES AND INFORMATION

General rules which apply to all procedure codes in the Radiology Services Fee Schedule sections of Diagnostic Radiology, Diagnostic Ultrasound, Radiation Oncology and Nuclear Medicine are as follows:

1. Dollar values include usual contrast media, equipment and materials. An additional charge may be warranted when special surgical trays and materials are provided by the physician.

2. Dollar values include consultation and a written report to the referring physician.

3. When multiple X-ray examinations are performed during the same visit, reimbursement shall be limited to the greater fee plus 60% of the lesser fee(s). When more than one part of the body is included in a single X-ray for which reimbursement is claimed, the charge shall be only for a single X-ray. When bilateral X-ray examinations are performed during the same visit, reimbursement shall be limited to 160% of the procedure value (see modifier -50). The above provisions regarding fee reductions for multiple X-rays are applicable to X-rays taken of all parts of the body.

4. When repeat X-ray examinations of the same part and for the same illness are required because of technical or professional error in the original X-rays, such repeat X-rays are not eligible for payment. (See Rule 5 below.)

5. When repeat X-ray examination of the same part and for the same illness is required for reasons other than technical or professional error in the original X-ray. It should be identified by use of modifier -76.

6. RADIOLOGICAL SUPERVISION AND INTERPRETATION CODES: The Maximum fee is applicable when the physician incurs the costs of both the technical /administrative and professional components of the imaging procedure. (For the professional component of radiologic procedures, see modifier -26). When a procedure is performed by two physicians, the radiologic portion of the procedure is designated as "radiological supervision and interpretation." When a physician performs both the procedure and provides imaging supervision and interpretation, a combination of procedure codes outside the 70000 series and imaging supervision and interpretation codes are to be used.

7. BY REPORT: A service that is rarely provided, unusual, variable, or new may require a special report in determining medical appropriateness of the service. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure, and the time, effort and equipment necessary to provide the service. Additional items which may be included are: complexity of symptoms, final diagnosis, pertinent physical findings (such as size, locations, and number of lesion(s), if appropriate), diagnostic and therapeutic procedures including major and supplementary surgical procedures, if appropriate), concurrent problems, and follow-up care.
When the value of a procedure is to be determined "By Report" (BR), information concerning the nature, extent and need for the procedure or service must be furnished in addition to the time, skill and equipment necessitated. Appropriate documentation (eg, procedure description, itemized invoices, etc) should accompany all claims submitted.

Itemized invoices must document acquisition cost, the line item cost from a manufacturer or wholesaler net of any rebates, discounts or other valuable considerations.

8. **SEPARATE PROCEDURES**: Some of the listed procedures are commonly carried out as an integral part of a total service, and as such, do not warrant a separate identification. When, however, such a procedure is performed independently of, and is not immediately related to, other services, it may be listed as a "separate procedure." Thus, when a procedure that is ordinarily a component of a larger procedure is performed alone for a specific purpose, it may be reported as a separate procedure.

9. **FEES**: The fees are listed in the Physician Radiology Fee Schedule, available at [http://www.emedny.org/ProviderManuals/Physician/index.html](http://www.emedny.org/ProviderManuals/Physician/index.html)

Listed fees are the maximum reimbursable Medicaid fees. Fees for the MOMS Program can be found in the Enhanced Program fee schedule.

10. For additional general billing guidelines see the current CTP manual.
MMIS RADIOLOGY MODIFIERS

Note: NCCI associated modifiers are recognized for NCCI code pairs/related edits. For additional information please refer to the CMS website: http://www.cms.hhs.gov/NationalCorrectCodInitEd/

-26 Professional Component: Certain procedures are a combination of a physician component and a technical component. When the physician component is reported separately, the service may be identified by adding the modifier -26 to the usual procedure number.

-50 Bilateral Procedures (X-ray): Unless otherwise identified in the listing, when bilateral X-ray examinations are performed at the same time, the service will be identified by adding the modifier -50 to the usual procedure code number. (Reimbursement will not exceed 160% of the maximum State Medical Fee Schedule amount. One claim line is to be billed representing the bilateral procedure. Amount billed should reflect total amount due.)

-76 Repeat Procedure by Same Physician: The physician may need to indicate that a procedure or service was repeated subsequent to the original procedure or service. (When a repeat X-ray examination of the same part and for the same illness is required for reasons other than technical or professional error in the original X-ray, it will be identified by adding modifier -76.) (Reimbursement will not exceed 100% of the maximum State Medical Fee Schedule amount.)

-AQ Physician Providing a Service in an Unlisted Health Professional Shortage Area (HPSA)

-FP Service Provided as Part of Family Planning Program: All Family Planning Services will be identified by adding the modifier -FP to the usual procedure code number. (Reimbursement will not exceed 100% of the maximum State Medical Fee Schedule amount.)

-LT Left Side (used to identify procedures performed on the left side of the body): Add modifier –LT to the usual procedure code number. (Reimbursement will not exceed 100% of the Maximum Fee Schedule amount. One claim line should be billed.) (Use modifier –50 when both sides done at same operative session.)

-RT Right Side (used to identify procedures performed on the right side of the body): Add modifier –RT to the usual procedure code number. (Reimbursement will not exceed 100% of the Maximum Fee Schedule amount. One claim line should be billed.) (Use modifier –50 when both sides done at same operative session.)

-TC Technical Component: Under certain circumstances, a charge may be made for the technical component alone. Under those circumstances the technical component charge is identified by adding modifier -TC to the usual procedure number. Technical component charges are institutional charges and not billed separately by physicians.
HEAD AND NECK

70010  Myelography, posterior fossa, radiological supervision and interpretation
70015  Cisternography, positive contrast, radiological supervision and interpretation
70030  Radiologic examination, eye, for detection of foreign body
70100  Radiologic examination, mandible; partial, less than four views
70110  complete, minimum of four views
70120  Radiologic examination, mastoids; less than three views per side
70130  complete, minimum of three views per side
70134  Radiologic examination, internal auditory meati, complete
70140  Radiologic examination, facial bones; less than three views
70150  complete, minimum of three views
70160  Radiologic examination, nasal bones, complete, minimum of three views
70170  Dacryocystography, nasolacrimal duct, radiological supervision and interpretation
70190  Radiologic examination; optic foramina
70200  orbits, complete, minimum of four views
70210  Radiologic examination, sinuses, paranasal, less than three views
70220  complete, minimum of three views
70240  Radiologic examination, sella turcica
70250  Radiologic examination, skull; less than four views
70260  complete, minimum of four views
70300  Radiologic examination, teeth; single view
70310  partial examination, less than full mouth
70320  complete, full mouth
70328  Radiologic examination, temporomandibular joint, open and closed mouth; unilateral
70330  bilateral
70332  Temporomandibular joint arthrography, radiological supervision and interpretation
    (Do not report 70332 in conjunction with 77002)
70336  Magnetic resonance (eg, proton) imaging, temporomandibular joint(s)
70350  Cephalogram, orthodontic
70355  Orthopantogram (eg, panoramic x-ray)
70360  Radiologic examination; neck, soft tissue
70370  pharynx or larynx, including fluoroscopy and/or magnification technique
70371  Complex dynamic pharyngeal and speech evaluation by cine or video recording
70380  Radiologic examination, salivary gland for calculus
70390  Sialography, radiological supervision and interpretation
70450  Computed tomography, head or brain; without contrast material
70460  with contrast material(s)
70470  without contrast material, followed by contrast material(s) and further sections
70480  Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without
    contrast material
70481  with contrast material(s)
70482  without contrast material, followed by contrast material(s) and further sections
70486  Computed tomography, maxillofacial area; without contrast material

material(s)

**SPINE AND PELVIS**

(IV injection of contrast material is part of the CT procedure)

