Online Provider Enrollment Portal - Now Available
for All Medicaid Enrollable Provider Types

Online Provider Enrollment Portal Now Available for All Medicaid Enrollable Provider Types*

All providers **who have never been enrolled in New York State (NYS) Medicaid before should now use the *NYS Medicaid Provider Services Portal (PSP)*** when applying for new enrollment. Providers, duly authorized representatives, and credentialing staff who prepare or submit applications must first create NY.gov Business Accounts to [obtain portal access](#). This can be done from a desktop, laptop, tablet or phone, and each user only needs to do this once. Once a Business Account is created, users will be able to access the PSP to complete and/or submit a new enrollment application, monitor the progress of the application, and if approved, view and update the provider's enrollment record. However, only owners or managing employees of an organization who are disclosed as such on the application can sign and submit enrollment transactions.

*The enrollment application process via the PSP can be started [here](#) for all provider types except group practices with only one member. Because the PSP is not yet able to accommodate such providers, group practices with only one member should continue to submit paper applications.

Later this summer, providers who enrolled via the past paper process will be required to link to their PSP enrollment record through a simple registration process which will include confirming the accuracy and completeness of the converted information. Once registered, providers will have the ability to view, revalidate, and modify existing provider information at any time.

If you have not already done so, you are encouraged to create a NY.gov Business Account now (follow the instructions at <https://www.emedny.org/PSP/>). If you are already able to log into NY.gov, please confirm you have a Business Account by verifying that "Business Account" appears next to your name under the blue header once logged in.
