2 ANESTHESIA GENERAL INFORMATION AND RULES

A. Only anesthesiologists may be reimbursed for anesthesia services performed or provided by themselves or their supervised designees under the codes listed in this section.

B. The total values for anesthesia services include pre- and post- operative visits, the administration of the anesthetic and the administration of fluids and/or blood incident to the anesthesia or surgery.

C. Calculated values for anesthesia services are to be used only when the anesthesia is administered by an anesthesiologist or supervised designee who remains in constant attendance during the procedure for the sole purpose of rendering such anesthesia service.

1. Anesthesia time is defined as the period during which an anesthesia practitioner is present with the patient. It starts when the anesthesia practitioner begins to prepare the patient for anesthesia services in the operating room or an equivalent area and ends when the anesthesia practitioner is no longer furnishing anesthesia services to the patient, that is, when the patient may be placed safely under postoperative care.
2. Anesthesia time is a continuous time period from the start of anesthesia to the end of an anesthesia service. In counting anesthesia time for services furnished, the anesthesia practitioner can add blocks of time around an interruption in anesthesia time as long as the anesthesia practitioner is furnishing continuous anesthesia care within the time periods around the interruption.

D. To bill for anesthesia time, report the total time in minutes in the unit's field. The maximum conversion factor is $10.00 per each 15 minutes. Do not include Basic Value in the reported minutes.

E. Anesthesia Report (or Operative Record) must document total time spent with the patient and include starting time, completion time and an explanation of any unusual occurrence which prolonged anesthesia time. If your claim is rejected for anesthesia exceeding the maximum, you can resubmit a paper claim with documentation supporting the time billed.

F. When more than one anesthesiologist is billing due to attending in shifts, only the first anesthesiologist will be reimbursed the Basic Value.

G. When multiple or bilateral surgical procedures, which add time and complexity to patient care, are performed at the same operative session, the total anesthesia time should be indicated in minutes using only the anesthesia procedure with the highest base value. Basic Values are listed in the Fee Schedule.

H. When hypothermia and/or a pump oxygenator are employed in conjunction with an anesthetic, see procedure code(s) 99116, 99190, 99191, 99192.

I. No fee will be allowed for local infiltration or digital block anesthesia administered by the operating surgeon.

J. The basic value for anesthesia covers services rendered from the time the anesthesiologist (or his/her associate) meets the patient in pre-operative holding until the patient is signed out of the post anesthesia care unit by the attending anesthesiologist (or his/her associate), this includes the insertion of epidural catheters or the administration of nerve blocks done in this time frame for post-operative pain control.

K. Administration of a nerve block (either as a component of the anesthesia itself or a post-operative pain management protocol) is considered part of the anesthesia time for surgery. This will not be reimbursed as a separate and distinct procedural service when performed by the same provider (or his/her associate) that has provided the anesthesia for the surgical procedure itself. Post op visits are included in the total value for anesthesia services as per rule #2 above.

L. Anesthesia services not connected with surgery will be found in other sections of the Physician manual.

3 MMIS ANESTHESIA MODIFIERS:

Note: NCCI associated modifiers are recognized for NCCI code pairs/related edits. For additional information please refer to the CMS website:
http://www.cms.hhs.gov/NationalCorrectCodInitEd/

23 Unusual Anesthesia: Occasionally, a procedure, which usually requires either no anesthesia or local anesthesia, because of unusual circumstances must be done under general anesthesia. This circumstance may be reported by adding the modifier 23 to the procedure code of the basic service.

AD Medical Supervision by a Physician: More Than Four Concurrent Anesthesia Procedures (performed by residents, CRNAs or a combination of both):
Teaching anesthesiologists involved in furnishing more than 4 procedures concurrently or performing other services while directing concurrent procedures, will be allowed to bill at the "medical supervision" rate of 3 base units per procedure. Such cases would be appended with the "AD" modifier (medical supervision by a physician: more than 4 concurrent anesthesia procedures)

GC This Service has Been Performed in Part by a Resident Under the Direction of a Teaching Physician:
The modifier is used for those cases in which the teaching anesthesiologist is involved in single anesthesia case with a resident, two concurrent anesthesia cases involving residents or a single anesthesia case involving a resident that is concurrent to another case that does not involve a resident (involves a CRNA). Reimbursement to the teaching/supervising anesthesiologist for the resident case(s) will be paid at 100%.

Note: The provision to pay teaching anesthesiologists 100% is strictly limited to involvement in a maximum of two resident cases only. If the anesthesiologist is involved in greater than two resident cases concurrently, bill with modifier QK, (see below).

QK Medical Direction of Two, Three, or Four Concurrent Anesthesia Procedures Involving Qualified Individuals (Residents, 1 or More CRNAs or a Combination of Both):
The modifier is to be used when the teaching anesthesiologist is medically directing more than two resident cases concurrently. Reimbursement to the medically directing anesthesiologist for the resident case(s) will be at 50%.

The modifier is also used for the medical direction of CRNAs, when the CRNAs are self-employed or employed by the facility. Reimbursement to the medically directing anesthesiologist for the CRNA case(s) will be at 50%.

Note: When CRNAs, employed an anesthesiologist or an anesthesiology group, provide services under the medical direction of an employing anesthesiologist, the "QK" modifier should not be used. The anesthesia CPT code should be billed without a modifier under the National Provider Identification (NPI) number of the anesthesiologist or the anesthesiology group. Reimbursement to the medically directing anesthesiologist (or to the anesthesia group) for the CRNA case(s) will be at 100%.

TERMS applicable to the above modifiers:

"Teaching rules" require that the teaching anesthesiologist be present for all critical or key portions of the case.

"Medical direction" requires that the following seven conditions be met. The physician must perform the following activities:

- Perform a pre-anesthesia examination and evaluation;
- Prescribe the anesthesia plan;
- Personally participate in the most demanding procedures of the anesthesia plan, including induction and emergence;
- Ensure that any procedures in the anesthesia plan that he or she does not perform are performed by a qualified anesthetist;
- Monitor the course of anesthesia administration at frequent intervals;
- Remain physically present and available for immediate diagnosis and treatment of emergencies; and
- Provide indicated post-anesthesia care.

"Medical supervision" is the term for medical direction of more than four concurrent anesthesia cases. It may also be used to bill for cases that start out as "medically directed," but in which the anesthesiologist becomes involved in other activities and is, therefore, unable to fulfill all seven requirements of medical direction.