72020  Radiologic examination, spine, single view, specify level
72040  Radiologic examination, spine, cervical; 2 or 3 views
72050  4 or 5 views
72052  6 or more views
72070  Radiologic examination, spine; thoracic, two views
72072  thoracic, three views
72074  thoracic, minimum of four views
72080  thoracolumbar junction, minimum of 2 views
72081  Radiologic examination, spine, entire thoracic and lumbar, including
skull, cervical and sacral spine if performed (eg, scoliosis evaluation);
one view
72082  2 or 3 views
72083  4 or 5 views
72084  minimum of 6 views
72100  Radiologic examination, spine, lumbosacral; two or three views
72110  minimum of four views
72114  complete, including bending views, minimum of 6 views
72120  bending views only, 2 or 3 views
72125  Computed tomography, cervical spine; without contrast material
72126  with contrast material(s)
72127  without contrast material, followed by contrast material(s) and further sections
72128  Computed tomography, thoracic spine; without contrast material
72129  with contrast material(s)
72130  without contrast material, followed by contrast material(s) and further sections
72131  Computed tomography, lumbar spine; without contrast material
72132  with contrast material(s)
72133  without contrast material, followed by contrast material(s) and further sections
72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material
72142 with contrast material(s)
72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material
72147 with contrast material(s)
72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material
72149 with contrast material(s)
72156 Magnetic resonance (eg, proton) imaging, spinal canal and contents, without contrast material, followed by contrast material(s) and further sequences; cervical
72157 thoracic
72158 lumbar
72159 Magnetic resonance angiography, spinal canal and contents, with or without contrast material(s)
72170 Radiologic examination, pelvis; one or two views
72190 complete, minimum of three views
72191 Computed tomographic angiography, pelvis, with contrast material(s), including non-contrast images, if performed, and image postprocessing
72192 Computed tomography, pelvis; without contrast material
72193 with contrast material(s)
72194 without contrast material, followed by contrast material(s) and further sections
72195 Magnetic resonance (eg, proton) imaging, pelvis; without contrast material(s)
72196 with contrast material(s)
72197 without contrast material(s), followed by contrast material(s) and further sequences
72198 Magnetic resonance angiography, pelvis, with or without contrast material(s)
72200 Radiologic examination, sacroiliac joints; less than three views
72202 three or more views
72220 Radiologic examination, sacrum and coccyx, minimum of two views
72240 Myelography, cervical, radiological supervision and interpretation
72255 Myelography, thoracic, radiological supervision and interpretation
72265 Myelography, lumbosacral, radiological supervision and interpretation
72270 Myelography, two or more regions (eg, lumbar/thoracic, cervical/thoracic, lumbar/cervical, lumbar/thoracic/cervical), radiological supervision and interpretation
72275 Epidurography, radiological supervision and interpretation
(72275 includes 77003)
(Use 72275 only when an epidurogram is performed, images documented and a formal radiologic report is issued)
72285 Discography, cervical or thoracic, radiological supervision and interpretation
72295 Discography, lumbar, radiological supervision and interpretation

(Report 74176, 74177, or 74178 only once per CT abdomen and pelvis examination)

74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)
74182 with contrast material(s)
74183 without contrast material(s), followed by contrast material(s) and further sequences
74185 Magnetic resonance angiography, abdomen; with or without contrast material(s)
74190 Peritoneogram (eg, after injection of air or contrast), radiological supervision and interpretation

**GASTROINTESTINAL TRACT**

74210 Radiologic examination, pharynx and/or cervical esophagus, including scout neck radiograph(s) and delayed image(s), when performed, contrast (eg, barium) study
74220 Radiologic examination, esophagus, including scout chest radiograph(s) and delayed image(s), when performed; single-contrast (eg, barium study)
74221 double-contrast (eg, high-density barium and effervescent agent) study
74230 Radiologic examination, swallowing function, with cineradiography/videoradiography, including scout neck radiograph(s) and delayed image(s), when performed, contrast (eg, barium) study
74240 Radiologic examination, upper gastrointestinal tract, including scout abdominal radiograph(s) and delayed image(s), when performed; single-contrast (eg, barium) study
74246 double-contrast (eg, high-density barium and effervescent agent) study, including glucagon, when administered
74250 Radiologic examination, small intestine, including multiple serial images and scout abdominal radiograph(s), when performed; single contrast (eg, barium) study
74251 double-contrast (eg, high-density barium and air via enteroclysis tube) study, including glucagon, when administered
74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material
74262 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; with contrast material
74263 Computed tomographic (CT) colonography, screening, including image postprocessing
74270 Radiologic examination, colon, including scout abdominal radiograph(s) and delayed image(s), when performed; single-contrast (eg, barium) study
74280 double-contrast (eg, high density barium and air) study, including glucagon, when administered
74283 Therapeutic enema, contrast or air, for reduction of intussusception or other intraluminal obstruction (eg, meconium ileus)
74290 Cholecystography, oral contrast;
74300  Cholangiography and/or pancreatography; intraoperative, radiological supervision and interpretation
74301  additional set intraoperative, radiological supervision and interpretation
    (List separately in addition to primary procedure)
    (Use 74301 in conjunction with 74300)
74328  Endoscopic catheterization of the biliary ductal system, radiological supervision and interpretation
74329  Endoscopic catheterization of the pancreatic ductal system, radiological supervision and interpretation
74330  Combined endoscopic catheterization of the biliary and pancreatic ductal systems, radiological supervision and interpretation
74340  Introduction of long gastrointestinal tube (eg, Miller-Abbott), including multiple fluoroscopies and images, radiological supervision and interpretation
74355  Percutaneous placement of enteroclysis tube, radiological supervision and interpretation
74360  Intraluminal dilation of strictures and/or obstructions (eg, esophagus), radiological supervision and interpretation
74363  Percutaneous transhepatic dilation of biliary duct stricture with or without placement of stent, radiological supervision and interpretation

**URINARY TRACT**

74400  Urography (pyelography), intravenous, with or without KUB, with or without tomography;
74410  Urography, infusion, drip technique and/or bolus technique;
74415  with nephrotomography
74420  Urography, retrograde, with or without KUB
74425  Urography, antegrade, (pyelostogram, nephrostogram, loopogram), radiological supervision and interpretation
74430  Cystography, minimum of three views, radiological supervision and interpretation
74440  Vasography, vesiculography, or epididymography, radiological supervision and interpretation
74445  Corpora cavernosography, radiological supervision and interpretation
74450  Urethrocystography, retrograde, radiological supervision and interpretation
74455  Urethrocystography, voiding, radiological supervision and interpretation
74470  Radiologic examination, renal cyst study, translumbar, contrast visualization, radiological supervision and interpretation
74485  Dilation of ureter(s) or urethra, radiological supervision and interpretation

**GYNECOLOGICAL AND OBSTETRICAL**

74710  Pelvimetry, with or without placental localization
74712  Magnetic resonance imaging (eg, proton) imaging, fetal, including placental and maternal pelvic imaging when performed; single or first gestation
74713  each additional gestation (list separately in addition to code for primary procedure)
74740  Hysterosalpingography, radiological supervision and interpretation
74742  Transcervical catheterization of fallopian tube, radiological supervision and interpretation
74775  Perineogram (eg, vaginogram, for sex determination or extent of anomalies)
HEART

Cardiac magnetic imaging differs from traditional magnetic resonance imaging (MRI) in its ability to provide a physiologic evaluation of cardiac function. Traditional MRI relies on static images to obtain clinical diagnoses based upon anatomic information. Improvement in spatial and temporal resolution has expanded the application from an anatomic test and includes physiologic evaluation of cardiac function. Flow and velocity assessment for valves and intracardiac shunts is performed in addition to a function and morphologic evaluation. Use 75559 with 75565 to report flow with pharmacologic wall motion stress evaluation without contrast. Use 75563 with 75565 to report flow with pharmacologic perfusion stress with contrast.

Listed procedures may be performed independently or in the course of overall medical care. If the physician providing these services is also responsible for diagnostic workup and/or follow-up care of the patient, see appropriate sections also. Only one procedure in the series 75557-75563 is appropriately reported per session. Cardiac MRI studies may be performed at rest and/or during pharmacologic stress. Therefore, the appropriate stress testing code from the 93015-93018 series should be reported in addition to 75559 or 75563.

75557  Cardiac magnetic resonance imaging for morphology and function without contrast material;  
75559   with stress imaging  
75561  Cardiac magnetic resonance imaging for morphology and function without contrast material(s), followed by contrast material(s) and further sequences;  
75563   with stress imaging  
75565  Cardiac magnetic resonance imaging for velocity flow mapping  
(List separately in addition to code)  
75574  Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)

VASCULAR PROCEDURES

AORTA AND ARTERIES

Selective vascular catheterizations should be coded to include introduction and all lesser order selective catheterizations used in the approach (e.g., the description for a selective right middle cerebral artery catheterization includes the introduction and placement catheterization of the right common and internal carotid arteries).

Additional second and/or third order arterial catheterizations within the same family of arteries supplied by a single first order artery should be expressed by 36218 or 36248. Additional first order or higher catheterizations in vascular families supplied by a first order vessel different from a previously selected and coded family should be separately coded using the conventions described above.

