

Expandable Controller and Harness coverage

The following change is effective for dates of service on or after April 1, 2013:

- At the time of initial purchase, an expandable controller (E2377) and harness (E2313) can now be billed separately when required for use on multiple power option power wheelchairs. Previously, these items were included in the MRA for multiple power function wheelchairs.
- Both E2377 and E2313 will continue to require a paper prior approval with supporting documentation.

For questions related to policy and coverage guidelines, please send an email to OHIPMedPA@health.state.ny.us.