75600  Aortography, thoracic, without serialography, radiological supervision and interpretation

Page 17 of 40
75605 Aortography, thoracic, by serialography, radiological supervision and interpretation
75625 Aortography, abdominal, by serialography, radiological supervision and interpretation
75630 Aortography, abdominal plus bilateral iliofemoral lower extremity, catheter, by serialography, radiological supervision and interpretation
75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing
75705 Angiography, spinal, selective, radiological supervision and interpretation
75710 Angiography, extremity, unilateral, radiological supervision and interpretation
75716 Angiography, extremity, bilateral, radiological supervision and interpretation
75726 Angiography, visceral; selective or supraselective, (with or without flush aortogram), radiological supervision and interpretation
75731 Angiography, adrenal, unilateral, selective, radiological supervision and interpretation
75733 Angiography, adrenal, bilateral, selective, radiological supervision and interpretation
75736 Angiography, pelvic, selective or supraselective, radiological supervision and interpretation
75741 Angiography, pulmonary, unilateral, selective, radiological supervision and interpretation
75743 Angiography, pulmonary, bilateral, selective, radiological supervision and interpretation
75746 Angiography, pulmonary, by nonselective catheter or venous injection, radiological supervision and interpretation
75756 Angiography, internal mammary, radiological supervision and interpretation
75774 Angiography, selective, each additional vessel studied after basic examination, radiological supervision and interpretation
(List separately in addition to primary procedure)
(Use 75774 in addition to code for specific initial vessel studied)

VEINS AND LYMPHATICS

75801 Lymphangiography, extremity only, unilateral, radiological supervision and interpretation
75803 Lymphangiography, extremity only, bilateral, radiological supervision and interpretation
75805 Lymphangiography, pelvic/abdominal, unilateral, radiological supervision and interpretation
75807 Lymphangiography, pelvic/abdominal, bilateral, radiological supervision and interpretation
75809 Shuntogram for investigation of previously placed indwelling nonvascular shunt (eg, LeVeen shunt, ventriculoperitoneal shunt, indwelling infusion pump), radiological supervision and interpretation
75810 Splenoportography, radiological supervision and interpretation
75820 Venography, extremity, unilateral, radiological supervision and interpretation
75822 Venography, extremity, bilateral, radiological supervision and interpretation
75825 Venography, caval, inferior, with serialography, radiological supervision and interpretation
75827 Venography, caval, superior, with serialography, radiological supervision and interpretation
75831 Venography, renal, unilateral, selective, radiological supervision and interpretation
75833 Venography, renal, bilateral, selective, radiological supervision and interpretation
75840 Venography, adrenal, unilateral, selective, radiological supervision and interpretation
75842 Venography, adrenal, bilateral, selective, radiological supervision and interpretation
75860 Venography, venous sinus (eg, petrosal and inferior sagittal) or jugular, catheter, radiological supervision and interpretation
75870  Venography, superior sagittal sinus, radiological supervision and interpretation
75872  Venography, epidural, radiological supervision and interpretation
75880  Venography, orbital, radiological supervision and interpretation
75885  Percutaneous transhepatic portography with hemodynamic evaluation, radiological supervision and interpretation
75887  Percutaneous transhepatic portography without hemodynamic evaluation, radiological supervision and interpretation
75889  Hepatic venography, wedged or free, with hemodynamic evaluation, radiological supervision and interpretation
75891  Hepatic venography, wedged or free, without hemodynamic evaluation, radiological supervision and interpretation
75893  Venous sampling through catheter, with or without angiography (eg, for parathyroid hormone, renin), radiological supervision and interpretation

**TRANSCATHETER PROCEDURES**

75894  Transcatheter therapy, embolization, any method, radiological supervision and interpretation
75898  Angiography through existing catheter for follow-up study for transcatheter therapy, embolization or infusion, other than for thrombolysis
75901  Mechanical removal of pericatheter obstructive material (eg, fibrin sheath) from central venous device via separate venous access, radiologic supervision and interpretation
75902  Mechanical removal of intraluminal (intracatheter) obstructive material from central venous device through device lumen, radiologic supervision and interpretation
75956  Endovascular repair of descending thoracic aorta (eg, aneurysm, pseudoaneurysm, dissection, penetrating ulcer, intramural hematoma, or traumatic disruption); involving coverage of left subclavian artery origin, initial endoprosthesis plus descending thoracic aortic extension(s), if required, to level of celiac artery origin, radiological supervision and interpretation
75957  not involving coverage of left subclavian artery origin, initial endoprosthesis plus descending thoracic aortic extension(s), if required, to level of celiac artery origin, radiological supervision and interpretation
75958  Placement of proximal extension prosthesis for endovascular repair of descending thoracic aorta (eg, aneurysm, pseudoaneurysm, dissection, penetrating ulcer, intramural hematoma, or traumatic disruption), radiological supervision and interpretation (Report 75958 for each proximal extension)
75959  Placement of distal extension prosthesis(s) (delayed) after endovascular repair of descending thoracic aorta, as needed, to level of celiac origin, radiological supervision and interpretation (Do not report 75959 in conjunction with 75956, 75957) (Report 75959 once, regardless of number of modules deployed)
75970  Transcatheter biopsy, radiological supervision and interpretation
75984  Change of percutaneous tube or drainage catheter with contrast monitoring (eg, genitourinary system, abscess), radiological supervision and interpretation
75989 Radiological guidance (ie, fluoroscopy, ultrasound or computed tomography), for percutaneous drainage (eg, abscess or specimen collection), with placement of catheter, radiological supervision and interpretation

**OTHER PROCEDURES**

76000 Fluoroscopy (separate procedure), up to 1 hour physician or other qualified health care professional time
76010 Radiologic examination from nose to rectum for foreign body, single view, child
76080 Radiologic examination, abscess, fistula or sinus tract study, radiological supervision and interpretation
76098 Radiological examination, surgical specimen
76100 Radiological examination, single plane body section (eg, tomography), other than with urography
76101 Radiologic examination, complex motion (ie, hypercycloidal) body section (eg, mastoid polytomography), other than with urography; unilateral
76102 bilateral
76120 Cineradiography/videoradiography, except where specifically included
76125 Cineradiography/videoradiography, to complement routine examination (List separately in addition to primary procedure)
76140 Consultation on X-ray examination made elsewhere, written report
76376 3D rendering with interpretation and reporting of computed tomography, magnetic resonance imaging, ultrasound, or other tomographic modality with image postprocessing under concurrent supervision; not requiring image postprocessing on an independent workstation (Use 76376 in conjunction with code[s] for base imaging procedure[s])
76377 requiring image postprocessing on an independent workstation (Use 76377 in conjunction with code(s) for base imaging procedure[s])
76380 Computed tomography, limited or localized follow-up study
76496 Unlisted fluoroscopic procedure (eg, diagnostic, interventional)
76497 Unlisted computed tomography procedure (eg, diagnostic, interventional)
76498 Unlisted magnetic resonance procedure (eg, diagnostic, interventional)
76499 Unlisted diagnostic radiographic procedure
G0297 Low-dose computer tomography for lung cancer screening

**DIAGNOSTIC ULTRASOUND**

All diagnostic ultrasound examinations require permanently recorded images with measurements, when such measurements are clinically indicated. For those codes whose sole diagnostic goal is a biometric measure (ie, 76514, 76516, and 76519), permanently recorded images are not required. A final, written report should be issued for inclusion in the patient’s medical record. The prescription form for the intraocular lens satisfies the written report requirement for 76519.
For those anatomic regions that have “complete” and “limited” ultrasound codes, note the elements that comprise a “complete” exam. The report should contain a description of these elements or the reason that an element could not be visualized (eg, obscured by bowel gas, surgically absent).

If less than the required elements for a “complete” exam are reported (eg, limited number of organs or limited portion of region evaluated), the “limited” code for that anatomic region should be used once per patient exam session. A “limited” exam of an anatomic region should not be reported for the same exam session as a “complete” exam of that same region.

Evaluation of vascular structures using both color and spectral Doppler is separately reportable. To report, see noninvasive vascular diagnostic studies (93875-93990). However, color Doppler alone, when performed for anatomic structure identification in conjunction with a real-time ultrasound examination, is not reported separately.

Ultrasound guidance procedures also require permanently recorded images of the site to be localized, as well as a documented description of the localization process, either separately or within the report of the procedure for which the guidance is utilized.

Use of ultrasound, without thorough evaluation of organ(s) or anatomic region, image documentation, and final, written report, is not separately reportable.

**DEFINITIONS:**

**A MODE:** Implies a one-dimensional ultrasonic measurement procedure.

**M MODE:** Implies a one-dimensional ultrasonic measurement procedure with movement of the trace to record amplitude and velocity of moving echo-producing structures.

**B SCAN:** Implies a two-dimensional ultrasonic scanning procedure with a two-dimensional display.

**REAL-TIME SCAN:** Implies a two-dimensional ultrasonic scanning procedure with display of both two-dimensional structure and motion with time.

**HEAD AND NECK**

76506  Echoencephalography, real time with image documentation (gray scale) (for determination of ventricular size, delineation of cerebral contents, and detection of fluid masses or other intracranial abnormalities), including A-mode encephalography as secondary component where indicated

76510  Ophthalmic ultrasound, diagnostic; B-scan and quantitative A-scan performed during the same patient encounter

76511  quantitative A-scan only

76512  B-scan (with or without superimposed non-quantitative A-scan)

76513  anterior segment ultrasound immersion (water bath) B-scan or high resolution biomicroscopy

76514  corneal pachymetry, unilateral or bilateral (determination of corneal thickness)

76516  Ophthalmic biometry by ultrasound echography, A-scan;

76519  with intraocular lens power calculation

76529  Ophthalmic ultrasonic foreign body localization
76536  Ultrasound, soft tissues of head and neck (eg, thyroid, parathyroid, parotid), real time with image documentation

**CHEST**

76604  Ultrasound, chest, (includes mediastinum) real time with image documentation
76641  Ultrasound, breast, unilateral, real time with image documentation including axilla when performed; complete
76642  limited

**ABDOMEN AND RETROPERITONEUM**

Use of ultrasound, without thorough evaluation of organ(s) or anatomic region, image documentation and final, written report, is not separately reportable.

76700  Ultrasound, abdominal, real time with image documentation; complete
76705  limited (eg, single organ, quadrant, follow-up)
76706  Ultrasound, abdominal aorta, real time with image documentation, screening study for abdominal aortic aneurysm (AAA)
76770  Ultrasound, retroperitoneal (eg, renal, aorta, nodes), real time with image documentation; complete
76775  limited
76776  Ultrasound, transplanted kidney, real time and duplex Doppler with image documentation (Do not report 76776 in conjunction with 93975, 93976)

**SPINAL CANAL**

76800  Ultrasound, spinal canal and contents

**PELVIS**

**OBSTETRICAL**

Codes 76801 and 76802 include determination of the number of gestational sacs and fetuses, gestational sac/fetal measurements appropriate for gestation (<14 weeks 0 days), survey of visible fetal and placental anatomic structure, qualitative assessment of amniotic fluid volume/gestational sac shape and examination of the maternal uterus and adnexa.

Codes 76805 and 76810 include determination of number of fetuses and amniotic/chorionic sacs, measurements appropriate for gestational age (> or =14 weeks 0 days), survey of intracranial/spinal/abdominal anatomy, 4 chambered heart, umbilical cord insertion site, placenta location and amniotic fluid assessment and, when visible, examination of maternal adnexa.

Codes 76811 and 76812 include all elements of codes 76805 and 76810 plus detailed anatomic evaluation of the fetal brain/ventricles, face, heart/outflow tracts and chest anatomy, abdominal organ specific anatomy, number/length/architecture of limbs and detailed evaluation of the umbilical cord and placenta and other fetal anatomy as clinically indicated.
Patient record should document the results of the evaluation of each element described above or the reason for non-visualization.

Code 76815 represents a focused "quick look" exam limited to the assessment of one or more of the elements listed in code 76815.

Code 76816 describes an examination designed to reassess fetal size and interval growth or reevaluate one or more anatomic abnormalities of a fetus previously demonstrated on ultrasound, and should be coded once regardless of the number of fetus. (Bill on one line indicating the number of fetus in the units field)

Code 76817 describes a transvaginal obstetric ultrasound performed separately or in addition to one of the transabdominal examinations described above. For transvaginal examinations performed for non-obstetrical purposes, use code 76830.

Reimbursement amounts for the Medicaid Obstetrical and Maternal Services Program (MOMS) are noted in the Fee Schedule under column ‘FEE MOMS’. For information on the MOMS Program, see Policy Section.

76801 Ultrasound, pregnant uterus, real time with image documentation, fetal and maternal evaluation, first trimester (<14 weeks 0 days), transabdominal approach (complete fetal and maternal evaluation); single or first gestation

76802 each additional gestation
(List separately in addition to primary procedure)
(Use 76802 in conjunction with 76801)

76805 Ultrasound, pregnant uterus, real time with image documentation, fetal and maternal evaluation, after first trimester (> or = 14 weeks 0 days), transabdominal approach (complete fetal and maternal evaluation); single or first gestation

76810 each additional gestation
(List separately in addition to primary procedure)
(Use 76810 in conjunction with 76805)

76811 Ultrasound, pregnant uterus, real time with image documentation, fetal and maternal evaluation plus detailed fetal anatomic examination, transabdominal approach (complete fetal and maternal evaluation); single or first gestation

76812 each additional gestation
(List separately in addition to primary procedure)
(Use 76812 in conjunction with 76811)

76813 Ultrasound, pregnant uterus, real time with image documentation, first trimester fetal nuchal translucency measurement, transabdominal or transvaginal approach; single or first gestation

76814 each additional gestation
(List separately in addition to primary procedure)
76815 Ultrasound, pregnant uterus, real time with image documentation, limited (e.g., fetal heart beat, placental location, fetal position and/or qualitative amniotic fluid volume), one or more fetuses
(Use 76815 only once per exam and not per element)
(Use ONLY code 76815 to report ultrasound services provided in conjunction with procedure codes 59812-59857. Procedure code 76815 should be billed regardless of the approach used to perform the ultrasound procedure (e.g., transvaginal))
76816 Ultrasound, pregnant uterus, real time with image documentation, follow-up (e.g., re-evaluation of fetal size by measuring standard growth parameters and amniotic fluid volume, re-evaluation of organ system(s) suspected or confirmed to be abnormal on a previous scan), transabdominal approach, per fetus
76817 Ultrasound, pregnant uterus, real time with image documentation, transvaginal
(If transvaginal examination is done in addition to transabdominal obstetrical ultrasound exam, use 76817 in addition to appropriate transabdominal exam code)
76818 Fetal biophysical profile; with non-stress testing
76819 without non-stress testing
76820 Doppler velocimetry, fetal; umbilical artery
(Billable with a diagnosis of polyhydramnios, oligohydramnios, placental transfusion syndromes or poor fetal growth)
76821 middle cerebral artery
(Billable with a diagnosis of rhesus isoimmunization, placental transfusion syndromes or viral diseases complicating pregnancy (e.g. parvovirus B-19 infection))
76825 Echocardiography, fetal, cardiovascular system, real time with image documentation (2D), with or without M mode recording;
76826 follow-up or repeat study
76827 Doppler echocardiography, fetal, pulsed wave and/or continuous wave with spectral display; complete
76828 follow-up or repeat study

NON OBSTETRICAL

76830 Ultrasound, transvaginal
(If transvaginal examination is done in addition to transabdominal non-obstetrical ultrasound exam, use 76830 in addition to appropriate transabdominal exam code)
76831 Saline infusion sonohysterography (SIS), including color flow Doppler, when performed
76856 Ultrasound, pelvic (nonobstetric), real time with image documentation; complete
76857 limited or follow-up (e.g., for follicles)

GENITALIA

76870 Ultrasound, scrotum and contents
76872 Ultrasound, transrectal;
76873 prostate volume study for brachytherapy treatment planning (separate procedure)

EXTREMITIES
Physician – Procedure Codes, Section 4 - Radiology

76881 Ultrasound, complete joint (ie, joint space and peri-articular soft tissue structures) real-time with image documentation

76882 Ultrasound, limited, joint or other nonvascular extremity structure(s) (eg, joint space, peri-articular tendon(s), muscles (s), nerve(s), other soft tissue structure(s), or soft tissue mass(es)), real-time with image documentation

76885 Ultrasound, infant hips, real time with imaging documentation; dynamic (requiring physician or other qualified health care professional manipulation)

76886 limited, static (not requiring physician or other qualified health care professional manipulation)

VASCULAR STUDIES

(For vascular studies, see 93875-93990)

ULTRASONIC GUIDANCE PROCEDURES

76932 Ultrasonic guidance for endomyocardial biopsy, imaging supervision and interpretation

76936 Ultrasound guided compression repair of arterial pseudo-aneurysm or arteriovenous fistulae (includes diagnostic ultrasound evaluation, compression of lesion and imaging)

76937 Ultrasonic guidance for vascular access requiring ultrasound evaluation of potential access sites, documentation of selected vessel patency, concurrent real-time ultrasound visualization of vascular needle entry, with permanent recording and reporting (List separately in addition to primary procedure)

76940 Ultrasound guidance for, and monitoring of, parenchymal tissue ablation

76941 Ultrasonic guidance for intrauterine fetal transfusion or cordocentesis, imaging supervision and interpretation

76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation

76945 Ultrasonic guidance for chorionic villus sampling, imaging supervision and interpretation

76946 Ultrasonic guidance for amniocentesis, imaging supervision and interpretation

76965 Ultrasonic guidance for interstitial radioelement application

OTHER PROCEDURES

76975 Gastrointestinal endoscopic ultrasound, supervision and interpretation

76977 Ultrasound bone density measurement and interpretation, peripheral site(s), any method

76998 Ultrasonic guidance, intraoperative

76999 Unlisted ultrasound procedure (eg, diagnostic, interventional)

RADIOLOGIC GUIDANCE

FLUOROSCOPIC GUIDANCE

77001 Fluoroscopic guidance for central venous access device placement, replacement (catheter only or complete), or removal (includes fluoroscopic guidance for vascular access and catheter manipulation, any necessary contrast injections through access site or catheter with
related venography radiologic supervision and interpretation, and radiographic
documentation of final catheter position)
(List separately in addition to primary procedure)
(Do not use 77001 in conjunction with 77002)

77002 Fluoroscopic guidance for needle placement (eg, biopsy, aspiration, injection, localization
device) (List separately in addition to code for primary procedure)

77003 Fluoroscopic guidance and localization of needle or catheter tip for spine or paraspinous
diagnostic or therapeutic injection procedures (epidural or subarachnoid)
(List separately in addition to code for primary procedure)

COMPUTED TOMOGRAPHY GUIDANCE

77011 Computed tomography guidance for stereotactic localization

77012 Computed tomography guidance for needle placement (eg, biopsy, aspiration, injection, localization
device), radiological supervision and interpretation

77013 Computerized tomography guidance for, and monitoring of, parenchymal tissue ablation
(Do not report 77013 in conjunction with 20982)

77014 Computed tomography guidance for placement of radiation therapy fields

MAGNETIC RESONANCE GUIDANCE

77021 Magnetic resonance imaging guidance for needle placement (eg, for biopsy, needle
aspiration, injection, or placement of localization device) radiological supervision and interpretation

77022 Magnetic resonance imaging guidance for, and monitoring of, parenchymal tissue ablation

BREAST, MAMMOGRAPHY

77046 Magnetic resonance imaging, breast, without contrast material; unilateral

77047 bilateral

77048 Magnetic resonance imaging, breast, without and with contrast material(s), including
computer-aided detection (CAD real-time lesion detection, characterization and
pharmacokinetic analysis), when performed; unilateral

77049 bilateral

77053 Mammary ductogram or galactogram, single duct, radiological supervision and interpretation

77054 Mammary ductogram or galactogram, multiple ducts, radiological supervision and
interpretation

77063 Screening digital breast tomosynthesis, bilateral (List separately in addition to code for
primary procedure)

77065 Diagnostic mammography, including computer-aided detection (CAD) when performed; unilateral

77066 bilateral

77067 Screening mammography, bilateral (2-view study of each breast), including computer-
aided detection (CAD) when performed
**BONE/JOINT STUDIES**

77071 Manual application of stress performed by physician or other qualified health care professional for joint radiography, including contralateral joint if indicated

77072 Bone age studies

77073 Bone length studies (orthoroentgenogram, scanogram)

77074 Radiologic examination, osseous survey; limited (eg, for metastases)

77075 Complete (axial and appendicular skeleton)

77076 Radiologic examination, osseous survey, infant

77077 Joint survey, single view, 2 or more joints (specify)

77078 Computed tomography, bone mineral density study, 1 or more sites; axial skeleton (eg, hips, pelvis, spine)

77080 Dual-energy x-ray absorptiometry (DXA), bone density study, 1 or more sites; axial skeleton (eg, hips, pelvis, spine)

77081 Appendicular skeleton (peripheral) (eg, radius, wrist, heel)

77084 Magnetic resonance (eg, proton) imaging, bone marrow blood supply

**RADIATION ONCOLOGY**

Listings for Radiation Oncology provide for teletherapy and brachytherapy to include initial consultation, clinical treatment planning, simulation, medical radiation physics, dosimetry, treatment devices, special services, and clinical treatment management procedures. They include normal follow-up care during course of treatment and for three months following its completion.

For treatment by injectable or ingestible isotopes, see subsection Nuclear Medicine.

**CONSULTATION: CLINICAL MANAGEMENT**

Preliminary consultation, evaluation of patient prior to decision to treat, or full medical care (in addition to treatment management) when provided by the therapeutic radiologist may be identified by the appropriate procedure codes from Evaluation and Management, Medicine or Surgery sections.

**CLINICAL TREATMENT PLANNING (EXTERNAL AND INTERNAL SOURCES)**

The clinical treatment planning process is a complex service including interpretation of special testing, tumor localization, treatment volume determination, treatment time/dosage determination, choice of treatment modality, determination of number and size of treatment ports, selection of appropriate treatment devices, and other procedures.

**DEFINITIONS:**

**SIMPLE** - planning requires single treatment area of interest encompassed in a single port or simple parallel opposed ports with simple or no blocking.

**INTERMEDIATE** - planning requires three or more converging ports, two separate treatment areas, multiple blocks, or special time dose constraints.
COMPLEX - planning requires highly complex blocking, custom shielding blocks, tangential ports, special wedges or compensators, three or more separate treatment areas, rotational or special beam considerations, combination of therapeutic modalities.

Reimbursement for procedure codes 77261, 77262 & 77263 is for the global fee.
77261  Therapeutic radiology treatment planning; simple
77262  intermediate
77263  complex

Simulation is the process of defining relevant normal and abnormal target anatomy, and acquiring the images and data necessary to develop the optimal radiation treatment process for the patient.

DEFINITIONS:
SIMPLE - simulation of a single treatment area with either a single port or parallel opposed ports. Simple or no blocking.
INTERMEDIATE - simulation of three or more converging ports, two separate treatment areas, multiple blocks.
COMPLEX - simulation of tangential portals, three or more treatment areas, rotation or arc therapy, complex blocking, custom shielding blocks, brachytherapy source verification, hyperthermia probe verification, any use of contrast materials.

77280  Therapeutic radiology simulation-aided field setting; simple
77285  intermediate
77290  complex
77293  Respiratory motion management simulation (List separately in addition to code for primary procedure)
77299  Unlisted procedure, therapeutic radiology clinical treatment planning

MEDICAL RADIATION PHYSICS, DOSIMETRY, TREATMENT DEVICES AND SPECIAL SERVICES

77295  3-dimensional radiotherapy plan, including dose-volume histograms
77300  Basic radiation dosimetry calculation, central axis depth dose, TDF, NSD, gap calculation, off axis factor, tissue inhomogeneity factors, calculation of non-ionizing radiation surface and depth dose, as required during course of treatment, only when prescribed by the treating physician
77301  Intensity modulated radiotherapy plan, including dose-volume histograms for target and critical structure partial tolerance specifications
77306  Teletherapy isodose plan, simple (1 or 2 unmodified ports directed to a single area of interest), includes basic dosimetry calculation(s)
77307  complex (multiple treatment areas, tangential ports, the use of wedges, blocking, rotational beam, or special beam considerations), includes basic dosimetry calculation(s)
77316  Brachytherapy isodose plan; simple (calculation(s) made from 1 to 4 sources, or remote afterloading brachytherapy, 1 channel), includes basic dosimetry calculation(s)
77317 intermediate (calculation(s) made from 5 to 10 sources, or remote afterloading brachytherapy, 2-12 channel(s), includes basic dosimetry calculation(s)

77318 complex calculation(s) made from over 10 sources, or remote afterloading brachytherapy, over 12 channel(s), includes basic dosimetry calculation(s)

77321 Special teletherapy port plan, particles, hemi-body, total body

77331 Special dosimetry (eg, TLD, microdosimetry) (specify), only when prescribed by the treating physician

77332 Treatment devices, design and construction; simple (simple block, simple bolus)

77333 intermediate (multiple blocks, stents, bite blocks, special bolus)

77334 complex (irregular blocks, special shields, compensators, wedges, molds or casts)

77336 Continuing medical radiation physics consultation, including assessment of treatment parameters, quality assurance of dose delivery, and review of patient treatment documentation in support of the radiation oncologist, reported per week of therapy

77338 Multi-leaf collimator MLC device(s) for intensity modulated radiation therapy (IMRT), design and construction per IMRT plan

(Do not report 77338 more than once per IMRT plan)

STEREOTACTIC RADIATION TREATMENT DELIVERY

77371 Radiation treatment delivery, stereotactic radiosurgery (SRS), complete course of treatment of cranial lesion(s) consisting of 1 session; multi-source Cobalt 60 based

77372 linear accelerator based

77373 Stereotactic body radiation therapy, treatment delivery, per fraction to 1 or more lesions, including image guidance, entire course not to exceed 5 fractions

OTHER PROCEDURES

77399 Unlisted procedure, medical radiation physics, dosimetry and treatment devices, and special services

RADIATION TREATMENT DELIVERY

All treatment delivery codes are reported once per treatment session. The treatment delivery codes recognize technical-only services and contain no physician work (the professional component).

77401 Radiation treatment delivery, superficial and/or ortho voltage, per day

77402 Radiation treatment delivery, >1MeV; simple

77407 intermediate

77412 complex

77417 Therapeutic radiology port images(s)

77385Intensity modulated radiation treatment delivery (IMRT), includes guidance and tracking, when performed; simple

77386 complex

77387 Guidance for localization of target volume for delivery of radiation treatment, includes intrafraction tracking, when performed
77424  Intraoperative radiation treatment delivery, x-ray, single treatment session
77425  Intraoperative radiation treatment delivery, electrons, single treatment session

**NEUTRON BEAM TREATMENT DELIVERY**
77423  High energy neutron radiation treatment delivery, 1 or more isocenter(s) with coplanar or non-coplanar geometry with blocking and/or wedge, and/or compensator(s)

**RADIATION TREATMENT MANAGEMENT**

Radiation treatment management is reported in units of five fractions or treatment sessions, regardless of the actual time period in which the services are furnished. The services need not be furnished on consecutive days. Multiple fractions representing two or more treatment sessions furnished on the same day may be counted separately as long as there has been a distinct break in therapy sessions, and the fractions are of the character usually furnished on different days. Code 77427 is also reported if there are three or four fractions beyond a multiple of five at the end of a course of treatment; one or two fractions beyond a multiple of five at the end of a course of treatment are not reported separately. **Procedure codes 77427-77469 are for the professional component only, no modifier required.**

The professional services furnished during treatment management typically consists of:
- Review of port films;
- Review of dosimetry, dose delivery, and treatment parameters;
- Review of patient treatment set-up;
- Examination of patient for medical evaluation and management (eg, assessment of the patient’s response to treatment, coordination of care and treatment, review of imaging and/or lab results).

77427  Radiation treatment management, five treatments
    (Weekly clinical management is based on five fractions delivered comprising one week regardless of the time interval separating the delivery of treatments)
77431  Radiation therapy management with complete course of therapy consisting of one or two fractions only
    (77431 is not to be used to fill in the last week of a long course of therapy)
77432  Stereotactic radiation treatment management of cranial lesion(s) (complete course of treatment consisting of one session)
77435  Stereotactic body radiation therapy, treatment management, per treatment course, to one or more lesions, including image guidance, entire course not to exceed 5 fractions
    (Do not report 77435 in conjunction with 77427-77432)
77469  Intraoperative radiation treatment management
77470  Special treatment procedure (eg, total body irradiation, hemibody radiation, per oral or endocavitary irradiation)
    (77470 assumes that the procedure is performed 1or more times during the course of therapy, in addition to daily or weekly patient management)
77499  Unlisted procedure, therapeutic radiology treatment management
HYPERThERMIA

Hyperthermia treatments as listed in this section include external (superficial and deep), interstitial, and intracavitary. Radiation therapy when given concurrently is listed separately.

Hyperthermia is used only as an adjunct to radiation therapy or chemotherapy. It may be induced by a variety of sources, (eg, microwave, ultrasound, low energy radio-frequency conduction, or by probes).

The listed treatments include management during the course of therapy and follow-up care for three months after completion. Preliminary consultation is not included (see Evaluation and Management 99241-99255). Physics planning and interstitial insertion of temperature sensors, and use of external or interstitial heat generating sources are included.

The following descriptors are included in the treatment schedule:

77600  Hyperthermia, externally generated; superficial (ie, heating to a depth of 4 cm or less)
77605  deep (ie, heating to depths greater than 4 cm)
77610  Hyperthermia generated by interstitial probe(s); 5 or fewer interstitial applicators
77615  more than 5 interstitial applicators

CLINICAL INTRACAVITARY HYPERThERMIA

77620  Hyperthermia generated by intracavitary probe(s)

CLINICAL BRACHyThERAPY

Clinical brachytherapy requires the use of either natural or man-made radioelements applied into or around a treatment field of interest. The supervision of radioelements and dose interpretation are performed solely by the therapeutic radiologist. When a procedure requires the service of a surgeon, see appropriate codes from the Surgery Section.

Services 77750-77799 include admission to the hospital and daily visits.

DEFINITIONS:
(Sources refer to intracavitary placement or permanent interstitial placement; ribbons refer to temporary interstitial placement.)

SIMPLE  - application with one to four sources/ribbons
INTERMEDIATE  - application with five to ten sources/ribbons
COMPLEX  - application with greater than ten sources/ribbons

77750  Infusion or instillation of radioelement solution (includes three months follow-up care)
77761  Intracavitary radiation source application; simple
77762  intermediate
77763  complex
77767  Remote afterloading high dose rate radionuclide skin surface brachytherapy, includes basic dosimetry, when performed;
lesion diameter up to 2.0 cm or 1 channel

77768 lesion diameter over 2.0 cm and 2 or more channels, or multiple lesions

77770 Remote afterloading high dose rate radionuclide interstitial or intracavitary brachytherapy, includes basic dosimetry, when performed;
1 channel

77771 2-12 channels

77772 over 12 channels

77778 Interstitial radiation source application, complex, includes supervision, handling, loading of radiation source, when performed

77789 Surface application of low dose rate radionuclide source

77799 Unlisted procedure, clinical brachytherapy

**NUCLEAR MEDICINE**

The services listed do not include the provision of radium or other radioelements. Those materials supplied by the provider should be billed separately and identified by the specific code describing the diagnostic radiopharmaceutical(s) and/or the therapeutic radiopharmaceutical(s) which are listed under *Radiopharmaceutical Imaging Agents*.

**DIAGNOSTIC**

**ENDOCRINE SYSTEM**

78012 Thyroid uptake, single or multiple quantitative measurement(s) (including stimulation, suppression, or discharge, when performed)

78013 Thyroid imaging (including vascular flow, when performed);

78014 Thyroid imaging (including vascular flow, when performed); with single or multiple uptake(s) quantitative measurement(s) (including stimulation, suppression, or discharge, when performed)

78015 Thyroid carcinoma metastases imaging; limited area (eg, neck and chest only)

78016 with additional studies (eg, urinary recovery)

78018 whole body

78020 Thyroid carcinoma metastases uptake
(List separately in addition to primary procedure)
(Use 78020 in conjunction with 78018 only)

78070 Parathyroid planar imaging (including subtraction, when performed);

78071 with tomographic (SPECT)

78072 with tomographic (SPECT), and concurrently acquired computed tomography (CT) for anatomical localization

78075 Adrenal imaging, cortex and/or medulla

78099 Unlisted endocrine procedure, diagnostic nuclear medicine
HEMATOPOIETIC, RETICULOENDOTHELIAL AND LYMPHATIC SYSTEM

78102  Bone marrow imaging; limited area
78103  multiple areas
78104  whole body
78110  Plasma volume, radiopharmaceutical volume-dilution technique (separate procedure); single sampling
78111  multiple samplings
78120  Red cell volume determination (separate procedure); single sampling
78121  multiple samplings
78122  Whole blood volume determination, including separate measurement of plasma volume and red cell volume (radiopharmaceutical volume-dilution technique)
78130  Red cell survival study;
78135  differential organ/tissue kinetics, eg, splenic and/or hepatic sequestration
78185  Spleen imaging only, with or without vascular flow
78191  Platelet survival study
78195  Lymphatics and lymph nodes imaging
78199  Unlisted hematopoietic, reticuloendothelial and lymphatic procedure, diagnostic nuclear medicine

GASTROINTESTINAL SYSTEM

78201  Liver imaging; static only
78202  with vascular flow
78215  Liver and spleen imaging; static only
78216  with vascular flow
78226  Hepatobiliary system imaging, including gallbladder when present;
78227  with pharmacologic intervention, including quantitative measurement(s), when preformed
78230  Salivary gland imaging;
78231  with serial images
78232  Salivary gland function study
78258  Esophageal motility
78261  Gastric mucosa imaging
78262  Gastroesophageal reflux study
78264  Gastric emptying imaging study (eg, solid, liquid, or both)
78265  with small bowel transit
78266  with small bowel and colon transit, multiple days
(Report 78264,78265 or 78266 only once per imaging study)
78278  Acute gastrointestinal blood loss imaging
78290  Intestine imaging (eg, ectopic gastric mucosa, Meckel's localization, volvulus)
78291  Peritoneal-venous shunt patency test (eg, for LeVeen, Denver shunt)
78299  Unlisted gastrointestinal procedure, diagnostic nuclear medicine

MUSCULOSKELETAL SYSTEM

78300  Bone and/or joint imaging; limited area
78305  multiple areas
78306  whole body
78315  three phase study
78350 Bone density (bone mineral content) study, one or more sites; single photon absorptiometry
78351  dual photon absorptiometry, one or more sites
78399 Unlisted musculoskeletal procedure, diagnostic nuclear medicine

CARDIOVASCULAR SYSTEM
Myocardial perfusion and cardiac blood pool imaging studies may be performed at rest and/or during stress. When performed during exercise and/or pharmacologic stress, the appropriate stress testing code from the 93015-93018 series should be reported in addition to code(s) 78451-78454, 78472, 78473, 78481 and 78483.

78414 Determination of central c-v hemodynamics (non-imaging) (eg, ejection fraction with probe technique) with or without pharmacologic intervention or exercise, single or multiple determinations
78445 Non-cardiac vascular flow imaging (ie, angiography, venography)
78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)
78452  multiple studies, at rest and/or stress (exercise or pharmacologic) and/or redistribution and/or rest reinjection
78453 Myocardial perfusion imaging, planar (including qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)
78454  multiple studies, at rest and/or stress (exercise or pharmacologic) and/or redistribution and/or rest reinjection
78456 Acute venous thrombosis imaging, peptide
78457 Venous thrombosis imaging, venogram; unilateral
78458  bilateral
78459 Myocardial imaging, positron emission tomography (PET), metabolic evaluation study (including ventricular wall motion(s) and/or ejection fraction(s), when performed), single Study;
78429  with concurrently acquired computed tomography transmission scan
78466 Myocardial imaging, infarct avid, planar; qualitative or quantitative
78468  with ejection fraction by first pass technique
78469  tomographic SPECT with or without quantification
78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing
78473  multiple studies, wall motion study plus ejection pharmacologic), with or without additional quantification
78481 Cardiac blood pool imaging, (planar), first pass technique; single study, at rest or with stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without quantification
78483  multiple studies, at rest and with stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without quantification

78491  Myocardial imaging, positron emission tomography (PET), perfusion study (including ventricular wall motion(s) and/or ejection fraction(s), when performed); single study, at rest or stress (exercise or pharmacologic)

78430  single study, at rest or stress (exercise or pharmacologic), with concurrently acquired computed tomography transmission scan

78492  multiple studies at rest and stress (exercise or pharmacologic)

78431  multiple studies at rest and stress (exercise or pharmacologic), with concurrently acquired computed tomography transmission scan

78432  Myocardial imaging, positron emission tomography (PET), combined perfusion with metabolic evaluation study (including ventricular wall motion[s] and/or ejection fraction[s], when performed), dual radiotracer (eg, myocardial viability);

78433  with concurrently acquired computed tomography transmission scan

78434  Absolute quantitation of myocardial blood flow (AQMBF), positron emission tomography (PET), rest and pharmacologic stress (List separately in addition to code for primary procedure)

78494  Cardiac blood pool imaging, gated equilibrium, SPECT, at rest, wall motion study plus ejection fraction, with or without quantitative processing

78496  Cardiac blood pool imaging, gated equilibrium, single study, at rest, with right ventricular ejection fraction by first pass technique

(Use 78496 in conjunction with code 78472)

78499  Unlisted cardiovascular procedure, diagnostic nuclear medicine

RESPIRATORY SYSTEM
78579  Pulmonary ventilation imaging (eg, aerosol or gas)
78580  Pulmonary perfusion imaging (eg, particulate)
78582  Pulmonary ventilation (eg, aerosol or gas) and perfusion imaging
78597  Quantitative differential pulmonary perfusion, including imaging when performed
78598  Quantitative differential pulmonary perfusion and ventilation (eg, aerosol or gas), including imaging when performed
78599  Unlisted respiratory procedure; diagnostic nuclear medicine

NERVOUS SYSTEM
78600  Brain imaging, less than 4 static views;
78601  with vascular flow
78605  Brain imaging, minimum 4 static views;
78606  with vascular flow
78610  Brain imaging, vascular flow only
78630  Cerebrospinal fluid flow, imaging (not including introduction of material); cisternography
78635  ventriculography
78645  shunt evaluation
78650  Cerebrospinal fluid leakage detection and localization
78660  Radiopharmaceutical dacryocystography
78699  Unlisted nervous system procedure, diagnostic nuclear medicine

GENITOURINARY SYSTEM
78700  Kidney imaging morphology;
78701  with vascular flow
78707  with vascular flow and function, single study, without pharmacological intervention
78708  with vascular flow and function, single study, with pharmacological intervention (eg, angiotensin converting enzyme inhibitor and/or diuretic)
78709  with vascular flow and function, multiple studies, with and without pharmacological intervention (eg, angiotensin converting enzyme inhibitor and/or diuretic)
78725  Kidney function study, non-imaging radioisotopic study
78730  Urinary bladder residual study
   (List separately in addition to primary procedure)
   (Use 78730 in conjunction with 78740)
78740  Ureteral reflux study (radiopharmaceutical voiding cystogram)
   (Use 78740 in conjunction with 78730 for urinary bladder residual study)
78761  Testicular imaging with vascular flow
78799  Unlisted genitourinary procedure, diagnostic nuclear medicine

OTHER PROCEDURES
78800  Radiopharmaceutical localization of tumor, inflammatory process or distribution of radiopharmaceutical agent(s) (includes vascular flow and blood pool imaging, when performed); planar, single area (eg, head, neck, chest, pelvis), single day imaging
78801  planar, 2 or more areas (eg, abdomen and pelvis, head and chest), 1 or more days imaging or single area imaging over 2 days
78802  planar, whole body, single day imaging
78803  tomographic (SPECT), single area (eg, head, neck, chest, pelvis), single day imaging
78830  tomographic (SPECT) with concurrently acquired computed tomography (CT) transmission scan for anatomical review, localization and determination/detection of pathology, single area (eg, head, neck, chest, pelvis), single day imaging
78831  tomographic (SPECT), minimum 2 areas (eg, pelvis and knees, abdomen and pelvis), single day imaging, or single area imaging over 2 or more days
78832  tomographic (SPECT) with concurrently acquired computed tomography (CT) transmission scan for anatomical review, localization and determination/detection of pathology, minimum 2 areas (eg, pelvis and knees, abdomen and pelvis), single day imaging, or single area imaging over 2 or more days
78835  Radiopharmaceutical quantification measurement(s) single area (List separately in addition to code for primary procedure)
78804  planar, whole body, requiring 2 or more days imaging
78999  Unlisted miscellaneous procedure, diagnostic nuclear medicine

THERAPEUTIC
79005  Radiopharmaceutical therapy, by oral administration
79101  Radiopharmaceutical therapy, by intravenous administration
79200 Radiopharmaceutical therapy, by intracavitary administration
79300 Radiopharmaceutical therapy, by interstitial radioactive colloid administration
79403 Radiopharmaceutical therapy, radiolabeled monoclonal antibody by intravenous infusion
(Do not report 79403 in conjunction with 79101)
79440 Radiopharmaceutical therapy, by intra-articular administration
79445 Radiopharmaceutical therapy, by intra-arterial particulate administration
(Do not report 79445 in conjunction with 90773, 96420)
(Use appropriate procedural and radiological supervision and interpretation codes for the angiographic and interventional procedures provided prerequisite to intra-arterial radiopharmaceutical therapy)
79999 Radiopharmaceutical therapy, unlisted procedure

RADIOPHARMACEUTICAL IMAGING AGENTS

A4641 Radiopharmaceutical, diagnostic, not otherwise classified
A4642 Indium In-111 satumomab pendetide, diagnostic, per study dose up to 6 millicuries
A9500 Technetium Tc-99m sestamibi, diagnostic, per study dose
A9501 Technetium Tc-99m teboroxime, diagnostic, per study dose
A9502 Technetium Tc-99m tetrofosmin, diagnostic, per study dose
A9503 Technetium Tc-99m medronate, diagnostic, per study dose, up to 30 millicuries
A9504 Technetium Tc-99m apcitide, diagnostic, per study dose, up to 20 millicuries
A9505 Thallium Tl-201 thallous chloride, diagnostic, per millicurie
A9507 Indium In-111 capromab pendetide, diagnostic, per study dose, up to 10 millicuries
A9508 Iodine I-131 iobenguane sulfate, diagnostic, per 0.5 millicurie
A9509 Iodine I-123 sodium iodide, diagnostic, per millicurie
A9510 Technetium Tc-99m disofenin, diagnostic, per study dose, up to 15 millicuries
A9512 Technetium Tc-99m pertechnetate, diagnostic, per millicurie
A9513 Lutetium lu 177, dotatate, therapeutic, 1 millicurie
A9515 Choline C-11, diagnostic, per study dose up to 20 millicuries
A9516 Iodine I-123 sodium iodide, diagnostic, per 100 microcuries, up to 999 microcuries
A9517 Iodine I-131 sodium iodide capsule(s), therapeutic, per millicurie
A9520 Technetium tc-99m, tilmanocept, diagnostic, up to 0.5 millicuries
A9521 Technetium Tc-99m exametazime, diagnostic, per study dose, up to 25 millicuries
A9524 Iodine I-131 iodinated serum albumin, diagnostic, per 5 microcuries
A9526 Nitrogen N-13 ammonia, diagnostic, per study dose, up to 40 millicuries
A9527 Iodine I-125, sodium iodide solution, therapeutic, per millicurie
A9528 Iodine I-131 sodium iodide capsule(s), diagnostic, per millicurie
A9529 Iodine I-131 sodium iodide solution, diagnostic, per millicurie
A9530 Iodine I-131 sodium iodide solution, therapeutic, per millicurie
A9531 Iodine I-131 sodium iodide, diagnostic, per microcurie (up to 100 microcuries)
A9532 Iodine I-125 serum albumin, diagnostic, per 5 microcuries
A9536 Technetium Tc-99m depreotide, diagnostic, per study dose, up to 35 millicuries
A9537 Technetium Tc-99m mebrofenin, diagnostic, per study dose, up to 15 millicuries
A9538  Technetium Tc-99m pyrophosphate, diagnostic, per study dose, up to 25 millicuries
A9539  Technetium Tc-99m pentetate, diagnostic, per study dose, up to 25 millicuries
A9540  Technetium Tc-99m macroaggregated albumin, diagnostic, per study dose, up to 10 millicuries
A9541  Technetium Tc-99m sulfur colloid, diagnostic, per study dose, up to 20 millicuries
A9542  Indium In-111 ibritumomab tiuxetan, diagnostic, per study dose, up to 5 millicuries
A9543  Yttrium Y-90 ibritumomab tiuxetan, therapeutic, per treatment dose, up to 40 millicuries
A9546  Cobalt Co-57/58, cyanocobalamin, diagnostic, per study dose, up to 1 microcurie
A9547  Indium In-111 oxyquinoline, diagnostic, per 0.5 millicurie
A9548  Indium In-111 pentetate, diagnostic, per 0.5 millicurie
A9550  Technetium Tc-99m sodium gluceptate, diagnostic, per study dose, up to 25 millicuries
A9551  Technetium Tc-99m succimer, diagnostic, per study dose, up to 10 millicuries
A9552  Fluorodeoxyglucose F-18 FDG, diagnostic, per study dose, up to 45 millicuries
A9553  Chromium Cr-51 sodium chromate, diagnostic, per study dose, up to 250 microcuries
A9554  Iodine I-125 sodium lothalamate, diagnostic, per study dose, up to 10 microcuries
A9555  Rubidium Rb-82, diagnostic, per study dose, up to 60 millicuries
A9557  Technetium Tc-99m bicisate, diagnostic, per study dose, up to 25 millicuries
A9558  Xenon Xe-133 gas, diagnostic, per 10 millicuries
A9559  Cobalt Co-57 cyanocobalamin, oral, diagnostic, per study dose, up to 1 microcurie
A9560  Technetium Tc-99m labeled red blood cells, diagnostic, per study dose, up to 30 millicuries
A9561  Technetium Tc-99m oxidronate, diagnostic, per study dose, up to 30 millicuries
A9562  Technetium Tc-99m mertiatide, diagnostic, per study dose, up to 15 millicuries
A9563  Sodium phosphate P-32, therapeutic, per millicurie
A9564  Chromic phosphate P-32 suspension, therapeutic, per millicurie
A9566  Technetium Tc-99m fanolesomab, diagnostic, per study dose, up to 25 millicuries
A9567  Technetium Tc-99m pentetate, diagnostic, aerosol, per study dose, up to 75 millicuries
A9568  Technetium Tc-99m arcitumomab, diagnostic, per study dose, up to 45 millicuries
A9569  Technetium Tc-99m exametazime labeled autologous white blood cells, diagnostic, per study dose
A9570  Indium In-111 labeled autologous white blood cells, diagnostic, per study dose
A9571  Indium In-111 labeled autologous platelets, diagnostic, per study dose
A9572  Indium In-111 pentetreotide, diagnostic, per study dose, up to 6 millicuries
A9580  Sodium fluoride F-18, diagnostic, per study dose, up to 30 millicuries
A9582  Iodine I-123 iobenguane, diagnostic, per study dose, up to 15 millicuries
A9584  Iodine 1-123 ioflupane, diagnostic, per study dose, up to 5 millicuries
A9587  Gallium Ga-68, dotatate, diagnostic, 0.1 millicurie
A9588  Fluciclovine F-18, diagnostic, 1 millicurie
A9589  Instillation, hexaminolevulinate hydrochloride, 100 mg
A9597  Positron emission tomography radiopharmaceutical, diagnostic, for tumor identification, not otherwise classified
A9598  Positron emission tomography radiopharmaceutical, diagnostic, for non-tumor identification, not otherwise classified
A9600 Strontium Sr-89 chloride, therapeutic, per millicurie
A9604 Samarium SM-153 lexidronam, therapeutic, per treatment dose, up to 150 millicuries
A9606 Radium Ra-223 dichloride, therapeutic, per microcurie
A9699 Radiopharmaceutical, therapeutic, not otherwise classified
J3472 Hyaluronidase, ovine, preservative free, per 1000 USP units

**POSITRON EMISSION TOMOGRAPHY (PET) SERVICES**

Effective 4/1/2015, Medicaid is carving out the cost of the radioactive tracer from the PET scan global fee. **Medicaid will reimburse for the professional/technical administrative component of a PET scan and separate reimbursement will be made for the PET scan tracer.** To receive reimbursement for only the professional component (facility based services only), see modifier -26 Professional Component.

78608 Brain imaging, positron emission tomography (PET), metabolic evaluation
78609 perfusion evaluation
78811 Positron emission tomography (PET) imaging; limited area (eg, chest, head/neck)
78812 skull base to mid-thigh
78813 whole body
78814 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; limited area (eg, chest, head/neck)
78815 skull base to mid-thigh
78816 whole body
(Report 78811-78816 only once per imaging session)

**RADIATION TREATMENT CODES TO BE BILLED FOR MEDICARE PRIMARY RECIPIENTS ONLY**

**GUIDANCE**

G6001 Ultrasonic guidance for placement of radiation therapy fields
G6002 Stereoscopic X-ray guidance for localization of target volume for the delivery of radiation therapy

**TREATMENT, RADIATION**

G6003 Radiation treatment delivery, single treatment area, single port or parallel opposed ports, simple blocks or no blocks: up to 5mev
G6004 Radiation treatment delivery, single treatment area, single port or parallel opposed ports, simple blocks or no blocks: 6-10mev
G6005 Radiation treatment delivery, single treatment area, single port or parallel opposed ports, simple blocks or no blocks: 11-19mev
G6006 Radiation treatment delivery, single treatment area, single port or parallel opposed ports, simple blocks or no blocks: 20mev or greater
G6007 Radiation treatment delivery, 2 separate treatment areas, 3 or more ports on a single treatment area, use of multiple blocks: up to 5mev
G6008 Radiation treatment delivery, 2 separate treatment areas, 3 or more ports on a single treatment area, use of multiple blocks: 6-10mev
G6009 Radiation treatment delivery, 2 separate treatment areas, 3 or more ports on a single treatment area, use of multiple blocks: 11-19mev

G6010 Radiation treatment delivery, 2 separate treatment areas, 3 or more ports on a single treatment area, use of multiple blocks: 20mev or greater

G6011 Radiation treatment delivery, 3 or more separate treatment areas, custom blocking, tangential ports, wedges, rotational beam, compensators, electron beam: up to 5mev

G6012 Radiation treatment delivery, 3 or more separate treatment areas, custom blocking, tangential ports, wedges, rotational beam, compensators, electron beam: 6-10mev

G6013 Radiation treatment delivery, 3 or more separate treatment areas, custom blocking, tangential ports, wedges, rotational beam, compensators, electron beam: 11-19mev

G6014 Radiation treatment delivery, 3 or more separate treatment areas, custom blocking, tangential ports, wedges, rotational beam, compensators, electron beam: 20mev or greater

G6015 Intensity modulated treatment delivery, single or multiple fields/arc, via narrow spatially and temporally modulated beams, binary, dynamic MLC, per treatment session

G6016 Compensator-based beam modulation treatment delivery of inverse planned treatment using 3 or more high resolution (milled or cast) compensator, convergent beam modulated fields, per treatment session
